

Contents

1	Introduction	1
1.1	Overview	1
1.2	Plan of the book	3
2	Slice monogenic functions	17
2.1	Clifford algebras	17
2.2	Slice monogenic functions: definition and properties	23
2.3	Power series	33
2.4	Cauchy integral formula, I	37
2.5	Zeros of slice monogenic functions	42
2.6	The slice monogenic product	47
2.7	Slice monogenic Cauchy kernel	53
2.8	Cauchy integral formula, II	60
2.9	Duality Theorems	68
2.10	Topological Duality Theorems	73
2.11	Notes	76
3	Functional calculus for n-tuples of operators	81
3.1	The S -resolvent operator and the S -spectrum	82
3.2	Properties of the S -spectrum	86
3.3	The functional calculus	88
3.4	Algebraic rules	90
3.5	The spectral mapping and the S -spectral radius theorems	93
3.6	Projectors	99
3.7	Functional calculus for unbounded operators and algebraic properties	101
3.8	Notes	108
4	Quaternionic Functional Calculus	113
4.1	Notation and definition of slice regular functions	113
4.2	Properties of slice regular functions	117
4.3	Representation Formula for slice regular functions	121
4.4	The slice regular Cauchy kernel	129

4.5	The Cauchy integral formula II	134
4.6	Linear bounded quaternionic operators	136
4.7	The S -resolvent operator series	138
4.8	The S -spectrum and the S -resolvent operators	141
4.9	Examples of S -spectra	144
4.10	The quaternionic functional calculus	146
4.11	Algebraic properties of the quaternionic functional calculus	151
4.12	The S -spectral radius	153
4.13	The S -spectral mapping and the composition theorems	156
4.14	Bounded perturbations of the S -resolvent operator	159
4.15	Linear closed quaternionic operators	166
4.16	The functional calculus for unbounded operators	173
4.17	An application: uniformly continuous quaternionic semigroups . . .	180
4.18	Notes	188
5	Appendix: The Riesz–Dunford functional calculus	201
5.1	Vector-valued functions of a complex variable	201
5.2	The functional calculus for linear bounded operators	203
5.3	The functional calculus for unbounded operators	208
	Bibliography	211
	Index	219

Noncommutative Functional Calculus
Theory and Applications of Slice Hyperholomorphic
Functions

Colombo, F.; Sabadini, I.; Struppa, D.C.

2011, VI, 222 p., Hardcover

ISBN: 978-3-0348-0109-6

A product of Birkhäuser Basel
