

Contents

1	Patient Preparation: Magnetic Resonance Imaging Techniques	1
1.1	Examination Conditions	1
1.2	Sequences Used	2
1.3	Morphological Approach	2
1.3.1	Conventional Spin-Echo Sequence	3
1.3.2	Variants	3
1.3.3	Fast Spin-Echo or Turbo-Spin-Echo	3
1.3.4	Double IR Sequences	4
1.3.5	Half Fourier Single Shot Fast Spin-Echo Sequences	4
1.4	Gradient-Echo Cine Imaging	4
1.4.1	Beating Heart Applications	5
1.4.2	Qualitative Assessment of Blood Flow Applications	5
1.5	Phase Velocity Mapping for Flow Quantification	7
1.5.1	Measurement of the QP/QS Shunt Ratio	7
1.5.2	Assessment of Direction of Flow	8
1.5.3	Pressure Gradient Estimation	9
1.5.4	MR Angiography	9
1.5.5	Non-enhanced MR Angiography	10
1.5.6	Contrast-Enhanced MR Angiography	11
1.6	Conclusion	14
	References	14
2	Cardiovascular Anatomy and Atlas of MR Normal Anatomy	17
2.1	General Principles	17
2.2	Choice of Imaging Planes	18
2.3	Study of Blood Flow	19
2.3.1	Black-Blood Imaging	19
2.3.2	Bright-Blood Imaging	23
2.4	Segmental Analysis of Cardiac Anatomy	24
2.5	Normal Cardiovascular Anatomy	24
2.6	MR Segmental Cardiovascular Anatomy	25
2.6.1	“Morphologically” Right Atrium (mRA)	25
2.6.2	“Morphologically” Left Atrium (mLA)	28
2.6.3	“Morphologically” Right Ventricle (mRV)	29

2.6.4	“Morphologically” Left Ventricle” (mLV)	29
2.6.5	Pulmonary Artery	30
2.6.6	Aorta	30
2.7	Atlas of Normal MR Anatomy of the Heart and Mediastinum	30
	References	38
3	MRI Sequential Segmental Analysis and Identification of Anomalies	41
3.1	Identification of Visceroatrial Situs	41
3.1.1	Situs Solitus: Normal Atrial Situs.	42
3.1.2	Situs Inversus	42
3.1.3	Other Types of Situs: Situs Ambiguus	42
3.2	Atrioventricular and Ventriculoarterial Variants and Identification of Intersegmental Connections	46
3.2.1	Atrioventricular Variants and Identification of Connections	47
3.2.2	Ventriculoarterial Variants and Identification of Connections	53
3.2.3	Loop Rule	66
3.2.4	Cardiac Position	67
	References	69
4	Anomalous Systemic and Pulmonary Venous Connections	71
4.1	Examination Techniques.	71
4.2	Anomalous Systemic Venous Connections.	72
4.3	Left Superior Vena Cava.	72
4.3.1	Clinical Features	73
4.3.2	Imaging	73
4.3.3	MRI.	73
4.4	Azygos Continuation of the Inferior Vena Cava.	75
4.4.1	Clinical Features	79
4.4.2	Imaging	79
4.4.3	MRI.	79
4.5	Anomalous Pulmonary Venous Connection or Return	79
4.5.1	Total Anomalous Pulmonary Venous Connection or Return (TAPVC)	82
4.5.2	Anatomical Classification of TAPVC	82
4.5.3	Clinical Features	82
4.5.4	Imaging	83
4.5.5	MRI.	84
4.6	Partial Anomalous Pulmonary Venous Connection or Return (PAPVC)	85
4.6.1	Classification of Partial Anomalous Pulmonary Venous Connection (PAPVC).	85
4.6.2	Clinical Features	85
4.6.3	Imaging	88
4.6.4	MRI.	88
4.7	Other Pulmonary Venous Anomalies	89
4.7.1	Supernumerary or Absent Pulmonary Veins.	89

4.7.2	Pulmonary Vein Stenosis	89
4.7.3	Cor Triatriatum	90
4.8	Conclusion	92
	References	99
5	Aortic Arch Anomalies, Tracheal Compression and Stenosis	103
5.1	Introduction.	103
5.2	Clinical Features	103
5.3	Anatomical Diagnosis by Imaging	103
5.3.1	Chest Radiograph	103
5.3.2	Barium Swallow	103
5.3.3	Echocardiography	104
5.3.4	Bronchoscopy	104
5.3.5	Techniques	104
5.4	Magnetic Resonance Imaging.	105
5.4.1	Computed Tomography-Scan	105
5.4.2	Angiography	106
5.4.3	Aortic Arch Anomalies	106
5.5	Classification.	106
5.5.1	Involution of the Right Arch Resulting in Left Aortic Arch	107
5.5.2	Total or Partial Absence of Involution of the Two Arches (no Involution at 5).	108
5.5.3	Involution of the Left Aortic Arch Resulting in Right Aortic Arch	108
5.5.4	Other Anomalies	109
5.6	Double Aortic Arch.	109
5.6.1	Clinical Features	109
5.6.2	Imaging	110
5.7	Left Aortic Arch with Aberrant Right Subclavian Artery (or Right Aortic Arch with Aberrant Left Subclavian Artery)	111
5.7.1	Clinical Features	117
5.7.2	Imaging	117
5.8	Right Aortic Arch	118
5.8.1	Right Aortic Arch with Mirror Image Branching and Right Descending Aorta	123
5.8.2	Neuhauser Anomaly	124
5.8.3	Right Aortic Arch with Encircling (or Circumflex) Left Descending Aorta	128
5.9	Anomalies of the Sixth Aortic Arch	131
5.9.1	Anomalous Left Pulmonary Artery	131
5.9.2	Congenital Atresia of One of the Two Pulmonary Arteries	133
5.10	Other Clinical Forms.	133
5.10.1	Cervical Aortic Arch.	133
5.11	Isolated Subclavian Artery, Brachiocephalic Trunk (Innominate Artery) or Left Common Carotid Artery-Congenital Subclavian Steal Syndrome	136
5.11.1	Persistent Fifth Aortic Arch	138

5.11.2	Anomalous Brachiocephalic Trunk (Innominate Artery) . . .	138
5.11.3	Pseudo-Coarctation or Kinking of the Aorta	138
5.11.4	Tracheobronchial Compression Secondary to Cardiovascular Malformations	139
5.12	Intrinsic Tracheal Anomalies with Tracheal Compression by a Vessel in Normal Position	139
5.12.1	Anomalous Brachiocephalic Trunk (Innominate Artery)	139
5.12.2	Post-operative Vascular Malposition with Secondary Airway Compression	140
5.12.3	Tracheal Compression by a Non-Vascular Mediastinal Mass	142
	References	144
6	Other Aortic Malformations	147
6.1	Examination Techniques	147
6.2	Coarctation of the Aorta	148
6.3	Frequency	149
6.4	Anatomical Forms	149
6.4.1	Coarctation of the Aortic Isthmus	149
6.4.2	Atypical Sites	150
6.5	Forms According to the Type of Stenosis	150
6.5.1	Typical Form: Localized Coarctation	150
6.5.2	Atypical Form: Tubular Coarctation	153
6.6	Associated Malformations	153
6.6.1	Cardiovascular Malformations	153
6.6.2	Noncardiovascular Malformations	153
6.7	Clinical Forms	153
6.7.1	Minimally Symptomatic or Asymptomatic Forms	153
6.7.2	Symptomatic Forms	157
6.8	Coarctation of the Abdominal Aorta	162
6.8.1	Interrupted Aortic Arch	164
6.8.2	Dilatations of the Ascending Aorta	166
6.9	Conclusion	172
	References	172
7	Anomalies of the Right Ventricular Outflow Tract and Pulmonary Arteries	177
7.1	Examination Technique	177
7.2	Pulmonary Artery Malformations	178
7.2.1	Unilateral Absence of Pulmonary Artery (UAPA)	178
7.2.2	Anomalous Origin of Left Pulmonary Artery	180
7.2.3	Truncus Arteriosus	180
7.2.4	Valvular Pulmonary Atresia	182
7.2.5	Valvular Pulmonary Stenosis	182
7.2.6	Pulmonary Artery Stenosis and Atresia	182
7.3	Cyanotic Heart Disease	185
7.3.1	Cyanosis	185
7.3.2	Tetralogy of Fallot	187

7.3.3	Pulmonary Atresia with Ventricular Septal Defect.	191
7.3.4	Pulmonary Atresia with Intact Interventricular Septum	193
7.4	Transposition of the Great Vessels	194
7.4.1	Complete transposition of the great vessels (Dextro-transposition or D-transposition).	194
7.4.2	Corrected Transposition of the Great Vessels (Levo-Transposition or L-Transposition)	195
7.5	Double Outlet Right Ventricle	200
7.5.1	Pathology	200
7.5.2	Clinical Features	200
7.6	Double Outlet Left Ventricle.	202
7.7	Single Ventricle.	202
7.7.1	Pathology	202
7.7.2	Clinicopathological Forms	202
7.8	Tricuspid Atresia.	203
7.8.1	Pathology	203
7.8.2	Clinicopathological Forms	204
7.9	Ebstein Anomaly.	205
7.9.1	Pathology	205
7.9.2	Clinicopathological Forms	206
7.10	Treatment	206
7.10.1	Medical Treatment	208
7.10.2	Interventional Catheterization.	208
7.10.3	Surgery	211
7.11	Conclusion	212
