

Contents

Part I Immunology, Clinical, and Laboratory Aspects of Organ Transplantation

1 Immunology of Organ Transplantation	3
Sevgi Gurkan, Bernd Schröppel, and Barbara Murphy	
2 Current Concepts of Immunosuppression and Side Effects	11
Anand Khurana and Daniel C. Brennan	
3 Clinical Aspects of Infection	31
Rouba Ghoussoub and Daniel C. Brennan	
4 Clinical Evaluation of Alloantibodies in Solid Organ Transplantation	45
Gerald P. Morris and T. Mohanakumar	
5 Frontiers in Organ Transplantation	57
Marc R. Hammerman	

Part II Transplant Pathology of Organ Systems

6 Kidney	77
Helen Liapis, Matthew J. Koch, and Michael Mengel	
7 Lung	171
Anja C. Roden and Henry D. Tazelaar	
8 Liver	199
Hanlin L. Wang, Christopher D. Anderson, Sean Glasgow, William C. Chapman, Jeffrey S. Crippin, Mathew Augustine, Robert A. Anders, and Andres Roma	

9 Heart	315
Dylan V. Miller, Hannah Krigman, and Charles Canter	
10 Small Intestine	347
Frances V. White and Sarangarajan Ranganathan	
11 Pancreas	371
Raghava M. Munivenkatappa, John C. Papadimitriou, and Cinthia B. Drachenberg	
12 Vascularized Composite Allotransplantation	393
Linda C. Cendales, Jean Kanitakis, and Carolyn Burns	
Index	401
