

# Contents

<b>1 Photoelastic Techniques</b>	<b>1</b>
1.1 Basic Physics of Photoelastic Techniques	1
1.1.1 Light Polarization	2
1.1.2 Theory of Piezo-Optical Effect	3
1.2 Transmission of Polarized Light Through the Loaded Object of Optically Sensitive Material Under Conditions of Linearly and 3-D Stressed State	5
1.2.1 Plane Polariscope	6
1.2.2 Circular Polariscope	8
1.2.3 Passage of Polarized Light Through 3-D Stressed Medium	11
1.2.4 Integral Photoelasticity	14
1.3 Research Techniques in Stressed State of Construction Components	15
1.3.1 Research in Plane Problems of Elasticity Theory	15
1.3.2 Research in 3-D Problems by “Freezing” Method	19
1.3.3 Photoelastic Coating Technique	22
1.3.4 Scattered Light Technique	25
1.4 Examples of Practical Application of Photoelastic Techniques	28
1.4.1 Analysis of Rectangular Plate Plane Bending	28
1.4.2 Research in Stresses at Sharp Edges of Holes by Integral Photoelasticity Technique	29
1.4.3 Research in Thermoelastic Stresses at Joint Zone Between Inclined Branch Pipe and Shell Cover	32
<b>2 Coherent Optical Techniques</b>	<b>37</b>
2.1 Holographic Interferometry	37
2.1.1 Theoretic Framework of Interference Pattern Formation	38
2.1.2 Measurement of Mechanical Vibrations	44
2.1.3 Certain Peculiarities of Holographic Interferometry Technique	50

2.2	Speckle Photography . . . . .	50
2.2.1	Laser Speckle Pattern . . . . .	51
2.2.2	Evaluation of Speckle Width . . . . .	53
2.2.3	Measurement of Tangential Displacements of Quasi-Planar Objects by Speckle Photography Technique . . . . .	55
2.3	Electronic Speckle Pattern Interferometry . . . . .	56
2.3.1	Formation of Correlation Fringes . . . . .	57
2.3.2	Measurement Designs for Separate Components of the Displacement Vector . . . . .	60
2.3.3	Electronic Digital Speckle Pattern Interferometry . . . . .	62
2.3.4	Displacement Measurements by Digital Correlation Speckle Photography and Digital Holographic Interferometry Method . . . . .	62
2.4	Examples of Practical Application for Coherent Optical Methods . . . . .	67
2.4.1	Analysis of Object Surface Displacement During Static Deforming . . . . .	67
2.4.2	Research in Overhead-Track Hoist Displacement by Speckle Photography Technique . . . . .	69
2.4.3	Research in Characteristics of Material Deforming by EDSPI Method . . . . .	71
2.4.4	Research in Vibration Characteristics for Construction Components Interacting with Liquid Media . . . . .	74
2.4.5	Nondestructive Testing of Materials . . . . .	78
<b>3</b>	<b>Application of Interference Optical Techniques for Fracture Mechanics Problems . . . . .</b>	<b>83</b>
3.1	Peculiarities of Stress–Strain State Near Irregular Boundary . . . . .	84
3.1.1	Stress–Strain State Near Angular Cutout . . . . .	84
3.1.2	Stress–Strain State Near Crack Tip . . . . .	86
3.2	Fracture Criteria . . . . .	89
3.2.1	Force Fracture Criteria . . . . .	89
3.2.2	Energy Fracture Criteria . . . . .	92
3.2.3	Deformation Fracture Criteria . . . . .	95
3.3	Interference Optical Techniques for Determination of Stress Intensity Factors . . . . .	96
3.3.1	Photoelastic Techniques . . . . .	96
3.3.2	Coherent Optical Techniques . . . . .	105
3.4	Shadow Optical Method of Caustics (Caustics Method) . . . . .	106
3.4.1	Basic Equation of Caustics Method . . . . .	107
3.4.2	Determination of $K_I$ , $K_{II}$ , $K_{III}$ Under Static Loading . . . . .	109
3.4.3	Determination of $K_I$ Under Dynamic Propagation of Crack . . . . .	112

3.5	Examples of Practical Problem Solution . . . . .	115
3.5.1	Crack Propagation Through Boundary of Join Between Dissimilar Materials . . . . .	115
3.5.2	Crack Propagation from Root of Welded Joint Between Sidewall and Vessel Cover of Power Installation . . . . .	117
3.5.3	Determination of $K_{III}$ by Scattered Light Technique . . . .	119
3.5.4	Determination of $K_I$ in Stationary Crack Under Action of Impact Load . . . . .	121
<b>4</b>	<b>Experimental Methods for Research in Residual Stresses . . . . .</b>	<b>125</b>
4.1	General Remarks . . . . .	125
4.1.1	Types of Residual Stresses . . . . .	125
4.1.2	Boundary Problem of Residual Stress Determination . . .	126
4.1.3	Methods for Research in Residual Stresses . . . . .	128
4.2	Destructive Techniques for Research in Residual Stresses . . . .	129
4.2.1	Techniques of Component Layer-by-Layer Recutting . . .	130
4.2.2	Technique of Hole Drilling . . . . .	134
4.2.3	Research in Residual Stresses as an Inverse Problem of Experimental Mechanics . . . . .	139
4.3	Examples of Research in Residual Stresses in Construction Components . . . . .	147
4.3.1	Examples of Research in Residual Stresses in Construction Components . . . . .	147
4.3.2	Examples of Research in Residual Stresses in Construction Components . . . . .	148
4.3.3	Examples of Research in Residual Stresses in Construction Components . . . . .	152
<b>Appendix 1</b>	<b>Moiré Method . . . . .</b>	<b>157</b>
<b>Appendix 2</b>	<b>X-Ray Technique of Stress Analysis . . . . .</b>	<b>163</b>
A2.1	Nature and Properties of X-Rays . . . . .	163
A2.2	X-Ray Interference. Wulff–Bragg Equation . . . . .	164
A2.3	Basic Relations . . . . .	165
A2.4	Errors of Method . . . . .	169
A2.5	Examples of Practical Application . . . . .	171
