

Contents

1	Climate Change Mitigation by the Forestry Options in Bangladesh – A Synthesis	1
1.1	General Introduction	1
1.2	Theoretical Framework	3
1.2.1	Climate Change Disrupts the Human and Ecological Systems and Forest Land Use Mitigates This	3
1.2.2	Kyoto Protocol Obliges the GHG Reduction Commitment to the Annex I Parties	6
1.2.3	CDM Helps Attain GHG Reduction Commitment (Annex I) and Derive Sustainable Development in the Host (Non-Annex I) Countries	7
1.2.4	Carbon Sequestration in the Forests Can Cost-Effectively Reduce the Atmospheric GHGs	8
1.2.5	Biomass Combustion Efficiency Can Help Minimize GHG Emission and Slow Deforestation	11
1.3	Scopes of the Book	13
1.4	Objectives of This Publishing Attempt	14
1.5	General Methodology	14
2	General Overview of the Clean Development Mechanism (CDM)	15
2.1	Introduction	15
2.2	The CDM Regulators	15
2.3	The CDM Project Cycle	16
2.4	Small-Scale CDM	17
2.5	Sustainable Development Issues in the CDM Projects	18
2.6	Present Status of CDM Projects	18
3	CDM Forests in Bangladesh and Learning from the Reforestation Success of the Republic of Korea	23
3.1	Introduction	23
3.2	The Legal Issues of Mitigating Global Warming	24
3.3	General Overview of Bangladesh and Its Forestry Sector	25

3.4	General Overview of the Republic of Korea and Its Forestry Sector	26
3.4.1	What Bangladesh Can Learn from the Reforestation Success of the Republic of Korea	28
3.5	Potentials of the Bangladesh Forestry Sector to Mitigate Climate Change	30
3.6	Implications of the Forestry Options for Different Land Uses	31
3.6.1	Reducing Deforestation	31
3.6.2	Expansion of Carbon Sinks Through A/R	33
3.6.3	Different Forestry Options for A/R	35
3.6.4	Enforcement of the Forestry Acts and Regulations and Boosting Up the Responsibility as a Member of the International Conventions	36
3.7	Issues to Be Settled for Carbon Credits	36
3.7.1	Crediting	36
3.7.2	Protected Area Establishment and Crediting	37
3.7.3	Reduction of Fossil Fuel Use or Maintenance of the Stock of Forests	37
3.7.4	Internal Carbon Credit Allocation Regimes	37
3.8	Conclusions	38
4	Implications of Biomass Energy and Traditional Burning Technology in Bangladesh	39
4.1	Introduction	39
4.2	Energy Resources and Consumption	41
4.3	Present Forest Land Use and Its Problems	42
4.4	Biomass Demands on Forests and Different Forestry Scenarios	44
4.5	Land Categories Available for Biomass Production and Their Features	45
4.5.1	Different Forestry Options	45
4.6	CDM Additionality for Biomass Energy Promotion in Bangladesh	46
4.7	Traditional Cooking Stove Issues in Bangladesh	47
4.7.1	Introducing Improved Cooking Stove	49
4.8	CDM and Biomass Energy Promotion	50
4.9	Socio-economic Issues of Biomass Energy Promotion	51
4.10	Conclusions	53
5	Carbon Sequestration in the Forests of Bangladesh	55
5.1	Introduction	55
5.2	Materials and Methods	57
5.2.1	Sampling Procedures	58
5.2.2	Procedure of Net Carbon Sequestration Estimation	58
5.2.3	Biomass Estimation of the Plantations	60
5.2.4	Procedure of the Biomass Estimation of the Litterfall	60

5.2.5	Carbon Content Estimation	61
5.2.6	Procedure of the Estimation of Soil Carbon Content . . .	61
5.2.7	Procedure for the Estimation of Carbon Loss Through Forest Product Extraction from the Stands . . .	61
5.2.8	Statistical Analysis	62
5.3	Results and Discussion	62
5.3.1	Potential of Bangladeshi Forests in Carbon Uptake . . .	62
5.3.2	Gross Carbon Content in the Stands	63
5.3.3	Annual Increment in Carbon Contents in the Plantations	65
5.3.4	Potentialities of Carbon Sequestration in Chittagong Region	71
5.4	Global Warming and Its Effects on Bangladesh	74
5.5	CDM Additionality in Bangladesh	74
5.6	Prices for Carbon Credits	74
5.6.1	Carbon Accounting Method	75
5.7	Sustainability of the CDM Project in Bangladesh	75
5.8	Problems and Constraints for Creating CDM Forests in Bangladesh	76
5.9	Conclusions	77
6	Conclusions and Recommendations	81
6.1	Conclusions	81
6.2	Recommendations	82
6.2.1	To Reorient the General Future Policy/ Approaches of the Forestry Sector	82
6.2.2	To Achieve the Certified Emission Reduction (CER) Under CDM	83
6.2.3	To Promote Biomass Production and Its Energy	84
6.2.4	To Be Involved with A/R CDM	85
	References	87
	Subject Index	97

Forests to Climate Change Mitigation
Clean Development Mechanism in Bangladesh

Miah, M.D.; Shin, M.Y.; Koike, M.

2011, XVI, 100 p. 20 illus., Hardcover

ISBN: 978-3-642-13252-0
