

Contents

Part I Overview of Learning to Rank

1	Introduction	3
1.1	Overview	3
1.2	Ranking in Information Retrieval	7
1.2.1	Conventional Ranking Models	7
1.2.2	Query-Level Position-Based Evaluations	11
1.3	Learning to Rank	15
1.3.1	Machine Learning Framework	16
1.3.2	Definition of Learning to Rank	17
1.3.3	Learning-to-Rank Framework	18
1.4	Book Overview	23
1.5	Exercises	24
	References	25

Part II Major Approaches to Learning to Rank

2	The Pointwise Approach	33
2.1	Overview	33
2.2	Regression-Based Algorithms	33
2.2.1	Subset Ranking with Regression	34
2.3	Classification-Based Algorithms	35
2.3.1	Binary Classification for Ranking	35
2.3.2	Multi-class Classification for Ranking	37
2.4	Ordinal Regression-Based Algorithms	39
2.4.1	Perceptron-Based Ranking (PRanking)	39
2.4.2	Ranking with Large Margin Principles	40
2.4.3	Ordinal Regression with Threshold-Based Loss Functions	42
2.5	Discussions	42
2.5.1	Relationship with Relevance Feedback	43
2.5.2	Problems with the Pointwise Approach	44

2.5.3	Improved Algorithms	44
2.6	Summary	45
2.7	Exercises	45
	References	46
3	The Pairwise Approach	49
3.1	Overview	49
3.2	Example Algorithms	49
3.2.1	Ordering with Preference Function	49
3.2.2	SortNet: Neural Network-Based Sorting Algorithm	51
3.2.3	RankNet: Learning to Rank with Gradient Descent	52
3.2.4	FRank: Ranking with a Fidelity Loss	53
3.2.5	RankBoost	54
3.2.6	Ranking SVM	56
3.2.7	GBRank	58
3.3	Improved Algorithms	59
3.3.1	Multiple Hyperplane Ranker	59
3.3.2	Magnitude-Preserving Ranking	60
3.3.3	IR-SVM	61
3.3.4	Robust Pairwise Ranking with Sigmoid Functions	62
3.3.5	P-norm Push	63
3.3.6	Ordered Weighted Average for Ranking	64
3.3.7	LambdaRank	65
3.3.8	Robust Sparse Ranker	66
3.4	Summary	67
3.5	Exercises	67
	References	68
4	The Listwise Approach	71
4.1	Overview	71
4.2	Minimization of Measure-Specific Loss	72
4.2.1	Measure Approximation	72
4.2.2	Bound Optimization	77
4.2.3	Non-smooth Optimization	78
4.2.4	Discussions	80
4.3	Minimization of Non-measure-Specific Loss	80
4.3.1	ListNet	81
4.3.2	ListMLE	82
4.3.3	Ranking Using Cumulative Distribution Networks	83
4.3.4	BoltzRank	84
4.4	Summary	85
4.5	Exercises	86
	References	87
5	Analysis of the Approaches	89
5.1	Overview	89
5.2	The Pointwise Approach	89

5.3	The Pairwise Approach	91
5.4	The Listwise Approach	94
5.4.1	Non-measure-Specific Loss	94
5.4.2	Measure-Specific Loss	95
5.5	Summary	98
5.6	Exercises	98
	References	99

Part III Advanced Topics in Learning to Rank

6	Relational Ranking	103
6.1	General Relational Ranking Framework	104
6.1.1	Relational Ranking SVM	104
6.1.2	Continuous Conditional Random Fields	106
6.2	Learning Diverse Ranking	107
6.3	Discussions	110
	References	111
7	Query-Dependent Ranking	113
7.1	Query-Dependent Loss Function	113
7.2	Query-Dependent Ranking Function	115
7.2.1	Query Classification-Based Approach	115
7.2.2	K Nearest Neighbor-Based Approach	116
7.2.3	Query Clustering-Based Approach	118
7.2.4	Two-Layer Learning Approach	119
7.3	Discussions	120
	References	121
8	Semi-supervised Ranking	123
8.1	Inductive Approach	123
8.2	Transductive Approach	124
8.3	Discussions	125
	References	125
9	Transfer Ranking	127
9.1	Feature-Level Transfer Ranking	128
9.2	Instance-Level Transfer Ranking	128
9.3	Discussions	130
	References	130

Part IV Benchmark Datasets for Learning to Rank

10	The LETOR Datasets	133
10.1	Overview	133
10.2	Document Corpora	133
10.2.1	The “Gov” Corpus and Six Query Sets	134
10.2.2	The OHSUMED Corpus	134
10.2.3	The “Gov2” Corpus and Two Query Sets	135

10.3 Document Sampling	135
10.4 Feature Extraction	136
10.5 Meta Information	136
10.6 Learning Tasks	138
10.7 Discussions	142
References	142
11 Experimental Results on LETOR	145
11.1 Experimental Settings	145
11.2 Experimental Results on LETOR 3.0	146
11.3 Experimental Results on LETOR 4.0	149
11.4 Discussions	150
11.5 Exercises	151
References	151
12 Other Datasets	153
12.1 Yahoo! Learning-to-Rank Challenge Datasets	153
12.2 Microsoft Learning-to-Rank Datasets	154
12.3 Discussions	155
References	155
Part V Practical Issues in Learning to Rank	
13 Data Preprocessing for Learning to Rank	159
13.1 Overview	159
13.2 Ground Truth Mining from Logs	160
13.2.1 User Click Models	160
13.2.2 Click Data Enhancement	166
13.3 Training Data Selection	168
13.3.1 Document and Query Selection for Labeling	169
13.3.2 Document and Query Selection for Training	171
13.3.3 Feature Selection for Training	175
13.4 Summary	176
13.5 Exercises	176
References	177
14 Applications of Learning to Rank	181
14.1 Overview	181
14.2 Question Answering	181
14.2.1 Definitional QA	182
14.2.2 Quantity Consensus QA	183
14.2.3 Non-factoid QA	184
14.2.4 Why QA	185
14.3 Multimedia Retrieval	186
14.4 Text Summarization	187
14.5 Online Advertising	188
14.6 Summary	189

14.7 Exercises	190
References	190

Part VI Theories in Learning to Rank

15 Statistical Learning Theory for Ranking	195
15.1 Overview	195
15.2 Statistical Learning Theory	195
15.3 Learning Theory for Ranking	197
15.3.1 Statistical Ranking Framework	197
15.3.2 Generalization Analysis for Ranking	198
15.3.3 Statistical Consistency for Ranking	198
15.4 Exercises	199
References	199
16 Statistical Ranking Framework	201
16.1 Document Ranking Framework	202
16.1.1 The Pointwise Approach	202
16.1.2 The Pairwise Approach	202
16.1.3 The Listwise Approach	204
16.2 Subset Ranking Framework	204
16.2.1 The Pointwise Approach	205
16.2.2 The Pairwise Approach	205
16.2.3 The Listwise Approach	206
16.3 Two-Layer Ranking Framework	206
16.3.1 The Pointwise Approach	206
16.3.2 The Pairwise Approach	207
16.3.3 The Listwise Approach	208
16.4 Summary	208
16.5 Exercises	208
References	209
17 Generalization Analysis for Ranking	211
17.1 Overview	211
17.2 Uniform Generalization Bounds for Ranking	212
17.2.1 For Document Ranking	212
17.2.2 For Subset Ranking	214
17.2.3 For Two-Layer Ranking	216
17.3 Algorithm-Dependent Generalization Bound	217
17.3.1 For Document Ranking	218
17.3.2 For Subset Ranking	219
17.3.3 For Two-Layer Ranking	220
17.4 Summary	220
17.5 Exercises	221
References	221

18	Statistical Consistency for Ranking	223
18.1	Overview	223
18.2	Consistency Analysis for Document Ranking	224
18.2.1	Regarding Pairwise 0–1 Loss	224
18.3	Consistency Analysis for Subset Ranking	224
18.3.1	Regarding DCG-Based Ranking Error	225
18.3.2	Regarding Permutation-Level 0–1 Loss	225
18.3.3	Regarding Top- k True Loss	226
18.3.4	Regarding Weighted Kendall's τ	227
18.4	Consistency Analysis for Two-Layer Ranking	229
18.5	Summary	229
18.6	Exercises	230
	References	230

Part VII Summary and Outlook

19	Summary	235
	References	238
20	Future Work	241
20.1	Sample Selection Bias	241
20.2	Direct Learning from Logs	242
20.3	Feature Engineering	243
20.4	Advanced Ranking Models	243
20.5	Large-Scale Learning to Rank	244
20.6	Online Complexity Versus Accuracy	245
20.7	Robust Learning to Rank	245
20.8	Online Learning to Rank	246
20.9	Beyond Ranking	247
	References	247

Part VIII Appendix

21	Mathematical Background	251
21.1	Probability Theory	251
21.1.1	Probability Space and Random Variables	251
21.1.2	Probability Distributions	252
21.1.3	Expectations and Variances	254
21.2	Linear Algebra and Matrix Computation	255
21.2.1	Notations	255
21.2.2	Basic Matrix Operations and Properties	256
21.2.3	Eigenvalues and Eigenvectors	261
21.3	Convex Optimization	262
21.3.1	Convex Set and Convex Function	262
21.3.2	Conditions for Convexity	263
21.3.3	Convex Optimization Problem	263
21.3.4	Lagrangian Duality	264

21.3.5 KKT Conditions	265
References	266
22 Machine Learning	267
22.1 Regression	267
22.1.1 Linear Regression	267
22.1.2 Probabilistic Explanation	268
22.2 Classification	269
22.2.1 Neural Networks	270
22.2.2 Support Vector Machines	271
22.2.3 Boosting	273
22.2.4 K Nearest Neighbor (KNN)	274
22.3 Statistical Learning Theory	274
22.3.1 Formalization	275
22.3.2 Bounds for $ R(g) - \hat{R}(g) $	277
References	282
Index	283
