

Contents

1	Introduction	1
1.1	Motivation for VoIP Networks	1
1.1.1	Business Drive	3
1.1.2	Technology Innovation	4
1.1.3	Customer Comfort	4
1.2	Comparison of PSTN and VoIP Networks	4
1.3	Major Challenges in VoIP Networks	5
1.3.1	Quality of Service	5
1.3.2	Pricing	6
1.3.3	Security	6
1.4	Scope of this Book	7
1.5	Organization of the Book	7
2	Voice over Internet Protocol	9
2.1	VoIP Architecture	9
2.1.1	VoIP System	9
2.1.2	VoIP Protocol Structure	9
2.2	Quality of Service	12
2.2.1	A. Delay	12
2.2.2	B. Jitter	13
2.2.3	C. Packet Loss	13
2.3	VoIP Implementation	14
2.3.1	VoIP Test Bed	14
2.3.2	Measurement of Voice Quality	15
2.4	Session Initiation Protocol	16
2.4.1	Background	16
2.4.2	SIP Network Elements	18
2.4.3	SIP Messages	19
2.4.4	SIP Transactions	21

2.4.5	SIP Dialogues	21
2.4.6	Typical SIP Scenarios	22
2.5	Summary	23
3	Traffic Characterization	25
3.1	Packet-Switched Network Model	26
3.2	Queuing Model	26
3.2.1	Queuing Specification	27
3.2.2	Assumptions of the Queuing Model	27
3.2.3	Statistical Properties of Traffic	28
3.3	Analysis of the Delay Bound	29
3.3.1	The M/M/1 Model	29
3.3.2	The M/D/1 Model	31
3.3.3	Comparison of M/M/1 and M/D/1 Models	32
3.4	Summary	33
4	Impact of Bounded Delays on Resource Consumption in Packet Switched Networks with M/M/1 Traffic	35
4.1	Introduction	35
4.1.1	Average Delay versus Bounded Delay	36
4.1.2	Organization of this Chapter	36
4.2	The SIP-Based VoIP Network Model	36
4.3	A Single-Hop VoIP Network	37
4.3.1	Analysis of a Single-Hop VoIP Network	38
4.3.2	Discussion	39
4.4	Two-Hop Tandem Network	40
4.4.1	Analysis of Two-Hop VoIP Network	41
4.4.2	Discussion	42
4.5	Multiple-Hop Network	42
4.5.1	Analysis of Multiple-Hop VoIP Network	43
4.5.2	Discussion	44
4.6	Simulation Results	44
4.6.1	Simulation Scenario	45
4.6.2	Simulation Results	45
4.7	Conclusion	46
5	Impact of Bounded Delay on Resource Consumption-M/D/1 Model	49
5.1	Introduction	49
5.2	Network Model	50
5.3	A Single-Hop Network	51
5.4	Two-Hop Tandem Network	53
5.5	Multi-Hop Network	55
5.6	Simulation Results	56

5.6.1	Simulation Scenarios.	57
5.6.2	One-Hop Network Simulation Results.	59
5.6.3	Two-Hop Network Simulation Results	60
5.7	Conclusion.	62
6	Impact of Bounded Jitter on Resource Consumption in Multi-Hop Networks.	63
6.1	Introduction	63
6.2	Jitter Analysis	64
6.2.1	Single-Hop Model	64
6.2.2	Two-Hop and Multi-Hop Model.	64
6.3	Impact of the Number of Hops on Jitter	65
6.3.1	Capacity Requirement for a n-Hop Network as a Function of n with a Pre-Defined Jitter Upper Bound	65
6.3.2	The Impact of the Utilization Factor on the Capacity per Hop Needed for a Pre-Defined Upper Bound on End-to-End Jitter	66
6.3.3	The Impact on Throughput of a Resource-Constrained Multi-Hop Network with a Pre-Defined Upper Bound on End-to-End Jitter	68
6.4	Conclusions	69
7	Cost and Quality in Packet Switched Networks	71
7.1	Introduction	71
7.2	A QoS Based Pricing Model	73
7.3	Mathematical Model of a VoIP Network.	73
7.4	Analysis of the Single-Hop VoIP Network	74
7.4.1	Threshold Delay, Resource Consumption and Throughput	74
7.4.2	Pricing for Single-Hop Network.	78
7.5	Analysis of Two-Hop VoIP Network	79
7.5.1	Comparisons of Two-Hop and Single-Hop Traffic Performance.	79
7.5.2	Pricing for Two-Hop Network	82
7.6	Analysis of Multi-Hop VoIP Network.	83
7.7	Conclusion.	85
8	Cumulative Impact of Inhomogeneous Channels on Risk	87
8.1	Introduction	87
8.2	The Single Channel Model	88
8.3	The Two-Channel Model.	89
8.4	The n-Channel Model	93
8.5	Conclusion.	94
8.6	Further Extensions of the Technique.	94

9	The Economics of VoIP Systems	95
9.1	Introduction	95
9.2	Economy of Scale of Communication Networks.	96
9.3	Economic Characteristics of an Information Network	98
9.4	Major Components of a Telecommunications Network	100
9.5	The Integrated Local Loop	102
9.6	Architectural Dissimilarities between the Internet and the Legacy Network	103
9.7	Access Network as the Bottleneck	104
9.8	Pricing of Internet Services	105
9.9	The Overall impact on VoIP Pricing.	106
9.10	The Likely Evolution Toward a Single Network	107
9.11	Conclusions	109
10	A Network Based Authentication Scheme for VoIP	111
10.1	Introduction	111
10.2	Authentication	113
	10.2.1 Need for Authentication	113
	10.2.2 Mutual Authentication versus Network Authentication.	113
10.3	Comparative Analysis of Existing Authentication Schemes . . .	114
10.4	Proposed Requirements of Authentication	115
10.5	Proposed Schemes for Authentication	115
	10.5.1 Proposed Scheme	115
	10.5.2 Enhanced Performance	116
	10.5.3 Inter-network Authentication	118
10.6	Conclusion.	118
11	Conclusions and Future Work	119
