

Contents

1 Introduction	1
2 Mammalian Cerebral Cortex: Embryonic Development and Cytoarchitecture	5
3 Human Motor Cortex: Development and Cytoarchitecture	11
3.1 Seven-Week-Old Stage	14
3.2 Eleven-Week-Old Stage	16
3.3 Fifteen-Week-Old Stage	18
3.4 Twenty-Week-Old Stage	25
3.5 Thirty-Week-Old Stage	26
3.6 Thirty-Five-Week-Old Stage	27
3.7 Forty-Week-Old (Newborn) Stage	29
4 The Mammalian Pyramidal Neuron: Development, Structure, and Function	35
4.1 Developmental Features	35
4.2 Morphological Features	38
4.3 Functional Features	39
4.4 Ascending Functional Maturation	43
4.5 Descending Function	45
5 Human Motor Cortex First Lamina: Development and Cytoarchitecture	49
5.1 First Lamina Principal Components	53
5.2 Cajal–Retzius Cell Unique Morphology	55
5.3 First Lamina Secondary Components	62
6 Human Motor Cortex Excitatory–Inhibitory Neuronal Systems: Development and Cytoarchitecture	65
6.1 The Pyramidal-Basket System	66
6.2 The Pyramidal-Martinotti System	73
6.3 The Pyramidal-Double-Bouquet System	75
6.4 The Pyramidal-Chandelier System	77

7 Human Cerebral Cortex Intrinsic Microvascular System: Development and Cytoarchitecture	85
8 Human Motor Cortex First Lamina and Gray Matter Special Astrocytes: Development and Cytoarchitecture	101
8.1 First Lamina Special Astrocytes	104
8.2 Grey Matter Protoplasmic Astrocytes	104
9 New Developmental Cytoarchitectonic Theory and Nomenclature	113
10 Epilogue	121
11 Cat Motor Cortex: Development and Cytoarchitecture.	125
11.1 Cat 25-Day-Old Stage	125
11.2 Cat 30-Day-Old Stage	125
11.3 Cat 35-Day-Old Stage	127
11.4 Cat 40-Day-Old Stage	128
11.5 Cat 45-Day-Old Stage	129
11.6 Cat 50-Day-Old Stage	130
11.7 Cat 55-Day-Old Stage	131
11.8 Newborn Cat Motor Cortex	132
12 The Rapid Golgi Reaction: A Personal Quest.	137
Index	143
About the Author	145
