<b>1</b>	<b>Basics of Fluid Mechanics and Convective Heat Transfer . . . . .</b>	<b>1</b>
1.1	Fluid Properties . . . . .	1
1.1.1	Viscosity . . . . .	1
1.1.2	Density . . . . .	2
1.1.3	Thermal Conductivity . . . . .	2
1.1.4	Surface Tension . . . . .	3
1.1.5	Speed of Sound and Mach Number . . . . .	3
1.1.6	Newtonian and Non-Newtonian Fluids . . . . .	3
1.2	Treatments and Visualization of Fluid. . . . .	4
1.2.1	Eulerian and Lagrangian Approaches . . . . .	4
1.2.2	Streamline, Streakline and Pathline. . . . .	4
1.2.3	Integral and Differential Treatments . . . . .	5
1.3	Vorticity and Irrotational Flow. . . . .	6
1.4	Force, Strain and Stress. . . . .	7
1.5	Fluid Acceleration . . . . .	9
1.6	Mass Conservation . . . . .	9
1.7	Conservation of Linear Momentum. . . . .	10
1.8	Navier–Stokes Equations. . . . .	11
1.9	Conservation of Energy. . . . .	11
1.10	Boundary Conditions. . . . .	12
1.10.1	No Slip and No Temperature Jump Conditions . . . . .	12
1.10.2	Inlet and Outlet . . . . .	13
1.10.3	Interface . . . . .	13
1.11	Convective Heat Transfer . . . . .	13
1.12	Examples. . . . .	15
1.12.1	Flow Normal to an Infinite Circular Cylinder . . . . .	15
1.12.2	Thermal Boundary-Layer Inside a Heated Circular Tube. . . . .	17
1.13	Concluding Remarks. . . . .	18
	References . . . . .	18

<b>2</b>	<b>Fluid Turbulence</b> . . . . .	19
2.1	Physical Description . . . . .	19
2.2	Stability of Laminar Flows . . . . .	22
2.3	Transition and Onset of Turbulence . . . . .	22
2.4	Types of Turbulent Flows . . . . .	23
2.5	Significance of Turbulent Flows and Heat Transfer . . . . .	24
2.6	Turbulence in the Vicinity of a Solid Wall . . . . .	25
2.7	Task of a Turbulence Model . . . . .	28
2.8	Concluding Remarks . . . . .	29
	References . . . . .	29
<b>3</b>	<b>Characteristics of Some Important Turbulent Flows</b> . . . . .	31
3.1	Boundary-Layer Flow Past a Flat Plate . . . . .	31
3.2	Forced and Free Convections . . . . .	34
3.3	Simple Free Shear Flows . . . . .	35
3.4	Circular Pipe and Parallel Plates . . . . .	38
3.5	Separated Flows . . . . .	40
3.6	Concluding Remarks . . . . .	42
	References . . . . .	42
<b>4</b>	<b>Reynolds-Averaged Governing Equations and Closure Problem.</b> . .	43
4.1	Types of Reynolds-Averaging . . . . .	43
4.1.1	Time-Average . . . . .	44
4.1.2	Spatial-Average . . . . .	44
4.1.3	Ensemble-Average . . . . .	44
4.2	RANS and Scalar Equations . . . . .	46
4.3	Closure Problem . . . . .	47
4.4	Concluding Remarks . . . . .	48
	References . . . . .	48
<b>5</b>	<b>Models Based on Boussinesq Approximation</b> . . . . .	49
5.1	Boussinesq Approximation . . . . .	49
5.2	Models Based on Boussinesq Approximation . . . . .	50
5.2.1	Mixing Length Models . . . . .	50
5.2.2	One Equation Model . . . . .	53
5.2.3	Two Equation Models . . . . .	56
5.3	Limitations of Boussinesq Approximation . . . . .	56
5.4	Examples . . . . .	56
5.5	Concluding Remarks . . . . .	56
	References . . . . .	57
<b>6</b>	<b><math>k</math>-<math>\varepsilon</math> and Other Two Equations Models</b> . . . . .	59
6.1	Introduction . . . . .	59
6.2	Standard $k$ - $\varepsilon$ Model . . . . .	59

6.3	Exact Transport Equations for $k$ and $\varepsilon$ . . . . .	60
6.4	Modelled Transport Equations for $k$ and $\varepsilon$ . . . . .	60
6.5	Features of the $k$ - $\varepsilon$ Model . . . . .	62
6.6	Boundary Conditions. . . . .	62
6.7	Treatment of Wall . . . . .	63
6.7.1	Wall Functions Approach . . . . .	63
6.7.2	Low Reynolds Number Models . . . . .	65
6.8	Example: Oscillatory Boundary Layers . . . . .	67
6.9	Some Modern Variants of $k$ - $\varepsilon$ Model . . . . .	67
6.9.1	RNG $k$ - $\varepsilon$ Model . . . . .	68
6.9.2	Realizable $k$ - $\varepsilon$ Model . . . . .	68
6.9.3	$k$ - $\omega$ Model . . . . .	69
6.10	V2f Model. . . . .	70
6.11	Shear Stress Transport $k$ - $\omega$ Model . . . . .	72
6.12	Other Two Equation Models . . . . .	73
6.13	Modifications to $k$ - $\varepsilon$ Model for Buoyancy Driven Flows. . . . .	73
6.14	Other Modifications . . . . .	76
6.15	Concluding Remarks. . . . .	77
	References . . . . .	78
<b>7</b>	<b>Reynolds-Stress and Scalar Flux Transport Model . . . . .</b>	<b>81</b>
7.1	Introduction . . . . .	81
7.2	Modeled Equations for Reynolds Stress Transport Model . . . . .	81
7.2.1	Modeling of Turbulent Transport . . . . .	82
7.2.2	Modeling of Pressure Strain. . . . .	83
7.2.3	Modeling of Dissipation . . . . .	83
7.3	Exact Transport Equation for Scalar Flux . . . . .	84
7.4	Boundary Conditions. . . . .	84
7.5	Treatment of Solid Walls. . . . .	85
7.6	Features of Reynolds-Stress and Scalar Flux Transport Model . . . . .	86
7.7	Algebraic Stress and Scalar Flux Models. . . . .	86
7.8	Examples. . . . .	87
7.9	Concluding Remarks. . . . .	88
	References . . . . .	89
<b>8</b>	<b>Direct Numerical Simulation and Large Eddy Simulation . . . . .</b>	<b>91</b>
8.1	Introduction . . . . .	91
8.2	Direct Numerical Simulation . . . . .	92
8.3	Large Eddy Simulation . . . . .	93
8.4	Subgrid Scale Models for LES. . . . .	95
8.4.1	Smagorinsky SGS Model. . . . .	95
8.4.2	Dynamic SGS Model . . . . .	96
8.4.3	Scale Similarity SGS Model . . . . .	97

8.5	DNS vis-à-vis LES . . . . .	97
8.6	Detached Eddy Simulation and Hybrid Models . . . . .	97
8.7	Treatment of Walls in LES . . . . .	98
8.7.1	Wall Models That Use Equilibrium Laws . . . . .	99
8.7.2	Velocity and Temperature TBLE Wall Model . . . . .	100
8.8	Initial, Boundary Conditions and Duration of Computations . . .	102
8.9	Concluding Remarks . . . . .	103
	References . . . . .	104
<b>9</b>	<b>Some Case Studies . . . . .</b>	<b>105</b>
9.1	Heat Exchangers . . . . .	105
9.2	Stirred Vessels . . . . .	107
9.3	Flow in a Tundish Used in Steel Making . . . . .	108
9.4	Turbulent Plume . . . . .	109
9.5	LES and DES of Particle Deposition in a Human Throat . . . .	111
9.6	Unsteady Cross Ventilation in Buildings . . . . .	112
9.7	Effect of Turbulent Prandtl Number on Film Cooling . . . . .	113
9.8	Flow Over Rough Walls with Suction . . . . .	114
9.9	Separated Convection Due to Backward Facing Step . . . . .	114
9.10	Concluding Remarks . . . . .	114
	References . . . . .	115
<b>10</b>	<b>Conclusions and Recommendations . . . . .</b>	<b>117</b>
10.1	Tackling Turbulence . . . . .	117
10.2	CFD Issues . . . . .	119
	References . . . . .	119
