

# Table of Contents

Chapter 1. Algebraic Patching . . . . .	1
1.1 Patching . . . . .	1
1.2 Galois Action on Patching Data . . . . .	5
1.3 The Compound of the Patching Data . . . . .	7
Notes . . . . .	9
Chapter 2. Normed Rings . . . . .	10
2.1 Normed Rings . . . . .	10
2.2 Rings of Convergent Power Series . . . . .	14
2.3 Properties of the Ring $K\{x\}$ . . . . .	17
2.4 Convergent Power Series . . . . .	21
2.5 The Regularity of $K((x))/K((x))_0$ . . . . .	25
Notes . . . . .	29
Chapter 3. Several Variables . . . . .	31
3.1 A Normed Subring of $K(x)$ . . . . .	31
3.2 Mitagg-Leffler Series . . . . .	33
3.3 Fields of Mitagg-Leffler Series . . . . .	37
3.4 Factorization of Matrices over Complete Rings . . . . .	39
Notes . . . . .	41
Chapter 4. Constant Split Embedding Problems over Complete Fields . . . . .	43
4.1 Tame Realization of Cyclic Groups over $K(x)$ . . . . .	43
4.2 Realization of Cyclic Groups of Order $p^k$ . . . . .	47
4.3 Rational Realization of Cyclic Groups over Complete Fields . . . . .	52
4.4 Solution of Embedding Problems . . . . .	55
Notes . . . . .	59
Chapter 5. Ample Fields . . . . .	61
5.1 Varieties . . . . .	61
5.2 Existentially Closed Extensions . . . . .	64
5.3 Ample Fields . . . . .	67
5.4 Many Points . . . . .	69
5.5 Algebraic Extensions . . . . .	72
5.6 Examples of Ample Fields . . . . .	73
5.7 Henselian Pairs . . . . .	76
5.8 Fields with pro- $p$ Absolute Galois Groups . . . . .	81
5.9 Embedding Problems over Ample Fields . . . . .	84
5.10 PAC Hilbertian Fields are $\omega$ -Free . . . . .	89
5.11 Krull Domains . . . . .	92
5.12 Lifting . . . . .	93
Notes . . . . .	95

Chapter 6. Non-Ample Fields . . . . .	98
6.1 Nonample Fields — Elementary Methods . . . . .	98
6.2 Nonample Fields — Advanced Methods . . . . .	104
6.3 Abelian Varieties and Jacobian Varieties . . . . .	105
6.4 The Mordell-Lang Conjecture . . . . .	108
6.5 Consequences of the Mordell-Lang Conjecture . . . . .	110
6.6 On the Gonality of a Function Field of One Variable . . . . .	114
6.7 Gonality under Constant Reduction . . . . .	119
6.8 Points of Degree $d$ . . . . .	122
Notes . . . . .	127
Chapter 7. Split Embedding Problems over Complete Fields . . . . .	129
7.1 Total Decomposition . . . . .	129
7.2 Ramification . . . . .	131
7.3 Solution of Embedding Problems over Complete Fields . . . . .	135
7.4 Linearly Disjoint Solutions . . . . .	138
Notes . . . . .	140
Chapter 8. Split Embedding Problems over Ample Fields . . . . .	142
8.1 Normal Reduction . . . . .	142
8.2 Inertia Groups . . . . .	145
8.3 Almost All Reductions . . . . .	151
8.4 Embedding Problems under Existentially Closed Extensions . . . . .	153
8.5 The Transcendence Degree of the Field of Formal Power Series . . . . .	157
8.6 Solution of Embedding Problems over Ample Fields . . . . .	159
Notes . . . . .	163
Chapter 9. The Absolute Galois Group of $C(t)$ . . . . .	164
9.1 The Fundamental Group of a Riemann Surface . . . . .	165
9.2 Fundamental Groups in Positive Characteristic . . . . .	172
9.3 Cohomology of Groups . . . . .	175
9.4 The Projectivity of $\text{Gal}(C(t))$ . . . . .	183
9.5 Projectivity of Fundamental Groups . . . . .	186
9.6 Maximal Unramified Extensions . . . . .	193
9.7 Embedding Problems with Given Branching . . . . .	195
9.8 Descent . . . . .	199
9.9 Fundamental Groups with $S$ Finite . . . . .	202
Notes . . . . .	205
Chapter 10. Semi-Free Profinite Groups . . . . .	207
10.1 Independent Subgroups . . . . .	207
10.2 Fiber Products . . . . .	213
10.3 Twisted Wreath Products . . . . .	215
10.4 Closed Subgroups of Semi-Free Profinite Groups . . . . .	220
10.5 The Diamond Theorem . . . . .	222

10.6 Quasi-Free Profinite Groups . . . . .	227
Notes . . . . .	231
Chapter 11. Function Fields of One Variable over PAC Fields . . . .	233
11.1 Henselian Fields . . . . .	233
11.2 Brauer Groups of Henselian Fields . . . . .	235
11.3 Local-Global Theorems for Brauer Groups . . . . .	238
11.4 Picard Groups . . . . .	240
11.5 Fields of Cohomological Dimension at most 1 . . . . .	244
11.6 Radical Extensions . . . . .	246
11.7 Semi-Free Absolute Galois Groups . . . . .	248
Notes . . . . .	251
Chapter 12. Complete Noetherian Domains . . . . .	252
12.1 Perseverance of Inertia Groups . . . . .	252
12.2 Krull Fields . . . . .	256
12.3 Density of Hilbert Sets . . . . .	263
12.4 Krull Hilbertian Ample Fields . . . . .	268
Notes . . . . .	273
Open Problems . . . . .	275
References . . . . .	276
Glossary of Notation . . . . .	285
Index . . . . .	287
