1	Introduction	1
	References	3
2	Theoretical Aspects of Photonic Structures	5
2.1	Reflection and Refraction at Optical Interfaces	6
2.2	Thin Film Interference	7
2.3	Multilayer Reflectivity	9
2.3.1	Qualitative Analysis of Multilayer Interference	9
2.3.2	Quantitative Analysis of Multilayer Interference	10
2.4	Band-Gaps of One-Dimensional Photonic Crystals	12
2.5	Multilayer Resonance Cavities	18
2.6	Diffraction from Periodic Surface Structures	21
2.6.1	Diffraction in the Fraunhofer Approximation	22
2.6.2	Finite-Difference Time-Domain Modelling of Diffraction	23
	References	26
3	Structural Colours in Nature	29
3.1	Structural Colours in the Animal Kingdom	30
3.1.1	Simple Multilayers: The Japanese Jewel Beetle	30
3.1.2	Complex Multilayer Arrangements in Butterfly and Moth Structures	31
3.2	Floral Diffractive Structures	39
3.2.1	Diffraction and Iridescence from Striations on Flower Petals	39
3.2.2	Near-UV Reflectivity Enhancement by Grating-Like Striations	49
3.3	Conclusion	52
	References	53

4	Materials and Techniques	57
4.1	Materials	57
4.1.1	Polymer Materials	57
4.1.2	Metal Oxides	61
4.2	Techniques: Multilayer Production	61
4.2.1	Sequential Spin-Coating	61
4.2.2	Floating and Stacking	62
4.2.3	Atomic Layer Deposition	63
4.3	Techniques: Pattern Creation and Transfer	66
4.3.1	Colloid Templating	66
4.3.2	Argon Ion Milling	67
4.3.3	Nano-Imprint Lithography	69
4.3.4	Dental Wax Casting	70
4.4	Techniques: Sample Characterisation	70
4.4.1	Gonio-Spectroscopy	71
4.4.2	Micro-Spectroscopy	73
4.4.3	Ellipsometry	74
	References	75
5	Static and Tuneable One-Dimensional Photonic Structures	79
5.1	Static One-Dimensional Optical Devices	79
5.1.1	Organic Bragg Reflectors	80
5.1.2	Organic Resonance Cavities	84
5.2	Stretch-tuneable Dielectric Mirrors and Optical Microcavities	87
5.2.1	Sample Preparation and Experimental Setup	88
5.2.2	Cavity Design and Modelling	91
5.2.3	Results and Discussions	92
5.3	Conclusion	96
	References	97
6	Microfabrication of Photonic Structures with Higher Dimensionality	99
6.1	Template-Assisted Ion Milling	100
6.1.1	The Ion Milling Template	100
6.1.2	Micro-Cones	100
6.1.3	Gold Crowns on Micro-Cones	102
6.1.4	Multilayer Patterning by Ion Milling	105
6.2	Nano-Imprinting of Photonic Structures	109
6.2.1	Imprinting with Micro-Cone Masters	109
6.2.2	Replication of Micro-Cones for Flexible Cell Substrates	111
6.2.3	Fabrication of an Imprint Master for the Replication of Butterfly Wing Scale Patterns	112
6.2.4	Multilayer Patterning by Nano-Imprinting	114

6.3	Atomic Layer Deposition on Structured Substrates	116
6.4	Conclusion	118
	References	118
7	Mimicry of <i>Papilio Blumei</i>'s Colourful Wing Scale Structure	121
7.1	The Role Model	121
7.2	The Replication Procedure	123
7.3	A Structural Replica	123
7.4	A Structurally Modified Replica with Enhanced Optical Performance	129
7.5	Conclusion	132
	References	133
8	Conclusions and Future Work	135
8.1	Summary	135
8.2	Future Work	137
	Curriculum Vitae	139
