Contents

1 Non-Newtonian Fluids 1
1.1 Definitions 1
1.1.1 Newtonian Fluids 1
1.1.2 Non-Newtonian Fluids 4
1.2 Non-Newtonian Fluid Behaviour 7
1.2.1 Simple Flows 7
1.2.2 Intrinsic Viscosity and Solution Classification 12
1.2.3 Dimensionless Numbers 13
1.2.4 Constitutive Equations 15
1.3 Rheometry 25
1.3.1 Shear Rheometry 25
1.3.2 Extensional Rheometry 29
1.3.3 Microrheology Measurement Techniques 32
1.4 Particular Non-Newtonian Fluids 34
1.4.1 Blood 34
1.4.2 Synovial Fluid 37
1.4.3 Saliva 40
1.4.4 Cell Constituents 41
1.4.5 Other Viscoelastic Biological Fluids 43
References 43

2 Nucleation 49
2.1 Nucleation Models 49
2.2 Nuclei Distribution 53
2.2.1 Distribution of Cavitation Nuclei in Water 53
2.2.2 Distribution of Cavitation Nuclei in Polymer Solutions . . 54
2.2.3 Cavitation Nuclei in Blood 55
2.3 Tensile Strength 57
References 59

3 Bubble Dynamics 63
3.1 Spherical Bubble Dynamics 63
3.1.1 General Equations of Bubble Dynamics 63

3.1.2 The Equations of Motion for the Bubble Radius 65
3.1.3 Heat and Mass Transfer Through the Bubble Wall 81
3.1.4 Experimental Results 82
3.1.5 Bubbles in a Sound-Irradiated Liquid 86
3.2 Aspherical Bubble Dynamics 91
3.2.1 Bubbles Near a Rigid Wall 92
3.2.2 Bubbles Between Two Rigid Walls 98
3.2.3 Bubbles in a Shear Flow 98
3.2.4 Shock-Wave Bubble Interaction 99
3.3 Bubbles Near an Elastic Boundary 101
3.4 Bubbles in Tissue Phantoms 107
3.5 Estimation of Extensional Viscosity 110
References 112

4 Hydrodynamic Cavitation 117
4.1 Non-cavitating Flows 118
4.1.1 Drag Reduction 118
4.1.2 Reduction of Pressure Drop in Flows Through Orifices . . 121
4.1.3 Vortex Inhibition 123
4.2 Cavitating Flows 123
4.2.1 Cavitation Number 124
4.2.2 Jet Cavitation 126
4.2.3 Cavitation Around Blunt Bodies 129
4.2.4 Vortex Cavitation 134
4.2.5 Cavitation in Confined Spaces 143
4.2.6 Mechanisms of Cavitation Suppression by Polymer Additives 148
4.3 Estimation of Extensional Viscosity 149
References 150

5 Cavitation Erosion 155
5.1 Cavitation Erosion in Non-Newtonian Fluids 156
5.2 Mechanisms of Cavitation Damage in Newtonian Fluids 163
5.3 Reduction of Cavitation Erosion in Polymer Solutions 171
References 172

6 Cardiovascular Cavitation 175
6.1 Cavitation for Ultrasonic Surgery 175
6.1.1 Sonothrombolysis 175
6.1.2 Ultrasound Contrast Agents 177
6.2 Cavitation in Laser Surgery 199
6.2.1 Transmyocardial Laser Revascularization 199
6.2.2 Laser Angioplasty 202
6.3 Cavitation in Mechanical Heart Valves 206
6.3.1 Detection of Cavitation in Mechanical Heart Valves 206

6.3.2 Mechanisms of Cavitation Inception in Mechanical Heart Valves . . . 208
6.3.3 Collateral Effects Induced by Cavitation . . . 209
6.4 Gas Embolism . . . 210
6.4.1 Treatment Strategies for Gas Embolism . . . 211
6.4.2 Gas Embolotherapy . . . 211
References . . . 214

7 Nanocavitation for Cell Surgery . . . 225
7.1 Cavitation Induced by Femtosecond Laser Pulses . . . 226
7.1.1 Numerical Simulations . . . 226
7.1.2 Experimental Results . . . 228
7.2 Cavitation During Plasmonic Photothermal Therapy . . . 229
7.2.1 Nanoparticles and Surface Plasmon Resonance . . . 231
7.2.2 Bubble Dynamics . . . 233
7.2.3 Biological Effects of Cavitation . . . 241
References . . . 245

8 Cavitation in Other Non-Newtonian Biological Fluids . . . 249
8.1 Cavitation in Saliva . . . 249
8.1.1 Cavitation During Ultrasonic Plaque Removal . . . 249
8.1.2 Cavitation During Passive Ultrasonic Irrigation of the Root Canal . . . 252
8.1.3 Cavitation During Laser Activated Irrigation of the Root Canal . . . 254
8.1.4 Cavitation During Orthognathic Surgery of the Mandible . . . 256
8.2 Cavitation in Synovial Liquid . . . 256
8.3 Cavitation in Aqueous Humor . . . 258
References . . . 261

Cavitation in Non-Newtonian Fluids
With Biomedical and Bioengineering Applications
Brujan, E.
2011, XI, 269 p., Hardcover
ISBN: 978-3-642-15342-6
