

Contents

| | |
|---|-----|
| Introduction | 1 |
| Dan Crisan | |
| Integration by Parts Formula with Respect to Jump Times for Stochastic Differential Equations | 7 |
| Vlad Bally and Emmanuelle Clément | |
| A Laplace Principle for a Stochastic Wave Equation in Spatial Dimension Three | 31 |
| V́ctor Ortiz-Ĺpez and Marta Sanz-Solé | |
| Intertwined Diffusions by Examples | 51 |
| Xue-Mei Li | |
| Efficient and Practical Implementations of Cubature on Wiener Space | 73 |
| Lajos Gergely Gyurkó and Terry J. Lyons | |
| Equivalence of Stochastic Equations and Martingale Problems | 113 |
| Thomas G. Kurtz | |
| Accelerated Numerical Schemes for PDEs and SPDEs | 131 |
| István Gyöngy and Nicolai Krylov | |
| Coarse-Grained Modeling of Multiscale Diffusions: The p-Variation Estimates | 169 |
| Anastasia Papavasiliou | |
| Numerical Solution of the Dirichlet Problem for Linear Parabolic SPDEs Based on Averaging over Characteristics | 191 |
| Vasile N. Stanculescu and Michael V. Tretyakov | |

| | |
|---|------------|
| Individual Path Uniqueness of Solutions of Stochastic Differential Equations | 213 |
| Alexander M. Davie | |
| Stochastic Integrals and SDE Driven by Nonlinear Lévy Noise | 227 |
| Vassili N. Kolokoltsov | |
| Discrete Algorithms for Multivariate Financial Calculus | 243 |
| Radu Tunaru | |
| Credit Risk, Market Sentiment and Randomly-Timed Default | 267 |
| Dorje C. Brody, Lane P. Hughston, and Andrea Macrina | |
| Continuity of Mutual Entropy in the Limiting Signal-To-Noise Ratio Regimes | 281 |
| Mark Kelbert and Yuri Suhov | |
