

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
	Early History of Mathematical Economics	1
	Cournot Oligopoly	2
	Equilibrium and Other Regular Orbits	2
	Multiplicity of Attractors	3
	Strategy Types	5
	Stackelberg Leadership	6
	Stability of Cournot Equilibrium	8
	Exotic Dynamics	9
	Heterogeneous Commodities	11
	The Hotelling Paradox	12
	Agenda	13
	Assumptions	14
	Demand	14
	Cost	15
	References	15
<b>2</b>	<b>Cournot Oligopoly</b>	<b>17</b>
	The Cournot Model	17
	Example 1: Linear Demand	19
	Example 2: Isoelastic Demand	21
	Cournot Equilibria	23
	Example 1: Linear Demand	24
	Example 2: Isoelastic Demand	26
	The Cournot Iterative Map	29
	Formation of Expectations	30
	Observing Chaotic Orbits	30
	Observing Periodic Orbits	31
	Stability	33

	Example 1: Linear Demand	35
	Example 2: Isoelastic Demand	37
	References	41
<b>3</b>	<b>Duopoly and Complex Dynamics</b>	<b>43</b>
	Introduction	43
	The Cournot Model	44
	Cournot Equilibrium	46
	The Iterative Process	46
	Stability of the Cournot Point	49
	Periodic Points and Chaos: Numerical study	50
	Adaptive Expectations	55
	The Neimark Bifurcation	56
	The Bifurcation Diagram	58
	Analysis by Critical Lines	64
	References	66
<b>4</b>	<b>Stackelberg Leadership</b>	<b>69</b>
	Stackelberg and Cournot	69
	Recapitulation of the Cournot Model	71
	Stackelberg Equilibria	73
	How to fit Stackelberg Action in the Cournot Dynamics	76
	The Combined Map	78
	Numerical Study	79
	The Bifurcation Plane	79
	The Phase Plane	82
	Learning Periodicities	86
	Dynamic Stackelberg Leadership	88
	Stackelberg's Demand	88
	Cournot Reaction Functions	89
	Cournot Equilibrium	92
	Traditional Stackelberg Equilibrium	92
	Periodic Leadership	94
	References	99
<b>5</b>	<b>Capacity Limits</b>	<b>101</b>
	Stability and Capacity Limits	101
	The CES Production and Cost Functions	102
	Oligopoly with Capacity Limits	107
	Short Run Reaction Functions	108

	Long Run Reaction Functions	111
	The Cournot Equilibrium	112
	Stability	114
	Stability in the Long Run	114
	Stability in the Short Run	115
	Stability of a Mixed Process	116
	Investment	121
	References	125
<b>6</b>	<b>Multistability</b>	<b>127</b>
	Historical Background	127
	Palander's First Case	129
	Demand and Cost Functions	129
	Reaction Functions	131
	Palander's Second Case	137
	Demand and Cost Functions	137
	Reaction Functions	137
	Instability	139
	Operating Several Plants	140
	The Cost Function	142
	The Reaction Functions	143
	The Cournot Equilibria	145
	Attractors and Basins	147
	References	149
<b>7</b>	<b>The Hotelling Paradox</b>	<b>151</b>
	Spatial Oligopoly	151
	A Firm between Competitors	153
	Optimal Location	156
	Optimal Pricing	157
	Disjoint Monopolies	159
	Two Competitors on a Fixed Interval	161
	Location	161
	Pricing	163
	Two Identical Firms on a Fixed Interval	165
	Cournot Equilibrium	165
	Dynamic Adjustment	168
	References	169

Oligopoly

Old Ends - New Means

Puu, T.

2011, IX, 172 p., Hardcover

ISBN: 978-3-642-15963-3
