## Part I Non-standard Spatial Statistics

<b>1</b>	<b>Introduction: Spatial Statistics</b>	<b>3</b>
<b>2</b>	<b>Individual Versus Ecological Analyses</b>	<b>5</b>
2.1	Introduction	5
2.2	Spatial Autocorrelation Effects	5
2.3	Aggregation Impacts	6
2.3.1	The Syracuse Data	8
2.3.2	Previous Findings for Syracuse	10
2.4	Spatial Autocorrelation in the Syracuse Data	11
2.4.1	Spatial Autocorrelation in the Syracuse Data: LN(BLL + 1) Values	11
2.4.2	Spatial Autocorrelation in the Syracuse Data: Appraised House Value	13
2.5	Spatial Autocorrelation in the Syracuse Data: Other Sources	16
2.6	Bayesian Analysis Using Gibbs Sampling (BUGS) and Model Prediction Experiments	17
2.6.1	Results for the 2000 Census Tracts	20
2.7	Discussion and Implications	22
<b>3</b>	<b>Statistical Models for Spatial Data: Some Linkages and Communalities</b>	<b>25</b>
3.1	Introduction	25
3.2	Background: Quantifying Spatial Autocorrelation	26
3.2.1	The Moran Scatterplot	27
3.2.2	The Semivariogram Plot	28
3.3	Specifications of Spatial Autoregressive and Geostatistical Models	28
3.3.1	Spatial Autoregressive Models	29
3.4	Geostatistical Models	31
3.5	Linkages Between Spatial Autoregression and Geostatistics	32

3.6	A Major Commonality of Spatial Autoregression and Geostatistics . . . . .	33
3.7	Implications for Quantitative Human Geography . . . . .	35
<b>4</b>	<b>Frequency Distributions for Simulated Spatially Autocorrelated Random Variables . . . . .</b>	<b>37</b>
4.1	Introduction . . . . .	37
4.2	The Normal Probability Model . . . . .	38
4.2.1	Simulating Spatially Autocorrelated Normal RVs . . .	39
4.2.2	Simulation Results for an Ideal Regular Hexagonal Surface Partitioning . . . . .	41
4.2.3	Simulation Results for the China County Geographic Configuration . . . . .	45
4.2.4	Implications . . . . .	48
4.3	The Poisson Probability Model . . . . .	50
4.3.1	Simulating Spatially Autocorrelated Poisson RVs . .	52
4.3.2	Simulation Results for an Ideal Regular Hexagonal Surface Partitioning . . . . .	55
4.3.3	Simulation Results for the China County Geographic Configuration . . . . .	56
4.3.4	Implications . . . . .	60
4.4	The Binomial Probability Model, $N > 1$ . . . . .	62
4.4.1	Simulating Spatially Autocorrelated Binomial RVs . .	63
4.4.2	Simulation Results for an Ideal Regular Hexagonal Surface Partitioning . . . . .	65
4.4.3	Simulation Results for the China County Geographic Configuration . . . . .	68
4.4.4	Implications . . . . .	70
4.5	Discussion . . . . .	71
<b>5</b>	<b>Understanding Correlations Among Spatial Processes . . . . .</b>	<b>75</b>
5.1	Introduction . . . . .	75
5.2	Two Illustrative Examples . . . . .	75
5.3	Geostatistical Semivariogram Model Implications . . . . .	77
5.4	Spatial Autoregressive Model Implications . . . . .	82
5.4.1	Variance and Covariance Inflation Attributable to Spatial Autocorrelation . . . . .	85
5.4.2	Effective Sample Size as a Function of $\rho_X$ and $\rho_Y$ . .	87
5.5	Spatial Filtering Model Implications . . . . .	89
5.5.1	Correlation Coefficient Decomposition . . . . .	90
5.5.2	Variance Inflation . . . . .	93
5.6	Discussion . . . . .	93
<b>6</b>	<b>Spatially Structured Random Effects: A Comparison of Three Popular Specifications . . . . .</b>	<b>97</b>
6.1	Introduction . . . . .	97
6.2	Modeling Spatial Structure . . . . .	97

6.3	Linear Mixed Models . . . . .	99
6.4	Generalized Linear Mixed Models . . . . .	105
6.5	Degrees of Freedom for GLMM Random Effects . . . . .	110
6.6	Extensions to Space-Time Data Sets . . . . .	111
6.7	Discussion and Implications . . . . .	114
<b>7</b>	<b>Spatial Filter Versus Conventional Spatial Model</b>	
	<b>Specifications: Some Comparisons . . . . .</b>	<b>117</b>
7.1	Introduction . . . . .	117
7.1.1	Background . . . . .	117
7.2	Variation and Covariation Considerations for Poisson Random Variables . . . . .	120
7.2.1	Heterogeneity in Counts Data . . . . .	121
7.2.2	Spatial Autocorrelation in Poisson Random Variables . . . . .	124
7.2.3	Spatial Autocorrelation-induced Correlation Inflation . . . . .	126
7.3	Principal Spatial Statistical Model Specifications . . . . .	130
7.3.1	The Log-normal Approximation . . . . .	130
7.3.2	A Winsorized Auto-Poisson Model . . . . .	131
7.3.3	A Proper CAR Model Specification via GeoBUGS . . . . .	134
7.4	Spatial Filter Model Specifications . . . . .	136
7.4.1	The Log-normal Approximation Spatial Filter Model . . . . .	136
7.4.2	A Poisson Spatial Filter Model . . . . .	137
7.4.3	A Spatial Filter Model Specification via BUGS . . . . .	139
7.5	Discussion . . . . .	140
7.5.1	Cross-validation Results for the Poisson Spatial Filter Model . . . . .	141
7.5.2	A Simulation Experiment Based Upon the Poisson Spatial Filter Model . . . . .	141
7.5.3	Impacts of Incorporating Additional Information . . . . .	143
7.5.4	Implications for Data Mapping . . . . .	144
7.6	Concluding Comments . . . . .	147
<b>8</b>	<b>The Role of Spatial Autocorrelation in Prioritizing Sites Within a Geographic Landscape . . . . .</b>	<b>151</b>
8.1	Introduction: The Problem . . . . .	151
8.2	The Murray Superfund Site: Part I . . . . .	152
8.2.1	State-of-the-Art Practice . . . . .	153
8.2.2	A Spatial Methodology: Stage 1, Spatial Sampling Data Collection and Preprocessing . . . . .	154
8.3	The Murray Superfund Site: Part II . . . . .	156
8.3.1	A Spatial Methodology: Stage 2, Spatial Statistics for Calculating UCLs . . . . .	159
8.4	The Murray Superfund Site: Part III . . . . .	161
8.4.1	A Spatial Methodology: Stage 3, Prioritizing Subregions for Remediation . . . . .	163
8.5	The Murray Superfund Site: Part IV . . . . .	163

8.5.1	A Spatial Methodology: Stage 4, Covariation of Contaminants and Joint Pollutant Analyses . . . . .	164
8.6	The Murray Superfund Site: Part V . . . . .	168
8.7	Implications . . . . .	170
<b>9</b>	<b>General Conclusions: Spatial Statistics . . . . .</b>	<b>171</b>
 <b>Part II Non-standard Spatial Econometrics</b>		
<b>10</b>	<b>Introduction: Spatial Econometrics . . . . .</b>	<b>177</b>
<b>11</b>	<b>A Mixed Linear-Logarithmic Specification for Lotka-Volterra Models with Endogenously Generated SDLS-Variables . . . . .</b>	<b>179</b>
11.1	Lotka-Volterra Models . . . . .	179
11.1.1	A General Specification . . . . .	179
11.1.2	Applications . . . . .	180
11.1.3	Simultaneous Dynamic Least Squares (SDLS) Estimation . . . . .	181
11.2	Mixed Specification . . . . .	182
11.2.1	Equations . . . . .	182
11.2.2	Stability . . . . .	183
11.3	Application . . . . .	183
11.4	Conclusion . . . . .	186
<b>12</b>	<b>Selecting Spatial Regimes by Threshold Analysis . . . . .</b>	<b>189</b>
12.1	Method . . . . .	189
12.2	Spatial Income Generating Model . . . . .	190
12.3	A Spatial Activity Complex Model . . . . .	193
12.4	Conclusion . . . . .	197
12.5	Appendix . . . . .	197
<b>13</b>	<b>Finite Automata . . . . .</b>	<b>199</b>
13.1	A Finite Automaton Bi-regional Dynamic Model . . . . .	199
13.2	An Empirical Application . . . . .	203
13.3	Conclusion . . . . .	205
<b>14</b>	<b>Learning from Residuals . . . . .</b>	<b>207</b>
14.1	Residuals . . . . .	207
14.2	Multiple Regimes . . . . .	209
14.3	Spatial Interpolation . . . . .	212
14.4	Composite Parameters . . . . .	213
14.5	Conclusion . . . . .	215
<b>15</b>	<b>Verhulst and Poisson Distributions . . . . .</b>	<b>217</b>
15.1	Robust Estimation in the Binary Case: A Linear Logistic Estimator (LLE) . . . . .	217
15.2	A Logistic Dynamic Share Model . . . . .	219

15.3	A Linear Poisson Distribution Estimator . . . . .	221
15.4	Conclusion . . . . .	225
<b>16</b>	<b>Qualireg, A Qualitative Regression Method . . . . .</b>	<b>227</b>
16.1	Qualiflex . . . . .	227
16.2	Qualireg . . . . .	230
16.3	Spatial Setting . . . . .	231
16.4	Conclusion . . . . .	233
<b>17</b>	<b>Filtering Complexity for Observational Errors and Spatial Bias . . . . .</b>	<b>235</b>
17.1	Complexity, Estimation and Testing . . . . .	235
17.2	Filtering for Observational Errors . . . . .	237
17.3	Further Filtering for Spatial Bias . . . . .	240
17.4	Conclusions . . . . .	241
<b>18</b>	<b>General Spatial Econometric Conclusions . . . . .</b>	<b>243</b>
	<b>Epilogue . . . . .</b>	<b>245</b>
	<b>References . . . . .</b>	<b>247</b>
	<b>Author Index . . . . .</b>	<b>257</b>
	<b>Subject Index . . . . .</b>	<b>259</b>

Non-standard Spatial Statistics and Spatial  
Econometrics

Griffith, D.A.; Paelinck, J.H.P.

2011, XXXVI, 264 p., Hardcover

ISBN: 978-3-642-16042-4
