

Contents

1	Background	1
1.1	Innate Immunity, Toll-Like Receptors and Danger Signals	1
1.2	The Ovary, Tissue Remodeling and Immune Privilege	4
1.3	Design	6
2	Materials and Methods	7
2.1	Cyclic and Superovulated Ovaries from Rats, Hamsters, and Rabbits as well as Canine, Bovine and Human Ovaries	7
2.1.1	Fibrinolytic Activity and Implants on the Chicken Chorioallantoic Membrane	9
2.1.2	Fixation, Staining and Counting Ovarian Structures	11
2.2	Cell Culture Subtypes from Follicles Derived from Patients Under IVF Therapy	11
2.3	Cell Culture Subtypes from Bovine CL and Characterization	14
3	Footmarks of INIM	17
3.1	The Complement System as Danger Sensor in General and in the Ovary	17
3.2	Mild Danger with Mild Response	19
3.2.1	Implantation of the Ovary into the CAM	19
3.2.2	Follicular Atresia	19
3.3	Moderate Danger by Preovulatory Follicle Rupture and Acute Inflammation with Eosinophils	21
3.3.1	Recruitment of Eosinophils and SP-Like Expression	26
3.4	Severe Danger in Superovulated Ovaries with Intra-Ovarian Oocyte Release (IOR) and Thrombus Formation	30
4	Cytokeratin-Positive Cells (CK⁺) as Potential Dendritic Cells	35
4.1	Dendritic Cells, the TLR System in General and in the Ovary	35
4.2	Localization of CK ⁺ Cells in the Intact Ovary	38
4.2.1	Follicles in Fetal and Adult Ovaries	39
4.2.2	Corpus Luteum	42
5	Characterization of Isolated CK⁺ Cells	45
5.1	CK ⁺ Cells from Preovulatory Follicles with TLR4 Expression	45
5.2	CK ⁺ Cells from CL in Comparison with CK ⁻ Cells	53
5.2.1	Effects of IFN- γ on CK ⁺ Cells from the CL Compared to CK ⁻ Cells and to Surface Epithelial Cells	62
5.2.2	Reflections on Quality of the CK ⁺ Type 1 and Similarity with the Type 5	66

6	Working Hypothesis and Challenges	77
7	Clinical Perspectives	83
8	Concluding Summary and Remarks	87
	References	89
	Index	101

Footmarks of Innate Immunity in the Ovary and
Cytokeratin-Positive Cells as Potential Dendritic Cells

Spaniel-Borowski, K.

2011, XV, 110 p. 33 illus., 22 illus. in color., Softcover

ISBN: 978-3-642-16076-9
