

# Contents

<b>1</b>	<b>Getting Started</b>	1
1.1	Installation: R, L <sup>A</sup> T <sub>E</sub> X, and Emacs	1
1.2	How to read this book	2
1.3	Some Simple Commands in R	2
1.4	Graphical Summaries	6
<b>2</b>	<b>Randomness and Probability</b>	9
2.1	Elementary Probability Theory	9
2.1.1	The Sum and Product Rules	9
2.1.2	Stones and Rain: A Variant on the Coin-toss Problem	11
2.2	The Binomial Distribution	19
2.3	Balls in a Box	22
2.4	Standard Deviation and Sample Size	33
2.4.1	Another Insight: Mean Minimizes Variance	36
2.5	The Binomial versus the Normal Distribution	39
	Problems	41
<b>3</b>	<b>The Sampling Distribution of the Sample Mean</b>	43
3.1	The Central Limit Theorem	47
3.2	$\sigma$ and $\sigma_{\bar{x}}$	49
3.3	The 95% Confidence Interval for the Sample Mean	50
3.4	Realistic Statistical Inference	52
3.5	$s$ is an Unbiased Estimator of $\sigma$	52
3.6	The t-distribution	55
3.7	The One-sample t-test	56
3.8	Some Observations on Confidence Intervals	57
3.9	Sample SD, Degrees of Freedom, Unbiased Estimators	61
3.10	Summary of the Sampling Process	63
3.11	Significance Tests	64
3.12	The Null Hypothesis	65
3.13	z-scores	66

3.14	P-values	67
3.15	Hypothesis Testing: A More Realistic Scenario	71
3.16	Comparing Two Samples	75
3.16.1	$H_0$ in Two-sample Problems	76
	Problems	79
<b>4</b>	<b>Power</b>	81
4.1	Hypothesis Testing Revisited	81
4.2	Type I and Type II Errors	82
4.3	Equivalence Testing	91
4.3.1	Equivalence Testing Example	91
4.3.2	TOST Approach to the Stegner et al. Example	92
4.3.3	Equivalence Testing Example: CIs Approach	94
4.4	Observed Power and Null Results	94
	Problems	96
<b>5</b>	<b>Analysis of Variance (ANOVA)</b>	97
5.1	Comparing Three Populations	97
5.2	ANOVA	99
5.2.1	Statistical Models	100
5.2.2	Variance of Sample Means as a Possible Statistic	103
5.2.3	Analyzing the Variance	105
5.3	Hypothesis Testing	111
5.3.1	MS-within, MS-between as Statistics	112
5.3.2	The F-distribution	113
5.3.3	ANOVA in R	118
5.3.4	MS-within, Three Non-identical Populations	118
5.3.5	The F-distribution with Unequal Variances	120
5.4	ANOVA as a Linear Model	121
	Problems	125
<b>6</b>	<b>Bivariate Statistics and Linear Models</b>	127
6.1	Variance and Hypothesis Testing for Regression	137
6.1.1	Sum of Squares and Correlation	142
	Problems	142
<b>7</b>	<b>An Introduction to Linear Mixed Models</b>	145
7.1	Introduction	145
7.2	Simple Linear Model	146
7.3	The Levels of the Complex Linear Model	155
7.4	Further Reading	159

<b>A</b>	<b>Random Variables</b> .....	161
A.1	The Probability Distribution in Statistical Inference .....	162
A.2	Expectation .....	162
A.3	Properties of Expectation .....	164
A.4	Variance .....	165
A.5	Important Properties of Variance .....	165
A.6	Mean and SD of the Binomial Distribution .....	166
A.7	Sample versus Population Means and Variances .....	167
A.8	Summing up .....	168
	Problems .....	169
<b>B</b>	<b>Basic R Commands and Data Structures</b> .....	171
	<b>References</b> .....	175
	<b>Index</b> .....	177

The Foundations of Statistics: A Simulation-based  
Approach

Vasishth, S.; Broe, M.

2011, XV, 178 p., Hardcover

ISBN: 978-3-642-16312-8
