

Contents

1	Introduction	1
1.1	Aerosols	1
1.1.1	Atmospheric Aerosols	1
1.1.2	Effects of Aerosols on the Atmosphere	2
1.1.3	Current Challenges in Atmospheric Aerosol Science	4
1.2	Previous Aerosol Measurements	8
1.2.1	Bulk Techniques	9
1.2.2	Particle-Phase Techniques	10
1.3	Optical Tweezers	13
1.3.1	Aerosol Optical Tweezing	14
1.3.2	Optical Forces	16
1.4	Project Aims	17
1.5	Thesis Summary	18
	References	19
2	Aerosol Mass Transfer	25
2.1	Thermodynamic Equilibrium Droplet Size	25
2.1.1	Deliquescence and Efflorescence	25
2.1.2	Variation of Droplet Size with Relative Humidity above the DRH.	27
2.2	Kinetics of Aerosol Mass Transfer	31
2.2.1	Uptake by a Liquid Aerosol Droplet	31
2.2.2	Consideration of the Rate Determining Step	38
2.2.3	Atmospheric Importance of α	39
2.2.4	Importance in Other Fields	43
2.2.5	Evaporation from an Aerosol Droplet	43
2.2.6	Previous Experimental Studies	44
2.2.7	Field Studies	48
2.2.8	Theoretical Work	48
2.3	Summary	49
	References	49

3	Experimental Techniques	53
3.1	Trapping Light Source and Optical Components	53
3.2	Additional Illumination	58
3.3	Trapping Chambers	59
3.3.1	Side-Imaging Chamber	60
3.3.2	Low Pressure Chamber	61
3.4	Aerosol Delivery and Solution Preparation	63
3.5	Spectroscopy	64
3.5.1	Spectrograph	64
3.5.2	CCD	65
3.5.3	Acquisition and Processing of Spectra	66
3.6	Particle Sizing I: Theoretical Aspects	66
3.6.1	Raman Scattering	66
3.6.2	Stimulated Raman Scattering	68
3.6.3	Mie Scattering Theory	69
3.6.4	Whispering Gallery Modes	71
3.7	Particle Sizing II: Practical Aspects	74
3.7.1	Treatment of Refractive Index	75
3.7.2	Sizing Procedure	77
	References	78
4	Optical Manipulation in Aerosol Optical Tweezers	81
4.1	Theory of Optical Forces	81
4.1.1	Refractive Index Steps in Optical Tweezers	82
4.1.2	Theoretical Models of Forces in Optical Tweezers	82
4.2	Summary of Studies	84
4.3	Experimental Considerations	84
4.3.1	Optical Trapping	84
4.3.2	Imaging	85
4.3.3	Spectroscopy	86
4.4	Studies of Axial Displacement	86
4.4.1	Variation of Droplet Position with Droplet Size and Laser Power	87
4.4.2	Dependence of In-Plane Images on Droplet Height	92
4.4.3	A New Method for Sizing Optically-Tweezed Aerosol Droplets	93
4.5	Studies of Trapping Phenomena	94
4.5.1	Aerosol Coagulation	95
4.5.2	Multiple Stable Trapping Positions	96
4.5.3	Optical Binding	101
4.6	Summary	107
	References	107

5 Spectroscopy of Optically-Tweezed Aerosol Droplets Containing Fluorescent Chromophores	111
5.1 Introduction	111
5.1.1 Relevant Theory	112
5.2 Experimental Considerations	117
5.3 Results and Discussion	118
5.3.1 Rapid Droplet Heating	118
5.3.2 Observation of Cavity-Enhanced Fluorescence	119
5.3.3 Observation of Four-wave Mixing	121
5.3.4 Consequences of Extended Resonant Structure	124
5.3.5 Quantum Dot Fluorescence	131
5.4 Summary	131
References	132
6 Ultra-Sensitive Absorption Spectroscopy of Optically-Tweezed Aerosol Droplets	135
6.1 Previous Studies	136
6.2 Light Extinction by Particles	138
6.3 The Steady State Temperature of Optically-Tweezed Droplets	140
6.4 Experimental Determination of ΔT	142
6.4.1 Vapour Pressure Change as a Result of Solute Concentration	145
6.4.2 Vapour Pressure Change as a Result of Temperature Elevation	147
6.5 Theoretical Determination of ΔT	148
6.6 Results and Discussion	150
6.6.1 Effect of Organics on Aerosol Absorption	154
6.7 Further Development	155
6.7.1 Use of Varying Illumination Wavelength	155
6.7.2 Effect of Droplet Composition	157
6.7.3 Application to Kinetics of Mass Transfer	158
6.8 Summary	158
References	158
7 Kinetics of Aerosol Mass Transfer	161
7.1 Overview of the Technique	161
7.2 Advantages of Working at Reduced Pressure	163
7.3 Modelling the Mass Transfer	164
7.4 Experimental Considerations	169
7.4.1 Trapping Power Change	170
7.4.2 Control of Pressure	172
7.4.3 Spectroscopy	173

7.5	Preliminary Results and Discussion	173
7.5.1	Studies of Aqueous Surfaces	174
7.5.2	Comparative Studies of Aqueous and Surfactant-Rich Surfaces	180
7.6	Factors Affecting the Measurements	185
7.6.1	Surface Composition	186
7.6.2	Temperature and Heat Transfer Considerations.	186
7.7	Future Experimental Development.	188
7.7.1	Means of Changing Droplet Size	188
7.7.2	Spectroscopy	188
7.7.3	Increase Kn using Smaller Droplets	189
7.7.4	Pressure Monitoring	189
7.7.5	Reactive Studies	189
7.7.6	Simultaneously Probing Surface Composition.	189
7.8	Summary	190
	References	190
8	Summary, Conclusions and Future Directions.	193
8.1	Summary of Findings.	193
8.2	Conclusions	195
8.3	Future Directions.	196
8.3.1	Controlling the Gas-Phase Environment.	196
8.3.2	Studying Accumulation Mode Particles	196
8.3.3	Making Use of Optical Landscapes.	197
8.4	Final Remarks.	198
	References	198
	Appendices	199

Light-Induced Processes in Optically-Tweezed Aerosol
Droplets

Knox, K.J.

2011, XII, 204 p., Hardcover

ISBN: 978-3-642-16347-0
