<b>1</b>	<b>Introduction: Influences of Human Population on Biological Diversity</b>	<b>1</b>
	Richard P. Cincotta and L.J. Gorenflo	
1.1	Introduction	1
1.2	Objectives	2
1.3	Status of the Field	2
1.4	Organization and Content	3
1.5	Studying Human Population’s Interactions with Biological Diversity	7
	References	8
 <b>Part I General Theoretical and Empirical Considerations</b>		
<b>2</b>	<b>Projecting a Gridded Population of the World Using Ratio Methods of Trend Extrapolation</b>	<b>13</b>
	Lee Hachadoorian, Stuart R. Gaffin, and Robert Engelman	
2.1	Introduction	13
2.2	Recent Population Density Maps and Prior Projections Using Simple Methods	13
2.3	Methods	16
2.4	Results	17
2.4.1	Comparison of the Simple Projections with US Census Bureau State Projections	18
2.4.2	Problems of the Shift-Share Method	20
2.4.3	Problems of the Share-of-Growth Method	20
2.4.4	Combined Model Gridded Projection	21
2.5	Conclusions	23
	References	24

<b>3 The Human Habitat</b>	27
Christopher Small	
3.1 Introduction	27
3.2 Theories of Population Distribution	30
3.3 Spatial Distribution of Modern Human Population	32
3.3.1 Census Data	32
3.3.2 Night Lights	35
3.4 Continental Physiography	36
3.5 Climate	38
3.6 Implications	40
References	44
<b>4 Behavioral Mediators of the Human Population Effect on Global Biodiversity Losses</b>	47
Jeffrey K. McKee and Erica N. Chambers	
4.1 Introduction	47
4.2 Past Human Population Impacts on Species Biodiversity	48
4.3 Biodiversity and Human Population Density Today	49
4.4 Discussion	54
4.5 Conclusion	57
References	58
<b>5 The Biological Diversity that Is Humanly Possible: Three Models Relevant to Human Population's Relationship with Native Species</b>	61
Richard P. Cincotta	
5.1 Introduction	61
5.2 Can Human Numbers by Themselves Increase the Risk of Species Loss?	62
5.2.1 Allometric Relationships	62
5.2.2 Allometric Expectations of Population Density	62
5.3 Can Local Changes in Human Population Density Increase the Risk of Species Loss?	64
5.3.1 Density-Dependent Agricultural Intensification	64
5.3.2 A Graphic Model of Density-Dependent Intensification	66
5.3.3 Model Expectations	67
5.4 Can the Location of Human Settlement Increase the Risk of Species Loss?	69
5.4.1 Modeling the Persistence of Native Species	69
5.4.2 Species Persistence and the Influence of Human Settlement	70
5.5 Conclusions	71
References	72

<b>6 Biodiversity on the Urban Landscape</b>	75
Katalin Szlavecz, Paige Warren, and Steward Pickett	
6.1 Introduction	75
6.2 Some Key Characteristics of Urban Ecosystems	76
6.3 Why Study Urban Biodiversity?	78
6.3.1 Values of Biodiversity	78
6.3.2 Roles of Exotic Species	79
6.3.3 Contribution of Urban Studies to General Scientific Inquiry	80
6.3.4 Urban Ecosystems and Biodiversity Education	81
6.4 Research Approaches to Urban Biodiversity	83
6.4.1 Urban–Rural Gradients	84
6.4.2 Island Biogeography in Cities	85
6.4.3 Patch Dynamics	86
6.4.4 The Species Approach: Exotics and Introductions	87
6.4.5 Human–Natural Coupling in Urban Systems	88
6.4.6 Ecosystem Function	89
6.4.7 Overcoming Logistic Problems	90
6.5 Questions and Research Directions on Urban Biodiversity	91
6.6 Conclusions	94
References	95
 <b>7 Indicators for Assessing Threats to Freshwater Biodiversity from Humans and Human-Shaped Landscapes</b>	103
Robin Abell, Michele Thieme, and Bernhard Lehner	
7.1 Introduction	103
7.2 Threats to Freshwater Biodiversity	104
7.3 Direct and Indirect Evaluations of Threats to Aquatic Biodiversity	107
7.4 Large-Scale Threat Analyses	109
7.4.1 Global-Scale Analyses	109
7.4.2 Continental-Scale Analyses	114
7.4.3 River-Basin Threat Analyses	116
7.5 Conclusions	119
References	120

## Part II Interactions in Specific Ecosystems

<b>8 A Cross-Cultural Analysis of Human Impacts on the Rainforest Environment in Ecuador</b>	127
Flora Lu and Richard E. Bilborrow	
8.1 Introduction	127
8.2 The Ecuador Research Project	128
8.3 Cultural Diversity in Ecuador's Amazon	132
8.3.1 Ethnographic Sketches	133

8.3.2 Demography .....	134
8.4 Cross-Cultural Hunting Patterns .....	139
8.4.1 Prey Selection .....	141
8.4.2 Technology Used .....	142
8.4.3 Time Allocation .....	142
8.4.4 Dietary Intake .....	142
8.4.5 Frequency, Distance, and Duration of Hunts .....	143
8.5 Cross-Cultural Patterns of Land Use and Land Cover Change ....	143
8.6 Discussion .....	145
8.7 Conclusions .....	147
References .....	149
<b>9 Human Demography and Conservation in the Apache Highlands Ecoregion, US–Mexico Borderlands .....</b>	<b>153</b>
L.J. Gorenflo .....	
9.1 Introduction .....	153
9.2 An Overview of Human Occupation in the Apache Highlands ....	154
9.3 Population in the Apache Highlands Ecoregion at the End of the Twentieth Century .....	158
9.4 Conservation and Human Demography in the Apache Highlands Ecoregion .....	166
9.5 Concluding Remarks .....	173
References .....	176
<b>10 Long-Term Ecological Effects of Demographic and Socioeconomic Factors in Wolong Nature Reserve (China) .....</b>	<b>179</b>
Li An, Marc Linderman, Guangming He, Zhiyun Ouyang, and Jianguo Liu .....	
10.1 Introduction .....	179
10.2 Profile of Wolong Nature Reserve .....	180
10.3 Long-Term Ecological Effects of Demographic and Socioeconomic Factors .....	184
10.3.1 Design of Simulation Experiments .....	185
10.3.2 Model Description .....	187
10.3.3 Simulation Results .....	189
10.4 Discussion .....	192
References .....	194
<b>11 Exploring the Association Between People and Deforestation in Madagascar .....</b>	<b>197</b>
L.J. Gorenflo, Catherine Corson, Kenneth M. Chomitz, Grady Harper, Miroslav Honzák, and Berk Özler .....	
11.1 Introduction .....	197
11.2 Madagascar: Selected Characteristics of the Physical and Human Setting .....	198

11.3 Recent Patterns of Deforestation in Madagascar .....	202
11.4 Analyzing Patterns of Deforestation in Madagascar .....	205
11.4.1 Previous Evaluations of Deforestation in Madagascar ...	205
11.4.2 Methods and Data .....	207
11.4.3 Results .....	209
11.5 Discussion and Conclusions .....	215
References .....	218
 <b>Part III Perspectives on Human Interactions with Biological Diversity</b>	
<b>12 A Coupled Natural and Human Systems Approach Toward Biodiversity: Reflections from Social Scientists .....</b>	<b>225</b>
Thomas W. Crawford and Deirdre Mageean	
12.1 Introduction .....	225
12.2 Human Dimensions of Biodiversity as a Grand Challenge .....	227
12.3 Meta-Analysis Results .....	228
12.4 Connections with Land Change Science .....	231
12.5 Neglected Human Dimensions? .....	235
12.6 Conclusion .....	235
References .....	237
