

Contents

1 Floating Skeleton Concept	1
1.1 Borelli's Biomechanics and Its Limitations	1
1.2 Loads and Pressures Applied to Joint Heads	2
1.2.1 Pressure in Statics	4
1.2.2 Pressures in Dynamics	4
1.3 New Hypothetical Protective Structure	8
1.4 Floating Skeleton Concept	9
1.4.1 Arguments Supporting the Floating Skeleton Concept	10
1.4.2 Floating Versus Hydraulic	11
1.4.3 Archimedes Force Decreases Pressure on Joint Cartilages	12
1.4.4 Effect of Surface Tension and Capillarity	14
1.4.5 Tension in the Walls of a Flexible Tube Filled with Water	14
1.4.6 Tendon–Bone Connection	16
1.4.7 What If the Hydraulic Connection Is Broken?	17
1.5 Future Verification or the Gap Junction Scenario	18
1.6 A Common Basis for Therapeutic Procedures	20
1.7 First Experimental Evidence of the Hydraulic Connection Between Joints	21
References	22
2 Sanomechanics	25
2.1 Sanomechanical Approach to Exercises	25
2.2 Conceptual Autosuggestion	25
2.2.1 Biomechanics of Visualization and Anticipation	25
2.2.2 Autosuggestion	28
2.3 Criterion of Correctness of the Exercise	29
2.3.1 Level of Sensation	29
2.3.2 Pleasure Signal from Joints and from Muscles	31
2.3.3 Duration of Keeping a Position	32
2.4 Technique of Exercising	32
2.4.1 Cycles of Changing the Joint Angle	34
2.4.2 Example of a Sanomechanical Exercise	34
2.5 Conclusion	35
References	36
3 Biomechanics for Life	37
3.1 Art of Standing, Sitting, and Walking	37
3.1.1 Challenge for Sciatic Nerves	37
3.1.2 Ancient Standing Style	39

3.2 How Do We Stand?.....	41
3.2.1 Biomechanical Comparison of Free Two-Legged Standing, Standing “at Attention,” and Standing “at Ease”.....	43
3.3 How Do We Sit?	46
3.4 How Do We Walk?.....	53
3.4.1 Indian Gait and Ballet Gait	54
3.4.2 Comparative Gait Study.....	55
3.4.3 How Do We Walk? Conclusions	57
3.5 We Do Not Need a Special Time to Do Sanomechanical Exercises.....	58
3.5.1 Computers	58
3.5.2 Car	59
3.5.3 Shopping	60
3.5.4 Museum.....	60
3.6 Conclusion	62
Reference	62
4 Sanomechanics™ Exercises.....	63
4.1 Introduction Regarding Safety.....	63
4.2 Make Your Morning.....	63
4.3 Why Are My Joints Stiffer After I Sleep?	64
4.4 The Difference Between Exercising on a Yielding and a Firm Surface	64
4.5 Sanomechanical In-Bed Series	66
4.5.1 Hand and Foot Poses	66
4.5.2 Toe and Foot Poses.....	70
4.5.3 Knee and Hip Closed Poses	70
4.5.4 Spine and Pelvis Poses	70
4.5.5 Knee, Hip, and Pelvis Open Poses	76
4.6 Sanomechanical Day Series.....	76
4.6.1 Knee, Hip, and Pelvis Open Pose – 2.....	76
4.6.2 Hip, Knee Rotation, Subtalar Pose.....	78
4.6.3 Twisting Parallel Legs in Hip Joints	79
4.6.4 Spine and Pelvis Poses – 2	80
4.6.5 Foot, Ankle, and Toe Pose	83
4.6.6 Knee and Ankle Standing Pose.....	83
4.6.7 A Pose for Extension in Shoulder Joints and for Twisting the Torso	86
4.6.8 Neck Bending.....	88
4.6.9 Twisting Torso in Sitting Position.....	88
4.6.10 Roll on the Back.....	88
4.6.11 Completion of the Series.....	91
4.7 Conclusion	92
References.....	92
5 About Forces and Moments in Locomotion	93
5.1 Biomechanical Investigations of Gait.....	93
5.2 Modeling the Human Body for Motion Analysis and Related Equipment.....	97
5.3 Architecture of Computerized Gait Analysis.....	98
5.4 Ballistic Synergy in Normal Gait.....	100
5.4.1 Generation of the Propulsive “Push-off”	101
5.4.2 Regular and Intentional Push-off.....	102
5.4.3 Computer Simulation of Regular and Intentional Gait	105
5.4.4 Simulation of Intentional Propulsion	107
5.4.5 “Angle-Moment” Dependency in Ankle During Normal Gait	107

5.4.6 Contribution of Knee to Ballistic Synergy.....	109
5.4.7 Generation of Propulsion in Norm and Consequences of Disruption of Ballistic Synergy in Gait.....	110
5.5 Resonance and Anti-resonance.....	112
5.5.1 Concept of Resonance in Biomechanics of Human Locomotion	113
5.5.2 Resonance in Running.....	114
5.5.3 When Resonance is Unwanted.....	115
5.5.4 Spectral Optimization in Biomechanics of Locomotion.....	116
5.6 Conclusion	118
References.....	118
6 Sanomechanics for Respiration	123
6.1 Nasal Polyps.....	123
6.2 Pathway of Air	124
6.3 Sanomechanics for Breathing	126
6.4 Conclusion	128

Biomechanics for Life

Introduction to Sanomechanics

Pitkin, M.R.

2011, XV, 132 p., Hardcover

ISBN: 978-3-642-17176-5
