

Contents

1 The First Task of the Philosophy of Nature—The Problem of Elementarity	1
Biographical Notes	4
Appendix: How Critical Thought Transformed the Ancient Picture of the World	4
2 The Philosophical Myth of Creation—The Platonic Philosophy of Nature	7
1 Ideas and Their Shadows	7
2 Becoming and Being	9
3 The Prototype of the Concept of Space	10
4 Time: The Moving Image of Eternity	11
5 Symmetries	12
6 The Achievements of the Platonic Philosophy of Nature	13
Biographical Notes	14
Appendix: Platonism’s “Ideas” in the History of Western Philosophy	14
3 Aristotle’s <i>Physics</i>	17
1 Introduction: From the World of Ideas to Individual Objects	17
2 The Ontological Point of View	18
3 The Point of View of Physics	20
4 A Philosophy of Change	22
5 The Theory of Hylomorphism	23
6 The Principles of Aristotle’s Dynamics	24
7 The Significance of Aristotle’s Physics	26
Biographical Notes	27
Appendix: Aristotelianism and Platonism—The Rivalry of Systems	28
4 Aristotle’s Method of Cosmological Speculation	31
Appendix: Ancient Ideas About the Structure of the Universe	35
5 Descartes’ Mechanism	37
1 The Road to the Empirical Method	37
2 The Geometrical Mechanics of Descartes	38

3 The Geometrical Mechanism of Descartes	39
4 In the Context of System	41
Biographical Notes	41
Appendix: The Philosophy of Nature from the Middle Ages to Modern Times	43
6 Isaac Newton and the Mathematical Principles of Natural Philosophy	47
1 Introduction: Towards a New Method	47
2 Newton's Introduction to the <i>Principia</i>	49
3 Rules of Reasoning in Philosophy	53
4 The Scholium	55
Biographical Notes	58
Appendix: The Mechanistic Image of the World in Newton's <i>Principia</i>	59
7 The World of Leibniz: The Best of All Possible Worlds	61
1 Leibniz and Descartes: A Contrast	61
2 The Logic of God and the Logic of the World	62
3 The World of Substances	63
4 Teleology of the World	65
5 From Metaphysical Dynamics to Physical Dynamics	66
6 The Relational Theory of Space and Time	68
Biographical Notes	70
Appendix: The Leibniz-Clarke Debate	70
8 Immanuel Kant: The A Priori Conditions of the Sciences	73
1 The Fundamental Question: How Are the Sciences Possible?	73
2 Synthetic A Priori Judgments	74
3 How Is Pure Mathematics Possible? The Categories of Space and Time	75
4 How Is a Pure Science of Nature Possible?	78
5 The Boundaries of Philosophy	79
6 A Critique of the Kantian Critique	80
Biographical Notes	83
Appendix: The Kant-Laplace Cosmological Hypothesis	83
9 The Romantic Philosophy of Nature	85
1 Introduction: From Mysticism to Idealism	85
2 The Mysticism of Being	86
3 Fichte: The Romantic Theory of Science	88
4 Schelling's Speculative Physics	89
5 A Philosophical Science of Nature	90
6 The Debate About Hegel	92
7 Evaluation and Conclusions	95
Biographical Notes	97
Appendix: Romanticism in Poland—Between Philosophy and Literature	98

10	The Cosmology of Whitehead: The Universe as Process	101
1	Sources of the Great System	101
2	Speculative Philosophy and the Empirical Sciences	102
3	The Conception of Nature	104
4	The Theory of the Bifurcation of Nature and Its Critique	105
5	Space and Time	107
6	The Metaphysics of Process	108
7	Some Remarks in Conclusion	110
	Biographical Notes	111
	Appendix: Process Philosophy and Its Continuation in Modern Thought	111
11	Popper's Open Universe	113
1	The General Outline of Popper's Thought	113
2	Popper's Intellectual Morality	114
3	Antiessentialism and the Defense of Philosophy	117
4	Popper's Three Worlds	118
5	Popper's Philosophical and Cosmological Indeterminism	119
6	The Metaphysics of Probabilities	122
7	The Strategy of Evolution	123
8	Concluding Remarks	124
	Biographical Notes	125
	Appendix: The Influence of Popper's Thought on Contemporary Philosophy of Science	125
12	Science as Philosophy	129
1	From Science to Philosophy	129
2	Mechanism and Its Fall	130
3	Philosophical Problems of the Theory of Relativity	133
4	Philosophical Problems of Quantum Mechanics	141
5	The Philosophical Problems of the Unification of Physics	144
	Biographical Notes	147
	Appendix: The Dream of Unity—A Sketch of the Philosophy of Science of Albert Einstein	148
13	Problems and Methods of the Philosophy of Nature	153
1	The Growth of Criticism	153
2	The Existence of the Philosophy of Nature	155
3	The Rationality of the World	158
4	The Debate About Substance	162
5	Other Problems of the Philosophy of Nature	164
	Biographical Notes	165
	Appendix: Various Conceptions of the Philosophy of Nature	166
