

Contents

1	Random Set Theory	1
1.1	Algebra and σ -Algebra	1
1.2	Measurable Set and Measure Space	4
1.3	Outer Measures	8
1.4	Probability Space	12
1.5	Product Probability Space	14
1.6	Conditional Probability and Independence	15
1.7	Random Variable	16
1.8	Random Vector	17
1.9	Probability Distribution	18
1.10	Central Limit Theorem	19
1.11	Monte Carlo Simulation	25
2	Random Multiple Objective Decision Making	35
2.1	Distribution Center Location Problem with Random Phenomena	35
2.2	Two Kinds of Random Variables	38
2.2.1	Discrete Random Variable	38
2.2.2	Continuous Random Variable	41
2.3	Random EVM	45
2.3.1	General Model for Random EVM	45
2.3.2	Linear Random EVM and the Weight Sum Method	49
2.3.3	Nonlinear Random EVM and Random Simulation-Based SA	52
2.3.4	Numerical Examples	58
2.4	Random CCM	61
2.4.1	General Model for Random CCM	61
2.4.2	Linear Random CCM and the Lexicographic Method	63
2.4.3	Nonlinear Random CCM and Random Simulation-Based ASA	70
2.4.4	Numerical Examples	75
2.5	Random DCM	78
2.5.1	General Model for Random DCM	79

2.5.2	Linear Random DCM and the Fuzzy Programming Method	80
2.5.3	Nonlinear Random DCM and Random Simulation-Based PSA	85
2.5.4	Numerical Examples.....	89
2.6	Application to Chinese Fruit Beverage	92
2.6.1	Background Statement.....	92
2.6.2	Notations	93
2.6.3	Modelling and Analysis	93
3	Bi-Random Multiple Objective Decision Making.....	101
3.1	Flow Shop Scheduling Problem with Ra-Ra Phenomena	102
3.2	Ra-Ra Variable	103
3.2.1	Discrete Ra-Ra Variable	104
3.2.2	Continuous Ra-Ra Variable	109
3.3	Ra-Ra EVM	113
3.3.1	General Model for Ra-Ra EVM.....	114
3.3.2	Linear Ra-Ra EVM and the Step Method	126
3.3.3	Nonlinear Ra-Ra EVM and Ra-Ra Simulation-Based PSO	132
3.3.4	Numerical Examples.....	141
3.4	Ra-Ra CCM	144
3.4.1	General Model for Ra-Ra CCM.....	145
3.4.2	Linear Ra-Ra CCM and the Surrogate Worth Trade-Off Method	150
3.4.3	Nonlinear Ra-Ra CCM and Ra-Ra Simulation-Based APSO	157
3.4.4	Numerical Examples.....	161
3.5	Ra-Ra DCM	164
3.5.1	General Model for Ra-Ra DCM	165
3.5.2	Linear Ra-Ra DCM and the Satisfying Trade-Off Method	166
3.5.3	Nonlinear Ra-Ra DCM and Ra-Ra Simulation-Based Tribe-PSO	170
3.5.4	Numerical Examples.....	174
3.6	Application to GEELY Haoqing Automotive Holdings Group Limited Company	178
3.6.1	Background Introduction	178
3.6.2	Problem Description and Notation	180
3.6.3	Modelling and Analysis	181
4	Random Fuzzy Multiple Objective Decision Making	189
4.1	Supply Chain Network Design with Ra-Fu Phenomena	190
4.2	Random Fuzzy Variable	192
4.2.1	Fuzzy Variable	192
4.2.2	Ra-Fu Variable	196

4.3	Ra-Fu EVM	211
4.3.1	General Model for Ra-Fu EVM	211
4.3.2	Linear Ra-Fu EVM and the Maximin Point Method	213
4.3.3	Nonlinear Ra-Fu EVM and Ra-Fu Simulation-Based aw-GA	218
4.3.4	Numerical Examples	227
4.4	Ra-Fu CCM	230
4.4.1	General Model for Ra-Fu CCM	232
4.4.2	Linear Ra-Fu CCM and ε -Constraint Method	236
4.4.3	Nonlinear Ra-Fu CCM and Ra-Fu Simulation-Based st-GA	242
4.4.4	Numerical Examples	250
4.5	Ra-Fu DCM	252
4.5.1	General Model for Ra-Fu DCM	254
4.5.2	Linear Ra-Fu DCM and Goal Programming Method	255
4.5.3	Nonlinear Ra-Fu DCM and Ra-Fu Simulation-Based rw-GA	260
4.5.4	Numerical Examples	264
4.6	Application to Chinese Liquor	266
4.6.1	Notations	269
4.6.2	Modelling	269
4.6.3	Comparison of st-GA and m-GA	277
5	Random Rough Multiple Objective Decision Making	279
5.1	Inventory Problem with Ra-Ro Phenomena	280
5.2	Random Rough Variable	282
5.2.1	Rough Set	282
5.2.2	Ra-Ro Variable	291
5.3	Ra-Ro EVM	308
5.3.1	General Model for Ra-Ro EVM	309
5.3.2	Linear Ra-Ro EVM and the Ideal Point Method	312
5.3.3	Non-Linear Ra-Ro EVM and Ra-Ro Simulation-Based ECTS	315
5.3.4	Numerical Examples	322
5.4	Ra-Ro CCM	325
5.4.1	General Model	326
5.4.2	Linear Ra-Ro CCM and Two-Stage Method	327
5.4.3	Nonlinear Ra-Ro CCM and Ra-Ro Simulation-Based PTS	333
5.4.4	Numerical Examples	339
5.5	Ra-Ro DCM	342
5.5.1	General Model	343
5.5.2	Linear Ra-Ro DCM and the Fuzzy Goal Method	344
5.5.3	Nonlinear Ra-Ro DCM and Ra-Ro Simulation-Based RTS	350
5.5.4	Numerical Examples	354

5.6	The Inventory System of Wal-Mart Supermarket	357
5.6.1	Background	358
5.6.2	Assumptions	359
5.6.3	Mathematical Model	360
5.6.4	Sensitivity Analysis	367
6	Methodological System for RLMODM	371
6.1	Motivation of Researching RLMODM	372
6.2	Physics-Based Model System	375
6.3	Mathematical Model System	377
6.4	Model Analysis System	382
6.5	Algorithm System	387
6.6	Research Ideas and Paradigm: 5MRP	390
6.7	Future Research	394
A	Some Mathematical Aids	397
A.1	Series	397
A.2	Some Useful Integrals	398
A.3	Chebyshev's Inequality	399
A.4	Cauchy's Equation	399
A.5	Some Useful Lemmas	400
B	Some Procedures	403
B.1	The Procedure of Random Simulation-Based SA	403
B.2	The Procedure of Ra-Ra Simulation-Based PSO	406
B.3	The Procedure of Ra-Fu Simulation-Based GA	409
B.4	The Procedure of Ra-Ro Simulation-Based TS	416
