

Contents

Part I Introduction and Preparation of the Analysis

1 Introduction	3
References	7
2 Preparation of the Analysis	9
2.1 Type of Input Matrix	10
2.2 Estimation Technique	10
2.3 Two-Step Approach	11
2.4 Level of Abstraction	11
2.5 Summated Scales	12
2.6 Goodness of Fit Indices	13
2.7 Data Screening Prior to Model Estimation and Testing	13
References	24

Part II Assessment of Measurement Model

3 Assessment of Measurement Model	29
3.1 Customer Orientation	29
3.1.1 Dimensionality Tests for COR	30
3.1.2 Convergent Validity Tests for COR	65
3.1.3 Reliability Tests for COR	67
3.1.4 Discriminant Validity Tests for COR	68
References	69

Part III Assessment of Structural Model

4 Assessment of Structural Model	73
4.1 Assessment of Structural Model Based on the Calibration Sample	73

4.2	Assessment of Structural Model Based on the Validation Sample	77
4.2.1	Comparison of the Final Model Versus a Rival Model	80
	References	86
Appendix	87
