Preface

The 11th volume of the EFORT European Instructional Lectures is a collection of all the Lectures to be presented at the 11th Congress in Copenhagen from 1st to 4th of June 2011.

As always the topics are chosen to reflect some aspects of current Orthopaedic and Traumatology philosophy and practice by a group of specialists who also represent a variety of expertise which is unique to Europe.

Particular thanks go to the authors, not only for preparing and presenting their lectures but also for other activities such as paper reviewing and chairing of Symposia and Specialist sessions, which are vital for the rich totality of the Congress programme.

Preparation of the volume has been in the hands of Gabriele Schroeder and her colleagues in the Internationally-recognised Springer company to whom we are very grateful.

My personal thanks go to Larissa Welti and the EFORT Central office staff for their expert and unfailing support, as ever.

This volume is dedicated to all those who have contributed to the ever-expanding educational and scientific development of EFORT, to bring it to be the greatest Orthopaedic and Traumatology fellowship in Europe.
