Chapter 1

Overview of the Human Brain and Spinal Cord

Hans J. ten Donkelaar and Anthony H.M. Lohman

1.1	Introduction	1
1.2	Macroscopy of the Brain.....	1
1.2.1	Lateral View of the Brain	2
1.2.2	Medial View of the Brain	3
1.2.3	Dorsal View of the Brain	3
1.2.4	Basal View of the Brain and Its Relations to the Skull Base.....	4
1.2.5	Some Horizontal Sections of the Brain	6
1.2.6	Imaging of the Brain.....	6
1.3	The Meninges, the Intracranial Compartments and the Liquor Circulation.....	7
1.3.1	The Meninges	7
	Clinical Case 1.1 Epidural, Subdural and Subarachnoid Haemorrhages <i>Antoine Keyser and Pieter Wesseling</i>	12
1.3.2	The Intracranial Compartments	13
	Clinical Case 1.2 Space-Occupying Lesions <i>Antoine Keyser and Pieter Wesseling</i>	13
1.3.3	The Liquor Circulation	15
1.4	The Spinal Cord.....	15
1.4.1	Gross Anatomy	16
1.4.2	Microscopy: Subdivision of Grey and White Matter	17
1.5	The Brain Stem	21
1.5.1	The Cranial Nerves	21
1.5.2	Three Cross-Sections Through the Brain Stem	23
1.5.3	The Reticular Formation and Related Monoaminergic and Cholinergic Nuclei ..	26
1.6	The Cerebellum.....	27
1.6.1	Gross Anatomy, Subdivision and Compartmentalization.....	28
1.6.2	Major Fibre Connections	29
1.6.3	Precerebellar Nuclei	30
1.7	The Diencephalon	30
1.7.1	Subdivision	30
1.7.2	The Thalamus and Thalamocortical Connections	31
1.7.3	The Hypothalamus.....	35
1.8	The Telencephalon	36
1.8.1	Subdivision: Pallium and Subpallium	36
1.8.2	Brodmann's and Other Cortical Maps	38
1.8.3	Overview of Cortical Connections	41
1.8.4	The Limbic System: Rhinencephalon, the Hippocampal Formation and the Amygdala	46
1.8.5	The Basal Ganglia and Related Basal Forebrain Structures.....	50
	References	54

Chapter 2

Vascularization of the Brain and Spinal Cord

Hans J. ten Donkelaar, Ton van der Vliet, Anthony H.M. Lohman,

Antoine Keyser, and Pieter Wesseling

2.1	Introduction	61
2.2	A Few Notes on the Development of the Blood Supply of the Brain	62
2.3	Gross Anatomy of the Vessels of the Brain and the Spinal Cord	62
2.4	Vascular Imaging	65
2.5	Arterial Supply of the Cerebral Cortex	68
2.6	The Circle of Willis and Its Perforating Branches	70
	Clinical Case 2.1 Aneurysm of the Anterior Communicating Artery <i>Ton van der Vliet</i>	74
	Clinical Case 2.2 Aneurysm of the Posterior Communicating Artery <i>Pieter Wesseling</i>	75
2.7	Ischaemic Stroke	75
	Clinical Case 2.3 MCA Stenosis <i>Lars Rödiger</i>	78
	Clinical Case 2.4 Watershed Infarction <i>Ton van der Vliet</i>	79
	Clinical Case 2.5 Ischaemic Necrosis in the MCA Territory <i>Pieter Wesseling</i>	79
	Clinical Case 2.6 Basilar Tip Aneurysm/Basilar Thrombosis <i>Ton van der Vliet</i>	80
2.8	Arterial Supply of the Capsula Interna and the Basal Ganglia	82
	Clinical Case 2.7 Small-Vessel Disease of the Lenticulostriate Arteries <i>Peter van Domburg</i>	83
2.9	Arterial Supply of the Thalamus	84
	Clinical Case 2.8 Thalamic Stroke <i>Ton van der Vliet</i>	85
	Clinical Case 2.9 Variants of Paramedian Artery Occlusion <i>Peter van Domburg</i>	86
2.10	Arterial Supply of the Cerebellum	88
	Clinical Case 2.10 Cerebellar Infarction Due to an Aneurysm of the SCA <i>Ton van der Vliet</i>	90
2.11	Arterial Supply of the Brain Stem	90
	Clinical Case 2.11 A Typical Wallenberg Syndrome <i>Ton van der Vliet</i>	94
	Clinical Case 2.12 Lacunar Infarct of the Pons <i>Peter van Domburg</i>	96
2.12	Arterial Supply of the Spinal Cord	96
	Clinical Case 2.13 Spinal Cord Infarction Due to a Cervical Tumour <i>Ton van der Vliet</i>	97
2.13	Venous Drainage	98
	Clinical Case 2.14 V. Galeni Magna Aneurysm <i>Ton van der Vliet</i>	101
	Clinical Case 2.15 Sagittal Sinus Thrombosis <i>Ton van der Vliet</i>	102
	Clinical Case 2.16: Straight Sinus Thrombosis <i>Peter van Domburg</i>	102
	References	104

Chapter 3

Notes on Techniques*Hans J. ten Donkelaar, Dick Stegeman, and Ton van der Vliet*

3.1	Introduction	107
3.2	Tissue-Staining Techniques	107
3.3	Tract-Tracing Techniques	108
3.3.1	Fibre Dissection	108
3.3.2	The Classic Degeneration Techniques	109
3.3.3	Modern Tract-Tracing Techniques	112
3.4	Immunohistochemical Techniques	113
3.5	Electrophysiological Techniques	114
3.5.1	EEG and MEG	115
3.5.2	Evoked Potentials	116
3.5.3	Transcranial Electrical and Magnetic Stimulation	117
3.5.4	Electrophysiological Methods for Mapping Brain Motor and Sensory Circuits	119
3.6	Non-invasive Imaging Techniques	121
3.6.1	MR Imaging	122
3.6.2	Diffusion Tensor Imaging	123
3.6.3	Functional MRI	125
3.6.4	Positron Emission Tomography	125
	References	126

Chapter 4

The Somatosensory System*Hans J. ten Donkelaar, Antoine Keyser, and Peter van Domburg*

4.1	Introduction	133
4.2	Receptors and Peripheral Pathways	134
4.2.1	Receptors	135
4.2.2	Segmental Innervation of the Skin	137
	Clinical Case 4.1 Meralgia Paraesthetica	
	<i>Peter van Domburg</i>	143
4.2.3	Peripheral Pathways	144
	Clinical Case 4.2 Sensory Neuronopathies/Neuropathies	
	<i>Gert van Dijk</i>	145
4.2.4	Lesions of the Dorsal Roots	146
	Clinical Case 4.3 Neuralgic Amyotrophy	
	<i>Nens van Alfen</i>	151
4.3	The Large-Fibred Dorsal (Posterior) Column-Medial Lemniscus Pathway	152
4.3.1	Dorsal Column Projections	152
	Clinical Case 4.4 Lateral Medullary Lesion Affecting the Decussating Medial Lemniscus	
	<i>Enrico Marani</i>	155
4.3.2	Sensory Pathways in the Dorsolateral Funiculus	156
4.3.3	The Somatosensory Thalamus	157
4.3.4	Somatosensory Cortical Projections	159
4.3.5	Sensorimotor Transition	164
4.3.6	Lesions of the Dorsal Column-Medial Lemniscus System	165
	Clinical Case 4.5 Sensory Effects of Lesions of the Posterior Columns	
	<i>After Gans (1916)</i>	167
	Clinical Case 4.6 Lesions of the Medial Lemniscus	
	<i>After Kim (2001)</i>	167

	Clinical Case 4.7 The Control of Hand Movements in a Case of Hemianaesthesia Following a Parietal Lesion <i>After Jeannerod et al. (1984)</i>	170
	Clinical Case 4.8 Isolated Loss of Stereognosis <i>Peter van Domburg</i>	171
4.4	The Small-Fibred Sensory Pathways in the Ventral Quadrant	172
4.4.1	The Anterolateral or Pain System.....	172
4.4.1.1	Anterograde Degeneration Studies in Humans	172
	Clinical Case 4.9 Distribution of Anterogradely Degenerating Fibres Following Anterolateral Cordotomy <i>After Mehler (1962)</i>	173
4.4.1.2	Nociception.....	173
4.4.1.3	The Gate Control Theory.....	173
4.4.1.4	The Spinothalamic Tracts	173
4.4.2	Brain Stem Projections	178
4.4.3	Thalamic and Hypothalamic Projections.....	180
4.4.4	Cortical Targets.....	181
4.4.5	Descending Pain Modulatory Systems	182
4.4.6	Lesions of the Anterolateral System.....	182
	Clinical Case 4.10 Central Neuropathic Pain in Spinal Cord Lesions <i>Peter van Domburg</i>	185
	Clinical Case 4.11 Lesions of the Pain System from Medulla to Thalamus <i>Peter van Domburg</i>	186
	Clinical Case 4.12 Central Post-stroke Pain Following a Cortical Infarct <i>Peter van Domburg</i>	188
4.5	The Trigeminal Somatosensory System	189
4.5.1	Trigeminal Afferents.....	189
4.5.2	Brain Stem Trigeminal Sensory Nuclei.....	190
4.5.3	Thalamic Projections	192
4.5.4	Cortical Targets.....	193
4.5.5	Lesions of the Trigeminal Somatosensory System.....	193
	Clinical Case 4.13 Trigeminal Neuralgia <i>Peter van Domburg</i>	194
	Clinical Case 4.14 Trigeminal Ganglion or Root Compression <i>Peter van Domburg</i>	195
	Clinical Case 4.15 Wallenberg Syndrome <i>Peter van Domburg</i>	197
	References	198

Chapter 5

The Reticular Formation and Some Related Nuclei

*Pavel Petrovický, Veronika Němcová, Hans J. ten Donkelaar,
Sebastiaan Overeem, and Pieter Vos*

5.1	Introduction	211
5.2	Cytoarchitecture, Subdivision and Organization of the Reticular Formation	212
5.2.1	The Raphe Nuclei	212
5.2.2	The Medial Reticular Formation	214
5.2.3	The Lateral Reticular Formation	215
5.3	Monoaminergic Nuclei	215
5.3.1	Serotonergic Cell Groups	215
5.3.2	Noradrenergic Cell Groups.....	216
5.4	Cholinergic Cell Groups	216
5.4.1	The Pedunculopontine and Laterodorsal Tegmental Nuclei.....	216

5.4.2	The Basal Nucleus of Meynert and Associated Nuclei	218
5.5	Fibre Connections of the Reticular Formation	220
5.6	Sleep and Wakefulness	223
5.7	Some Sleep Disorders	229
	Clinical Case 5.1 Idiopathic Narcolepsy	
	<i>Sebastiaan Overeem</i>	230
	Clinical Case 5.2 Symptomatic Narcolepsy	
	<i>Tom Scammell</i>	231
	Clinical Case 5.3 Sleep Disturbances in PD	
	<i>Sebastiaan Overeem</i>	233
5.8	Disorders of Consciousness	234
	Clinical Case 5.4 Uncal Herniation Syndrome	
	<i>Pieter Vos</i>	235
	Clinical Case 5.5 Transtentorial Uncal/Tonsillar Herniation	
	<i>Pieter Vos</i>	237
	Clinical Case 5.6 “Top of the Basilar” Syndrome	
	<i>Pieter Vos</i>	238
	Clinical Case 5.7 High Pontine/Lower Midbrain	
	Lesions Leading to Coma	
	<i>After Parvizi and Damasio (2003)</i>	240
	Clinical Case 5.8 Akinetic Mutism	
	<i>Peter van Domburg</i>	240
	Clinical Case 5.9 Locked-in Syndrome	
	<i>Pieter Vos</i>	242
	References	242
Chapter 6		
The Cranial Nerves		
<i>Hans J. ten Donkelaar, Johannes R.M. Cruysberg, Ton van der Vliet, Peter van Domburg, and Willy O. Renier</i>		
6.1	Introduction	249
6.2	A Few Notes on the Development of the Brain Stem	250
	Clinical Case 6.1 Congenital Cranial Dysinnervation Disorders	
	<i>Johannes R.M. Cruysberg</i>	253
6.3	The Oculomotor, Trochlear and Abducens Nerves	254
	Clinical Case 6.2 Lesions of Individual Ocular Motor Nerves	
	<i>Johannes R.M. Cruysberg</i>	257
	Clinical Case 6.3 Lesions of the Oculomotor Nerve and Nucleus	
	<i>Peter van Domburg</i>	261
	Clinical Case 6.4 Sinus Cavernosus Syndromes	
	<i>Peter van Domburg</i>	262
6.4	Eye Movements	264
6.4.1	Overview	264
6.4.2	The Vestibulo-Optokinetic System	264
6.4.3	Brain Stem Control of Horizontal and Vertical Eye Movements	266
	Clinical Case 6.5 Brain Stem Lesions Affecting Horizontal	
	Eye Movements: INO	
	<i>Peter van Domburg</i>	268
	Clinical Case 6.6 Brain Stem Lesions Affecting Vertical Eye Movements:	
	Parinaud Syndrome	
	<i>Peter van Domburg</i>	269
6.4.4	Voluntary Control of Eye Movements	270
	Clinical Case 6.7 Paralysis of Saccades and Pursuit	
	<i>Martin Lammens</i>	271

6.5	The Trigeminal Nerve.....	272
6.5.1	The Sensory Part of the Trigeminal Nerve	272
	Clinical Case 6.8 Trigeminal Neuralgia	
	<i>Peter van Domburg</i>	274
6.5.2	The Motor Part of the Trigeminal Nerve.....	274
	Clinical Case 6.9 Late Blink Reflex Changes in Lateral Medullary Lesions	
	<i>Majid Aramideh</i>	277
6.6	The Facial Nerve	279
	Clinical Case 6.10 Facial Nerve Paralysis	
	<i>Willy O. Renier</i>	280
	Clinical Case 6.11 Congenital Facial Palsy	
	<i>Harriëtte Verzijl and Martin Lammens</i>	281
6.7	The Gustatory System	283
6.8	The Vestibulocochlear Nerve	284
6.8.1	The Vestibular Nerve and Nuclei.....	287
6.8.2	Fibre Connections of the Vestibular Nuclei.....	287
6.8.3	Functional and Pathophysiological Aspects of Vestibular Control	288
	Clinical Case 6.12 Peripheral Vestibular Disorders	
	<i>Myrthe Hol</i>	290
	Clinical Case 6.13 Central Vestibular Disorders	
	<i>After Dieterich et al. (2005)</i>	292
6.9	The Glossopharyngeal, Vagal and Accessory Cranial Nerves.....	293
6.9.1	The IXth, Xth and XIth Cranial Nerves	293
	Clinical Case 6.14 Lesions of the IXth, Xth and XIth Cranial Nerves	
	<i>Willy O. Renier</i>	294
6.9.2	Swallowing	295
	Clinical Case 6.15 Dysphagia	
	<i>Peter van Domburg</i>	296
6.10	The Hypoglossal Nerve.....	297
	Clinical Case 6.16 Hypoglossal Paresis	
	<i>Willy O. Renier</i>	298
	References	298

Chapter 7

The Auditory System

Hans J. ten Donkelaar and Kimitaka Kaga

7.1	Introduction	305
7.2	The Cochlea and the Cochlear Nerve	306
7.2.1	The Middle Ear and the Cochlea: Mechanical Transmission of Sound	306
7.2.2	Cochlear Hair Cells: Transduction and Amplification	308
7.2.3	Spiral Ganglion Cells and the Cochlear Nerve: Neural Transmission	308
7.2.4	The Auditory Periphery: Generation of Evoked Activity.....	308
7.2.5	Hearing Loss.....	309
	Clinical Case 7.1 Cerebellopontine Angle Tumour	
	<i>Kimitaka Kaga</i>	310
7.3	The Brain Stem Auditory System	312
7.3.1	The Cochlear Nuclei: Diversification of Cochlear Input.....	312
7.3.2	The Superior Olivary Complex: Recreation of Auditory Space.....	313
7.3.3	The Upper Brain Stem: Integration of Ascending Auditory Pathway.....	313
7.3.4	Brain Stem Topography: Generation of Evoked Potentials.....	314
	Clinical Case 7.2 Impaired Sound Localization Following	
	a Midline Pontine Lesion	
	<i>After Levine and Häusler (2001)</i>	314
7.4	The Forebrain Auditory System.....	315
7.4.1	The Auditory Thalamus.....	315
7.4.2	The Acoustic Radiation	315
7.4.3	The Auditory Cortex: Sequential Levels of Auditory Processing	316

7.4.4	Auditory Disorders Related to Stroke	319
	Clinical Case 7.3 Auditory Agnosia Caused by Bilateral Lesions Restricted to the Auditory Radiations	
	<i>Kimitaka Kaga</i>	321
	Clinical Case 7.4 Neuropathology of Auditory Agnosia Following Bilateral Temporal Lobe Infarction	
	<i>Kimitaka Kaga</i>	322
	Clinical Case 7.5 Auditory Hallucinations Following a Metastasis in Heschl's Gyrus	
	<i>Peter van Domburg</i>	324
7.5	The Descending Auditory System	325
	References	326

Chapter 8

The Visual System

Hans J. ten Donkelaar and Johannes R.M. Cruysberg

8.1	Introduction	331
8.2	Anatomy and Imaging of the Visual System	332
8.2.1	The Retina	332
	Clinical Case 8.1 Hereditary Retinal Dystrophies	
	<i>Johannes R.M. Cruysberg</i>	335
8.2.2	The Optic Nerve, the Optic Chiasm and the Optic Tract	336
	Clinical Case 8.2 Isolated Absence of the Optic Chiasm	
	<i>Nomdo Jansonius and Ton van der Vliet</i>	338
8.2.3	The Lateral Geniculate Body	338
	Clinical Case 8.3 Selective Transneuronal Degeneration of the LGB After Enucleation	
	<i>Akira Hori</i>	339
8.2.4	The Optic Radiation	341
8.2.5	The Superior Colliculus and the Pulvinar	341
8.2.6	The Pretectum and the Pupillary Light Reflex	343
	Clinical Case 8.4 Lesions of the Pupillary Light Reflex Pathway	
	<i>Maria van Genderen and Johannes R.M. Cruysberg</i>	345
	Clinical Case 8.5 Horner Syndrome	
	<i>Johannes R.M. Cruysberg</i>	346
8.3	The Visual Cortex	346
8.3.1	The Striate Cortex	346
	Clinical Case 8.6 MELAS and Central Blindness	
	<i>Michèl Willemsen</i>	349
8.3.2	Extrastriate and Visual Association Cortices	349
8.4	The Retinogeniculocortical Pathway and Typical Visual-Field Defects	351
	Clinical Case 8.7 The Spectrum of Visual-Field Defects	
	<i>Johannes R.M. Cruysberg</i>	353
	Clinical Case 8.8 Altitudinal Hemianopia	
	<i>Martin Lammens</i>	355
8.5	The Extrastriate Visual Cortex and Abnormalities of Complex Visual Perception	356
8.5.1	Dorsal Pathway Lesions	357
	Clinical Case 8.9 Bálint Syndrome	
	<i>Ton van der Vliet</i>	357
8.5.2	Ventral Pathway Lesions	358
	Clinical Case 8.10 Cerebral Achromatopsia	
	<i>Johannes R.M. Cruysberg and Antoine Keyser</i>	359
	Clinical Case 8.11 Paroxysmal Visual Phenomena	
	<i>Peter van Domburg</i>	360
	References	361

Chapter 9

Motor Systems*Hans J. ten Donkelaar*

9.1	Introduction	367
9.2	The Peripheral Motor System	368
9.2.1	The Peripheral or LMNs	368
9.2.2	Motor Units and Muscle Units	370
9.2.3	Motor Unit–Muscle Unit Association	372
9.2.4	Reflex Pathways in the Spinal Cord	374
	Clinical Case 9.1 Manual Motor Control in a Deafferented Man	
	<i>John Rothwell</i>	376
9.2.5	Muscle Tone	377
9.2.6	Lesions of Peripheral Motoneurons	378
9.2.6.1	Plexus Lesions	378
9.2.6.2	Diseases of the Motor Unit	379
9.2.6.3	Motoneuron Disease	380
	Clinical Case 9.2 Lesions of the Brachial Plexus	
	<i>Antoine Keyser</i>	381
	Clinical Case 9.3 Diabetic Lumbosacral Plexus Neuropathy	
	<i>Nens van Alfen</i>	382
9.3	Gait and Posture	382
	Clinical Case 9.4 Atrophy of Intrinsic Hand Muscles in Patients with Parietal Lesions	
	<i>After Op de Coul (1970)</i>	383
	Clinical Case 9.5 The Spectrum of MND	
	<i>Jurgen Schelhaas and Benno Küsters</i>	385
	Clinical Case 9.6 A Juvenile ALS Case	
	<i>Jan Geelen, Willy O. Renier and Henk ter Laak</i>	386
9.3.1	Physiological Basis of Human Locomotion	388
9.3.2	Afferent Control	389
9.3.3	Supraspinal Control	389
9.3.4	Spinal Cord Injuries	391
	Clinical Case 9.7 The Brown-Séquard Syndrome	
	<i>Antoine Keyser</i>	392
9.3.5	Gait Disorders	393
	Clinical Case 9.8 Gait Disorders	
	<i>Peter van Domburg</i>	394
9.3.6	Posture	395
9.4	Central Control of Movement	396
9.4.1	Descending Pathways to the Spinal Cord	396
9.4.2	Long Corticofugal Pathways	401
9.4.2.1	Corticobulbar Fibres	401
	Clinical Case 9.9 Corticobulbar Projections	
	<i>After Kuypers (1958)</i>	402
	Clinical Case 9.10 Aberrant Corticofacial Projections	
	<i>Peter Urban</i>	404
9.4.2.2	The Internal Capsule	406
9.4.2.3	The Corticospinal Tract	406
	Clinical Case 9.11 Course and Site of Termination of Corticospinal Projections	
	<i>After Schoen (1969)</i>	412
9.4.2.4	Indirect Corticospinal Projections	414
	Clinical Case 9.12 Interruption of a Relay of Corticospinal Excitation by a Spinal Lesion at C6–C7	
	<i>Emmanuel Pierrot-Deseilligny</i>	415

9.4.3	Lesions of Supraspinal Motor Structures	416
9.4.3.1	Lesions of the Corticospinal Tract in Humans	416
	Clinical Case 9.13 Lesions of the Corticospinal Tract: Overview <i>Pieter Wesseling and Peter van Domburg</i>	417
9.4.3.2	The Effects of Sectioning of the Pyramidal Tract in Monkeys	419
9.4.3.3	Human Manipulatory Skills	420
9.4.3.4	Pure Lesions of the Human Pyramidal Tract.....	421
	Clinical Case 9.14 Pure Motor Hemiplegia Due to a Medullary Pyramid Lesion <i>After Leestma and Noronha (1976)</i>	421
9.4.3.5	Transection of Descending Brain Stem Pathways.....	422
9.4.4	Human Cortical Motor Areas	424
9.4.4.1	Cortical Motor Areas in Monkeys	424
9.4.4.2	Human Cortical Motor Areas	424
9.4.4.3	Lesions of the Precentral Gyrus	429
	Clinical Case 9.15 Recovery of Function Following a Lesion of the Motor Cortex <i>After Foerster (1936)</i>	430
9.4.4.4	Lesions of the SMA	430
9.4.4.5	Lesions of the PMC	430
	Clinical Case 9.16 Lesions of the Premotor Versus Motor Cortices <i>After Freund and Hummelsheim (1985)</i>	432
9.4.5	Higher-Order Motor Control	000
9.4.6	Lesions of Higher-Order Motor Centres	432
	Clinical Case 9.17 Visuomotor Ataxia <i>After Rondot et al. (1977)</i>	434
	Clinical Case 9.18 Apraxia <i>Peter van Domburg</i>	436
	References	437
Chapter 10		
The Cerebellum		
<i>Hans J. ten Donkelaar, Bart van de Warrenburg, Martin Lammens, and Pieter Wesseling</i>		
10.1	Introduction	449
10.2	A Few Notes on the Development of the Cerebellum	450
	Clinical Case 10.1 Midline or Vermis Malformations <i>Hans J. ten Donkelaar</i>	452
	Clinical Case 10.2 Pontocerebellar Hypoplasias <i>Martin Lammens</i>	454
10.3	Gross Morphology, Subdivision and Compartmentalization	454
10.4	The Deep Cerebellar Nuclei	456
10.5	The Cerebellar Peduncles	456
10.6	Cerebellar Afferent Connections	457
10.6.1	The Spinocerebellar Tracts	457
10.6.2	Vestibulocerebellar Projections	459
10.6.3	Olivocerebellar Projections	459
	Clinical Case 10.3 The Human Central and Medial Tegmental Tracts <i>Jan Voogd</i>	463
10.6.4	Corticopontocerebellar Projections	464
	Clinical Case 10.4 Corticopontine Projections in the Human Brain <i>Jan Voogd</i>	467
10.6.5	Hypothalamocerebellar Projections	
10.7	Cerebellar Output: Motor and Cognitive Channels	469
10.7.1	The Brachium Conjunctivum	469
	Clinical Case 10.5 The Human Brachium Conjunctivum <i>After Gebbink (1967)</i>	469

10.7.2	Cerebellothalamocortical Projections.....	470
10.7.3	The Uncinate Tract	472
10.7.4	Open Versus Closed Loops.....	472
10.8	Cerebellar Dysfunction	474
10.9	Ataxia: Pathophysiology and Clinical Aspects	476
10.9.1	Signs of Cerebellar Disease.....	476
	Clinical Case 10.6 Holmes or Rubral Tremor	
	<i>Peter van Domburg</i>	477
10.9.2	Hereditary Spinocerebellar Ataxias.....	478
	Clinical Case 10.7 Friedreich Ataxia	
	<i>Arnulf Koeppen</i>	478
	Clinical Case 10.8 Spinocerebellar Ataxia Type 3 (SCA3)	
	<i>Bart van de Warrenburg</i>	480
	Clinical Case 10.9 Multiple System Atrophy, Cerebellar Variant (MSA-C)	
	<i>Pieter Wesseling</i>	480
10.9.3	Acquired Ataxias	482
	Clinical Case 10.10 Paraneoplastic Cerebellar Degeneration	
	<i>Bart van de Warrenburg</i>	482
10.9.4	Vascular Lesions	483
	Clinical Case 10.11 Caudal Paramedian Midbrain Syndrome	
	<i>Luigi Mossuto-Agatiello</i>	483
10.9.5	Ataxic Hemiparesis	484
	Clinical Case 10.12 A Case of Thalamic Ataxia	
	<i>Peter van Domburg</i>	485
10.10	The Cerebellar Cognitive Affective Syndrome	485
	Clinical Case 10.13 Cerebellar Mutism

Chapter 11

Basal Ganglia

*Hans J. ten Donkelaar, Bart van de Warrenburg, Michèl Willemsen,
Benno Küsters, Yoshio Hashizume, and Akira Hori*

11.1	Introduction	495
11.2	Subdivision, Cytoarchitecture and Basic Circuitry	499
11.2.1	The Striatum	499
11.2.2	The Pallidal Complex	501
11.2.3	The Subthalamic Nucleus.....	502
11.2.4	The Motor Thalamus	502
11.2.5	The Substantia Nigra and the Ventral Tegmental Area	504
11.2.6	The Direct and Indirect Basal Ganglia Pathways	505
11.3	Functional Basal Ganglia Connections	507
11.3.1	The Corticostriatal Projection System.....	507
11.3.2	The Striatofugal System	510
11.3.3	The Output Structures of the Basal Ganglia.....	511
11.3.3.1	Overview.....	511
11.3.3.2	Pallidofugal Fibres.....	512
	Clinical Case 11.1 Anterograde Fibre Degeneration Following Pallidal Lesions	
	<i>After Gebbink (1967)</i>	514
11.3.3.3	The Subthalamic Nucleus.....	515
11.3.3.4	The Zona Incerta.....	515
11.3.3.5	The Pedunculopontine Tegmental Nucleus	515

11.3.3.6	Updated Model of Basal Ganglia Circuitry	516
11.3.4	The Nigrostriatal System	516
11.3.5	Lesions of the Basal Ganglia	516
	Clinical Case 11.2 Selective Vulnerability of the Basal Ganglia I: Overview	
	<i>Michèl Willemsen</i>	519
	Clinical Case 11.3 Selective Vulnerability of the Basal Ganglia II: Familial Striatal Degeneration	
	<i>Martin Lammens</i>	521
	Clinical Case 11.4 Selective Vulnerability of the Basal Ganglia III: Leigh Syndrome	
	<i>Michèl Willemsen and Martin Lammens</i>	522
	Clinical Case 11.5 Motor Function in a Patient with Bilateral Lesions of the Globus Pallidus	
	<i>Rob Haaxma</i>	524
	Clinical Case 11.6 Hemiballism	
	<i>Akira Hori</i>	524
	Clinical Case 11.7 Dentatorubropallidolusian Atrophy	
	<i>Maya Mimuro, Mari Yoshida and Yoshio Hashizume</i>	525
11.4	Pathophysiology of Basal Ganglia Disorders	528
11.4.1	Parkinson Disease	528
11.4.2	Hemiballismus	533
	Clinical Case 11.8 Posttraumatic Tremor Without Parkinsonism in a Patient with Complete Contralateral Loss of the Nigrostriatal Pathway	
	<i>Jan Zijlmans</i>	533
	Clinical Case 11.9 The Clinical Spectrum of PD and Related Disorders: I Juvenile PD and Vascular Parkinsonism	
	<i>Bart van de Warrenburg and Peter van Domburg</i>	534
	Clinical Case 11.10 The Clinical Spectrum of PD and Related Disorders II: Parkinson-Plus Disorders	
	<i>Bart van de Warrenburg</i>	535
11.4.3	Chorea	537
11.4.4	Dystonia	539
11.4.5	Obsessive–Compulsive Disorders	539
11.5	Neuropathology of Basal Ganglia Disorders	539
11.5.1	Parkinson Disease	540
	Clinical Case 11.11 Neuropathological Assessment of Hypokinetic Movement Disorders	
	<i>Benno Küsters</i>	544
11.5.2	Parkinson-Plus Disorders	547
	Clinical Case 11.12 Progressive Supranuclear Palsy	
	<i>Akira Hori and Yoshio Hashizume</i>	548
	Clinical Case 11.13 Corticobasal Degeneration	
	<i>Akira Hori and Yoshio Hashizume</i>	550
11.5.3	Huntington Disease	552
	References	553

Chapter 12

The Autonomic Nervous System

*Hans J. ten Donkelaar, Veronika Němcová, Martin Lammens,
Sebastiaan Overeem, and Antoine Keyser*

12.1	Introduction	565
12.2	Peripheral Components of the Autonomic Nervous System	565

12.2.1	Pre- and Postganglionic Neurons	566
12.2.2	The Thoracolumbar or Sympathetic Division	566
12.2.3	The Craniosacral or Parasympathetic Division	567
12.2.4	Afferent Visceral Fibres.....	569
12.2.5	The Enteric Nervous System	571
	Clinical Case 12.1 Aganglionosis	
	<i>Martin Lammens</i>	573
	Clinical Case 12.2 Ganglioneuritis in Paraneoplastic Syndrome	
	<i>Martin Lammens</i>	574
12.2.6	Autonomic Innervation of the Viscera.....	575
12.2.7	Some Cases of Autonomic Failure	576
	Clinical Case 12.3 Pure Autonomic Failure	
	<i>Erwin van Ingelghem, Michel van Zandijcke and Martin Lammens</i>	577
	Clinical Case 12.4 Autonomic Dysfunction by a Spinal Conus Lesion	
	<i>Antoine Keyser</i>	578
12.3	Central Components of the Autonomic Nervous System	578
12.3.1	Ascending Viscerosensory Projections.....	578
12.3.2	The Central Autonomic Network	579
12.3.3	Neural Control of Blood Pressure	580
	Clinical Case 12.5 Denervation of Carotid Baro- and Chemoreceptors	
	<i>Henri Timmers</i>	582
12.3.4	Neural Control of Breathing	583
	Clinical Case 12.6 CNS Lesions Producing Abnormal Breathing Patterns	
	<i>Sebastiaan Overeem, Dirk Pevernagie, Gerald Hengstman</i>	
	<i>and Benno Küsters</i>	585
	Clinical Case 12.7 Disorders of Chemical Control of Breathing I:	
	Sleep/Central Apnoea	
	<i>Sebastiaan Overeem and Dirk Pevernagie</i>	588
	Clinical Case 12.8 Disorders of Chemical Control of Breathing II: SIDS	
	<i>Anna Lavezzi</i>	590
12.3.5	Neural Control of Micturition	591
	Clinical Case 12.9 Disorders of Micturition	
	<i>Ryugi Sakakibara, Hiroaki Yaguchi and Ichiro Yabe</i>	596
	References	598

Chapter 13

The Hypothalamus and Hypothalamohypophysial Systems

Hans J. ten Donkelaar and Akira Hori

13.1	Introduction	603
13.2	Anatomical Organization	604
13.2.1	Boundaries and Subdivision	604
13.2.2	Hypothalamic Nuclei.....	606
	Clinical Case 13.1 Ventromedial Hypothalamus Syndrome	
	<i>After Reeves and Plum (1969)</i>	609
13.2.3	The Pituitary Gland	610
	Clinical Case 13.2 Persistent Craniopharyngeal Canal with	
	Pharyngosellar Pituitary	
	<i>Akira Hori</i>	611
	Clinical Case 13.3 Craniopharyngioma	
	<i>Pieter Wesseling</i>	612
13.2.4	Circumventricular Organs	612
13.3	Fibre Connections	614
13.3.1	The Fornix	616
	Clinical Case 13.4 Anterograde Transneuronal Atrophy of the Mammillary	
	Body Following a Hippocampus Infarction	
	<i>Akira Hori</i>	616

13.3.2	The Mammillothalamic Tract and the Mammillary Peduncle.....	617
	Clinical Case 13.5 Unilateral Atrophy of the Mammillary Body Due to Damage of the Mammillothalamic Tract <i>Akira Hori</i>	618
13.3.3	The Stria Terminalis	618
13.3.4	The Medial Forebrain Bundle.....	618
13.4	Hypothalamohypophysial Pathways	620
13.4.1	The Magnocellular Secretory System	620
13.4.2	The Parvocellular Secretory System.....	621
13.5	Functional Organization of the Hypothalamus	621
13.5.1	Feeding	622
13.5.2	Reproduction	622
	Clinical Case 13.6 Pallister–Hall Syndrome <i>Akira Hori</i>	624
13.5.3	Thermoregulation	625
13.5.4	Sleep	625
	References	626

Chapter 14

The Limbic System

*Hans J. ten Donkelaar, Jiří Brabec, Martin Lammens, Benno Küsters,
Yoshio Hashizume, and Akira Hori*

14.1	Introduction	633
14.2	The Concept of the Limbic System	634
14.3	The Olfactory System (The Rhinencephalon)	636
14.3.1	The Main Olfactory System	636
	Clinical Case 14.1 Olfactory Groove Meningioma <i>Peter van Domburg</i>	638
14.3.2	The Accessory Olfactory System	639
14.4	The Basal Forebrain	640
14.4.1	The Septum.....	643
14.4.2	The Ventral Striatopallidal System	643
14.4.3	The Extended Amygdala	644
14.4.4	The Magnocellular Basal Forebrain System	644
14.5	The Amygdala	645
14.5.1	Subdivision	645
14.5.2	Fibre Connections.....	647
14.5.3	Functional Aspects	650
14.5.4	Lesions of the Amygdala.....	652
	Clinical Case 14.2 Partial Klüver–Bucy Syndrome <i>Akira Hori</i>	654
	Clinical Case 14.3 Bilateral Degeneration of the Amygdala <i>After Adolphs et al. (1995)</i>	656
14.6	Anatomy of Neuropsychiatric Disorders	653
14.7	The Hippocampus	658
14.7.1	Subdivision	658
14.7.2	Fibre Connections.....	661
14.7.3	Some Functional Aspects	665
	Clinical Case 14.4 Anterograde Transneuronal Atrophy of the Mammillary Body <i>Akira Hori</i>	666
	Clinical Case 14.5 Diffuse Infiltrative Growth Along Hippocampal Projections <i>Pieter Wesseling</i>	668
14.7.4	Temporal Lobe Epilepsy.....	669

14.8	Memory and Memory Disorders.....	669
	Clinical Case 14.6 Temporal Lobe Epilepsy (TLE)	
	<i>Olaf Schijns and Martin Lammens</i>	670
14.8.1	A Taxonomy of Memory	672
14.8.2	Brain Regions Damaged in Amnesia.....	672
	Clinical Case 14.7 Acute Wernicke Encephalopathy	
	<i>Akira Hori and Yoshio Hashizume</i>	676
	Clinical Case 14.8 Chronic Wernicke Encephalopathy	
	<i>Akira Hori and Yoshio Hashizume</i>	677
	Clinical Case 14.9 Case HM	
	<i>After Corkin et al. (1997)</i>	678
	Clinical Case 14.10 Case WH	
	<i>After Rempel-Clower et al. (1996)</i>	680
	Clinical Case 14.11 Unilateral Herpes Simplex Encephalitis of the Amygdala and the Rostral Hippocampus	
	<i>Peter van Domburg</i>	681
	Clinical Case 14.12 Thalamic Amnesia	
	<i>Ysbrand van der Werf</i>	682
14.9	Neuroanatomy of AD.....	684
14.9.1	A Few Notes on Dementia.....	684
14.9.2	The Neuroanatomical Basis for Memory Impairment in AD.....	684
	Clinical Case 14.13 The Neuropathological Assessment of AD	
	<i>Benno Küsters</i>	689
	Clinical Case 14.14 Alzheimer Disease	
	<i>Hiroyasu Akatsu, Yoshio Hashizume and Akira Hori</i>	693
	Clinical Case 14.15 Argrophilic Grain Disease	
	<i>Hiroyasu Akatsu, Yoshio Hashizume, Maya Mimuro and Akira Hori</i>	696
	References	699

Chapter 15

The Cerebral Cortex and Complex Cerebral Functions

*Hans J. ten Donkelaar, Peter van Domburg, Paul Eling, Antoine Keyser,
Benno Küsters, and Akira Hori*

15.1	Introduction	712
15.2	Cortical Maps.....	712
15.3	The Isocortex.....	718
15.3.1	The Frontal Lobe	720
	Clinical Case 15.1 Prefrontal Disconnection with Forced Hyperphasia and Environmental Dependency	
	<i>Peter van Domburg</i>	726
15.3.2	The Parietal Lobe.....	726
	Clinical Case 15.2 Grasping Disorders	
	<i>Ferdinand Binkofski</i>	731
15.3.3	The Temporal Lobe	732
15.3.4	The Occipital Lobe	733
15.3.5	The Insular Lobe.....	735
15.4	Corticocortical Projections	736
15.4.1	Long Association Fibre Tracts.....	737
15.4.2	Commissural Connections.....	741
15.4.2.1	A Few Notes on the Development of the Corpus Callosum.....	742
	Clinical Case 15.3 Some Developmental Disorders of the Corpus Callosum	
	<i>Berit Verbist and Gerard van Noort</i>	742
15.4.2.2	The Corpus Callosum and the Anterior Commissure.....	744
	Clinical Case 15.4 Callosal Syndrome After Resection of a Large Arteriovenous Malformation	
	<i>Gea Drost</i>	744

15.4.3	White Matter Disorders	745
	Clinical Case 15.5 White Matter Disorders I: PVL	
	<i>Michèl Willemsen</i>	746
	Clinical Case 15.6 White Matter Disorders II:	
	Metachromatic Leukodystrophy	
	<i>Martin Lammens</i>	747
	Clinical Case 15.7 White Matters Disorders III: Binswanger	
	<i>Frank Erik de Leeuw, Hiroyasu Akatsu,</i>	
	<i>Yoshio Hashizume and Akira Hori</i>	749
	Clinical Case 15.8 White Matter Disorders IV: CADASIL	
	<i>Martin Lammens</i>	754
15.5	Hemispheric Differences	755
15.5.1	Laterality or Asymmetry?.....	755
15.5.2	Lateralization of Visuospatial Processing.....	756
	Clinical Case 15.9 Left Hemineglect, the Case of Federico Fellini	
	<i>After Cantagallo and Della Sala (1998)</i>	758
15.5.3	Lateralization of Auditory Processing	759
15.5.4	Anatomical and Functional Differences	759
15.6	Language and the Brain	760
15.6.1	The Classic, Clinicopathological Approach	760
	Clinical Case 15.10 Language Disorders (Broca, Wernicke, Global,	
	Conduction and Transcortical Types of Aphasia)	
	<i>Antoine Keyser</i>	762
15.6.2	Syntax	764
	Clinical Case 15.11 Syntactic Approach to Broca Aphasia	
	<i>Paul Eling</i>	765
15.6.3	Language Pathways	766
15.6.4	Primary Progressive Aphasia.....	767
	Clinical Case 15.12 Logopenic Variant of PPA	
	<i>Peter van Domburg</i>	768
15.6.5	Reading and Writing.....	770
15.7	Disconnection Syndromes	770
15.7.1	Language Network Disorders.....	771
	Clinical Case 15.13 Bilingual Language Processing After a Lesion	
	in the Left Thalamic and Temporal Regions	
	<i>Antoine Keyser</i>	773
	Clinical Case 15.14 Dejerine's Case on Pure Alexia	
	<i>After Dejerine (1892)</i>	773
15.7.2	Praxis Network Disorders.....	775
	Clinical Case 15.15 Primary Progressive Apraxia	
	<i>Peter van Domburg</i>	776
15.7.3	Visual Network Disorders	777
	Clinical Case 15.16 Bálint Syndrome	
	<i>Peter van Domburg</i>	778
	Clinical Case 15.17 Prosopagnosia	
	<i>Peter van Domburg</i>	779
15.8	The Neuroanatomical Basis of Cognitive	
	Impairment in the Primary Degenerative Dementias	780
15.8.1	The Clinical Profile of PDDs.....	780
	Clinical Case 15.18 The Enigma of Lobar Degeneration	
	<i>Peter van Domburg</i>	781
	Clinical Case 15.19 Progressive Comportmental/Executive	
	Dysfunction (Behavioural Variant of FTD)	
	<i>Peter van Domburg</i>	784
	Clinical Case 15.20 Primary Progressive Aphasia	
	<i>Peter van Domburg</i>	785

	Clinical Case 15.21 Progressive Amnestic Dysfunction (AD)	
	<i>Peter van Domburg</i>	788
15.8.2	Alzheimer Disease	790
	Clinical Case 15.22 Neuropathological Assessment of PDDs	
	(Consensus Criteria)	
	<i>Benno Küsters</i>	790
15.8.3	Frontotemporal Lobar Degeneration	792
	Clinical Case 15.23 Frontotemporal Lobar Degeneration	
	<i>Hennie Schoonderwaldt and Pieter Wesseling</i>	793
	Clinical Case 15.24 Dementia of Lewy Body Type (DLB)	
	<i>Hiroyasu Akatsu, Yoshio Hashizume, Maya Mimuro and Akira Hori</i>	795
15.8.4	Dementia with Lewy Bodies	797
	References	798
