

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Noise Reduction	1
1.2	Organization of the Work	2
	References	2
<b>2</b>	<b>Single-Channel Noise Reduction with a Filtering Vector</b>	<b>3</b>
2.1	Signal Model	3
2.2	Linear Filtering with a Vector	5
2.3	Performance Measures	6
2.3.1	Noise Reduction	6
2.3.2	Speech Distortion	8
2.3.3	Mean-Square Error (MSE) Criterion	9
2.4	Optimal Filtering Vectors	11
2.4.1	Maximum Signal-to-Noise Ratio (SNR)	12
2.4.2	Wiener	12
2.4.3	Minimum Variance Distortionless Response (MVDR)	14
2.4.4	Prediction	16
2.4.5	Tradeoff	17
2.4.6	Linearly Constrained Minimum Variance (LCMV)	18
2.4.7	Practical Considerations	20
2.5	Summary	20
	References	21
<b>3</b>	<b>Single-Channel Noise Reduction with a Rectangular Filtering Matrix</b>	<b>23</b>
3.1	Linear Filtering with a Rectangular Matrix	23
3.2	Joint Diagonalization	26

3.3	Performance Measures . . . . .	27
3.3.1	Noise Reduction . . . . .	27
3.3.2	Speech Distortion . . . . .	28
3.3.3	MSE Criterion . . . . .	28
3.4	Optimal Rectangular Filtering Matrices . . . . .	31
3.4.1	Maximum SNR. . . . .	31
3.4.2	Wiener. . . . .	33
3.4.3	MVDR . . . . .	35
3.4.4	Prediction. . . . .	36
3.4.5	Tradeoff. . . . .	37
3.4.6	Particular Case: $M = L$ . . . . .	38
3.4.7	LCMV. . . . .	40
3.5	Summary . . . . .	40
	References . . . . .	40
<b>4</b>	<b>Multichannel Noise Reduction with a Filtering Vector. . . . .</b>	<b>43</b>
4.1	Signal Model . . . . .	43
4.2	Linear Filtering with a Vector. . . . .	45
4.3	Performance Measures . . . . .	46
4.3.1	Noise Reduction . . . . .	47
4.3.2	Speech Distortion . . . . .	48
4.3.3	MSE Criterion . . . . .	49
4.4	Optimal Filtering Vectors . . . . .	51
4.4.1	Maximum SNR. . . . .	51
4.4.2	Wiener. . . . .	52
4.4.3	MVDR . . . . .	55
4.4.4	Space–Time Prediction . . . . .	56
4.4.5	Tradeoff. . . . .	57
4.4.6	LCMV. . . . .	58
4.5	Summary . . . . .	59
	References . . . . .	59
<b>5</b>	<b>Multichannel Noise Reduction with a Rectangular Filtering Matrix. . . . .</b>	<b>61</b>
5.1	Linear Filtering with a Rectangular Matrix. . . . .	61
5.2	Joint Diagonalization . . . . .	63
5.3	Performance Measures . . . . .	64
5.3.1	Noise Reduction . . . . .	64
5.3.2	Speech Distortion . . . . .	65
5.3.3	MSE Criterion . . . . .	65

5.4	Optimal Filtering Matrices . . . . .	67
5.4.1	Maximum SNR. . . . .	67
5.4.2	Wiener. . . . .	69
5.4.3	MVDR . . . . .	71
5.4.4	Space-Time Prediction . . . . .	71
5.4.5	Tradeoff. . . . .	72
5.4.6	LCMV. . . . .	74
5.5	Summary . . . . .	75
	References . . . . .	75

Optimal Time-Domain Noise Reduction Filters

A Theoretical Study

Benesty, J.; Chen, J.

2011, VII, 79 p. 1 illus. in color., Softcover

ISBN: 978-3-642-19600-3
