

Contents

1	Introduction	1
2	Pulsations	7
2.1	Overview of Oscillation Phenomena	7
2.2	Brief Characteristics of Pulsation Models	8
2.3	Microwave Pulsations	14
2.3.1	New Observations	14
2.3.2	Theoretical Models	15
2.4	Summary	18
3	Spike Bursts	19
3.1	Morphological Analysis of Spikes in the Meter Range	20
3.1.1	Dimensions of Spike Radio Sources	27
3.1.2	Relationship of Spikes with Other Bursts	30
3.2	Millisecond Spikes in the Microwave Range	34
3.3	Interpretation of the Spike Emission	40
3.3.1	The Generation of the Spike Bursts by Electron Beams	40
3.3.2	Ion-Sound Model of Microwave Spikes	60
3.4	Summary	65
4	Zebra Pattern and Fiber Bursts	67
4.1	Observations	68
4.2	Polarization	74
4.3	Spatial Size and Positions Shifts of Zebra Pattern (ZP)	
	Radio Sources	80
4.3.1	The June 5, 1990 Event	80
4.3.2	The March 12, 1989 Event	83
4.3.3	The February 17, 1992 Event	87
4.4	Sub-Structure of Zebra Stripes	90
4.4.1	Braided Zebra Patterns	91
4.4.2	Tadpoles	92
4.4.3	Unusual Behavior of ZP	94

4.4.4 Unusual Fibers	100
4.4.5 October 25, 1994 Event: Observations	109
4.5 ZP in Microwave Range: First Zebra	112
4.5.1 The Event of October 29, 2000	112
4.5.2 The Event of April 21, 2002	114
4.5.3 A Superfine Spiky Structure of ZP in Microwave Bursts	120
4.5.4 ZP at Frequencies Around 5.7 GHz	128
4.6 Models of Fiber Bursts (FB) and Zebra Pattern (ZP)	129
4.6.1 Theory of the Continuum Emission	130
4.6.2 Theory of Fiber Bursts	130
4.6.3 Whistler Mode	132
4.6.4 Theory of Zebra Patterns	151
4.6.5 Detailed Examination of the Recent Models of ZP at DPR	162
4.6.6 New Theories of Zebra Pattern	164
4.6.7 The General Scheme of Formation of Stripes in Emission and Absorption in the Model with Whistlers	167
4.6.8 Explanation of LF Absorption	173
4.7 Discussion of the Selected Events	174
4.7.1 February 17, 1992 Event	174
4.7.2 Discussion of the October 25, 1994 Event	175
4.7.3 Discussion of May 2, 1998 Event	178
4.7.4 Centimeter Wavelengths	180
4.7.5 Discussion of the Superfine Structure of ZP	184
4.7.6 Interpretation of Rope-Like Fibers	186
4.8 Summary	190
5 Recent Results of Zebra Patterns in Solar Radio Bursts	193
5.1 New Observations	193
5.1.1 2004 July 24 Event	193
5.1.2 2004 November 3 Event	195
5.1.3 2006 December 13 Event	198
5.1.4 Other Events	212
5.2 General Discussion of the Events	216
5.2.1 2004 July 24 and November 3 Events	216
5.2.2 Other Events	218
5.2.3 2006 December 13 Event	219
5.3 New Theories of ZPS	224
5.3.1 What Is New In Improved DPR-Based ZP Theories?	224
5.3.2 Models of ZP Formation During Radio Wave Propagation in the Corona	232
5.3.3 Other Recent Models	238

5.4 Fine Structure of Decametric Type II Radio Bursts	241
The Radio Burst Fine Structure in the 18.5–29.5 MHz	
Frequency Band	242
The Fine Structure of the July 17, 2002 Radio Burst	
in the 18.5–29.5 MHz Frequency Band	246
Discussion	246
5.5 Fine Structure of Solar Radio Bursts Observed in Interplanetary	
Space	250
December 12 1997 Event	252
May 2 1998 Event (Observations)	253
September 17 2001 Event (Observations)	253
November 3, 2003 Event (Observations)	256
November 13, 2003 Event (Observations)	258
Other Events	261
Striae in Type III Bursts	263
General Discussion	264
5.6 Summary	267
References	271
Index	279
