

# Contents

1.	The Wondrous Universe .....	1
1.1	The Starry Heavens .....	1
1.2	Particles and Fields .....	3
1.3	Physics and Religion .....	8
2.	The World at Large: From the Big Bang to Black Holes .....	13
2.1	Immediate Experiences: A Play of Thoughts .....	13
2.2	Cosmology .....	17
2.2.1	The Darkness of the Night Sky .....	17
2.2.2	The Life-Cycle of the Stars .....	18
2.2.3	The Galaxies .....	22
2.2.4	The Expansion of the World, and the Cosmic Microwave Background .....	25
2.2.5	The Cosmological Model .....	31
2.2.6	Accelerated Expansion .....	35
2.2.7	Curved Space .....	36
2.2.8	Redshift and Evolution in Time .....	39
2.2.9	A Time-Lapse Picture .....	41
2.3	Formation of Structures in the Universe .....	42
2.3.1	Deuterium, Helium, and Lithium .....	42
2.3.2	Structure Formation .....	43
2.3.3	The Luminous Matter .....	44
2.3.4	Dark Matter in Galaxies .....	45
2.3.5	Dark Matter in Clusters of Galaxies .....	46
2.3.6	Nonbaryonic Dark Matter .....	47
2.3.7	Galaxy Formation .....	48
2.3.8	Dark Halos and Luminous Galaxies .....	48
2.3.9	Stars and Elements .....	53
2.4	The Cosmic Microwave Background (CMB) .....	53
2.4.1	Acoustic Oscillations in the Early Universe .....	55
2.4.2	Dark Matter and Dark Energy .....	60
2.4.3	An Effect of Five Percent .....	62
2.5	The First Second .....	63
2.5.1	The Inflationary Model .....	64
2.5.2	The Beginning .....	70

2.6	The Anthropic Principle.....	72
2.7	How Will It End?.....	76
2.8	Extremes of Space and Time: Big Bang and Black Holes.....	78
2.8.1	Space and Time .....	80
2.8.2	Gravity .....	88
2.8.3	Black Hole Basics .....	90
2.8.4	Gravitational Collapse .....	94
2.8.5	Quantum Theory and Black Holes .....	96
2.8.6	Space and Time Arise and Decay.....	98
3.	The Deep Underground: Quantum World and Elementary Particles .....	101
3.1	The Fundamental Building Blocks of Matter .....	102
3.2	Reactions Between Elementary Particles .....	107
3.2.1	Quantum Field Theory.....	108
3.2.2	The Fundamental Forces .....	110
3.2.3	Elementary Particles .....	112
3.2.4	The Quarks .....	114
3.3	Symmetries and Conservation Laws .....	116
3.4	Unification of Interactions .....	117
3.4.1	Spontaneous Symmetry Breaking.....	118
3.4.2	The Electroweak Interaction .....	120
3.4.3	The Strong Interaction .....	122
3.5	The “Standard Model” .....	123
3.6	Grand Unification .....	124
3.7	A Theory of Everything.....	127
3.7.1	Superstring Theory.....	127
3.7.2	Stable Fields and Volatile Matter.....	129
3.8	The Strange Reality of the Quantum World .....	130
3.8.1	Particle, Wave, Field.....	130
3.8.2	Deflection at a Slit .....	131
3.8.3	The Change of the Particle Concept: Heisenberg’s Uncertainty Relation.....	133
3.9	What Is the Reality Described by Quantum Theory? .....	133
3.9.1	A Few Mathematical Remarks .....	136
3.9.2	Attempts to Interpret Quantum Mechanics ...	138
3.9.3	The EPR Paradox.....	141
3.9.4	Bell’s Inequality.....	142
3.9.5	The Aspect Experiment.....	143
3.9.6	Entangled States .....	144
3.10	Transcendence? .....	145

4. Boundaries and Transgressions .....	147
4.1 Impact and Meaning of the Scientific View of the World .....	147
4.2 Where Science and Religion Touch .....	151
4.2.1 Straightforward Influences .....	152
4.2.2 The Story of Creation: In the Bible and in Modern Science.....	152
4.3 The End.....	155
4.4 Metaphors from Physics.....	155
4.4.1 Complementarity .....	156
4.5 The Origin of Life.....	157
4.6 Consciousness.....	160
4.7 The Argument from Design .....	166
4.7.1 The Strong Anthropic Principle .....	167
4.7.2 Creationism .....	169
4.7.3 Intelligent Design.....	169
4.7.4 Summary.....	170
4.8 The Origin of the Cosmos .....	171
4.9 A Principle of Creation .....	173
4.10 Synopsis .....	178
Bibliography .....	183

The Wondrous Universe

Creation without Creator?

Börner, G.

2011, VII, 184 p. 37 illus., 13 illus. in color., Softcover

ISBN: 978-3-642-20103-5
