

Contents

| | | |
|----------|--|----|
| 1 | Elementary Results | 1 |
| 1.1 | Basic Notations and Basic Definitions | 1 |
| 1.1.1 | Radon Measures and Integration Theory | 1 |
| 1.1.2 | Locally Compact Groups | 3 |
| 1.1.3 | Convolution of Measures and Functions | 5 |
| 1.1.4 | Amenable Groups | 6 |
| 1.2 | Convolution Operators | 7 |
| 1.3 | For G Abelian $CV_2(G)$ is Isomorphic to $L^\infty(\widehat{G})$ | 12 |
| 1.4 | For G Abelian $CV_p(G)$ is Isomorphic to $CV_{p'}(G)$ | 16 |
| 1.5 | $CV_p(G)$ as a Subspace of $CV_2(G)$ | 18 |
| 1.6 | The Fourier Transform of a Convolution Operator | 20 |
| 2 | The Commutation's Theorem | 25 |
| 2.1 | The Convolution Operator $T\lambda_G^p(f)$ | 25 |
| 2.2 | A Commutation Property of $CV_2(G)$ | 28 |
| 2.3 | An Approximation Theorem for $CV_2(G)$ | 31 |
| 3 | The Figa-Talamanca Herz Algebra | 33 |
| 3.1 | Definition of $A_p(G)$ | 33 |
| 3.2 | $A_2(G)$ for G Abelian | 39 |
| 3.3 | $A_p(G)$ is a Banach Algebra | 41 |
| 4 | The Dual of $A_p(G)$ | 45 |
| 4.1 | The Dual of $A_p(G)$: The Notion of Pseudomeasure | 45 |
| 4.2 | Applications to Abelian Groups | 52 |
| 4.3 | Holomorphic Functions Operating on $A_p(G)$ | 56 |
| 5 | $CV_p(G)$ as a Module on $A_p(G)$ | 65 |
| 5.1 | The Convolution Operator $(\bar{k} * \check{l})T$ | 65 |
| 5.2 | The Convolution Operator uT | 68 |

| | | |
|----------|---|------------|
| 5.3 | $CV_p(G)$ as a Module on $A_p(G)$ | 75 |
| 5.4 | Approximation of T by $(k * \check{l})T$ for an Amenable G | 80 |
| 6 | The Support of a Convolution Operator | 85 |
| 6.1 | Definition of the Support of a Convolution Operator..... | 85 |
| 6.2 | Characterization of the Support of a Pseudomeasure | 88 |
| 6.3 | A Generalization of Wiener's Theorem | 91 |
| 6.4 | An Approximation Theorem | 94 |
| 6.5 | Application to Amenable Groups | 96 |
| 7 | Convolution Operators Supported | |
| | by Subgroups | 101 |
| 7.1 | The Image of a Convolution Operator | 101 |
| 7.2 | On the Operator $i(T)$ | 107 |
| 7.3 | A Canonical Isometry of $CV_p(H)$ into $CV_p(G)$ | 112 |
| 7.4 | The Support of $i(T)$ | 118 |
| 7.5 | Theorems of de Leeuw and Saeiki | 122 |
| 7.6 | The Image of the Map i | 124 |
| 7.7 | First Applications: The Theorem of Kaplansky–Helson | 133 |
| 7.8 | A Restriction Property for A_p | 136 |
| 7.9 | Subgroups as Sets of Synthesis..... | 141 |
| 8 | $CV_p(G)$ as a Subspace of $CV_2(G)$ | 145 |
| 8.1 | A Canonical Map of $\mathcal{L}(L^p(X, \mu))$ into $\mathcal{L}(L^p_{\mathcal{H}}(X, \mu))$ | 145 |
| 8.2 | An Integral Formula for $(T\lambda_G^p(\alpha))_{L^2(G)}$ | 150 |
| 8.3 | $CV_2(G)$ and $CV_p(G)$ in Amenable Groups | 156 |
| | Notes | 161 |
| | References | 167 |
| | List of Definitions | 171 |
