1	What is Risk Management	1
1.1	Introduction	1
1.1.1	Raison D'être of Risk Management	1
1.1.2	The Role of Risk Management	3
1.1.3	Three Lines of Defence in Risk Management	4
1.2	Principles	4
1.2.1	Risk Categories	5
1.3	Risk Management Process	6
1.4	Risk Management Policies and Risk Landscape	9
2	The Role of the Balance Sheets and of Capital	15
2.1	The Balance Sheet of an Insurance Company	15
2.2	Role of Valuation	16
2.2.1	Valuation Methods	16
2.2.2	Principle of No Arbitrage	17
2.2.3	Reconciliation of Balance Sheets	19
2.3	Bonds	19
2.4	Shares	30
2.5	Other Assets	32
2.6	Insurance Liabilities	33
2.6.1	Life Insurance Model	34
2.6.2	Capital Insurance	36
2.6.3	Pure Endowment	39
2.6.4	Annuities	39
2.6.5	Cash Flows and Valuation	41
2.6.6	Primer on Life Insurance Risks	43
2.7	Shareholders Equity and Capital	44

3	Accounting Principles	47
3.1	Statutory Accounting	48
3.2	IFRS and US GAAP Accounting	49
3.3	Embedded Value and Economic Accounting	51
3.3.1	Economic Valuation / Market Consistent Embedded Value	51
3.3.2	Valuation Methodology Revisited	55
3.4	Formulae	57
3.5	Examples	58
3.5.1	Annuity	58
3.5.2	Capital Protection	61
4	Risk Appetite and Tolerance	65
4.1	Risk Capacity and Risk Appetite	65
4.2	Limit Systems	70
4.3	Hedging Strategies and Response Strategies	72
4.4	Introduction: Use of Capital	74
4.4.1	Definition of the Risk Factors Considered	75
4.4.2	Probability Density Functions per Risk Factor	75
4.4.3	Valuation Methodology	76
4.4.4	Risk Measures	77
4.5	Risk Measures	78
4.5.1	Value at Risk (VaR)	80
4.5.2	Tail Value at Risk (TVaR)	80
4.5.3	Relationship Between Value at Risk and Expected Shortfall	81
4.5.4	What Is a Stress Scenarios Mathematically	83
5	Key Insurance Processes and Their Risks	85
5.1	Capital Allocation and Planning Process	87
5.2	Economic Capital Calculation Process	90
5.3	ALM and Bonus Setting Process	91
5.4	Product Design Process	94
6	Financial Risks and Their Modelling	97
6.1	The Model Underlying Financial Risks	97
6.2	Approximations	100
6.3	Concrete Implementation	103
6.4	Interpreting the Results	110
6.4.1	Notation	111
6.4.2	Scenarios	112
6.4.3	What Can and What Cannot Be Done with This	112
6.5	Reporting Example	113

6.5.1	Summary	113
6.5.2	Decomposition of VaR	114
6.5.3	Figures	116
6.5.4	Scenarios	117
6.5.5	ICA Capital	119
6.5.6	Stress Tests	120
6.5.7	Limits	121
6.6	Summary Reporting Example	121
7	Insurance Risks	123
7.1	Method for Allocation of Capital	123
7.1.1	Steps Required	124
7.1.2	Probability Density Functions per Risk Factor	124
7.1.3	Diversification	124
7.2	Stochastic Models Used	124
7.2.1	Mortality	124
7.2.2	Longevity	131
7.3	Concrete Example: An Annuity Portfolio	133
7.3.1	Formulae	135
7.3.2	Application to Insurance Linked Securities	137
7.3.3	Statistics	140
7.3.4	Allocation of Risk Capital in Proportion to Premium	143
7.3.5	Reporting Templates	144
8	Operational Risks	147
8.1	Introduction	147
8.2	Risk Appetite	149
8.3	Risk Measurement and Exposure	150
8.4	Controlling Process in General and Embedding Risk Policies	151
8.4.1	Strategy & Planning	152
8.4.2	Distribution Management	152
8.4.3	Brand & Marketing Communications	153
8.4.4	Corporate Social Responsibility	153
8.4.5	Environment	154
8.4.6	Regulatory	154
8.4.7	Information Technology	154
8.4.8	Financial Crime	155
8.4.9	Business Protection	156
8.4.10	People	157
8.4.11	Outsourcing	157
8.4.12	Communications	157

8.4.13	Legal	158
8.4.14	Financial Reporting	158
8.4.15	External Auditor	158
8.4.16	Taxation	159
8.4.17	General Insurance Reserving	160
8.4.18	Life Reserving	160
8.4.19	Capital Management	160
8.4.20	Credit	161
8.4.21	Market	162
8.4.22	Derivatives	162
8.4.23	Liquidity	163
8.4.24	Foreign Exchange	164
8.4.25	Mergers & Acquisitions	164
8.4.26	Risk Management & Internal Control	165
8.4.27	Life Insurance Risk	165
8.4.28	Life Insurance Product Development & Pricing	166
8.4.29	Unit Pricing	166
8.4.30	General Insurance Underwriting	166
8.4.31	General Insurance Reinsurance	167
8.4.32	General Insurance Claims	168
9	Capital Models and Integrated Risk Management	169
9.1	Introduction	169
9.2	Bringing the Puzzle Together	170
9.3	Diversification	172
10	Risk Adjusted Performance Metrics	175
10.1	Introduction	175
10.2	Performance and Value Metrics	176
10.2.1	IBNR Reserves	177
10.2.2	Financial Options	177
10.2.3	Frictional Capital Costs	178
10.2.4	Duration of Projection	179
10.2.5	Formulae	179
10.2.6	Example	180
10.3	Examples	182
10.4	Capital Allocation Process	184
11	Risk Management in a Group and Intra-group Transactions	189
11.1	Introduction	189
11.2	Risk and Capital Transfer Instruments	191

11.2.1	Internal Loans	192
11.2.2	Internal Hybrids	193
11.2.3	Cashpools	193
11.2.4	Guarantees	193
11.2.5	GI / Life Reinsurance Contracts	194
11.3	Ranking of RCTI's	195
11.4	Modelling	195
12	Products and Their Risks	197
12.1	Nuptialite	198
12.2	Index Linked Products and Other Contractual Issues	200
12.3	Variable Annuities	202
12.4	Investment Guarantees and Bonus Rates	207
12.5	Longevity and the Ability to Forecast	212
12.6	Long Term Care	213
12.7	Imperfect Cash Flows Matching	218
13	Emerging Risks	223
13.1	What Are Emerging Risks and Why Are They Important?	223
13.2	What Process Is Needed for Emerging Risks?	225
14	Regulatory View on Risk Management: Solvency II	227
14.1	Introduction	227
14.2	What Is Solvency II?	229
14.3	Economic Balance Sheet and Prudence	231
14.4	Risk Modelling and Internal Models	232
14.5	Good Regulation	233
14.6	Swiss Solvency Test	234
14.7	Solvency II Standard Model	237
14.7.1	Structure of the Model	238
14.7.2	Market Submodule	239
14.8	Quo Vadis?	242
15	Governance and Organisation	243
15.1	Governance	243
15.1.1	Definitions	244
15.1.2	Generic Governance	245
15.1.3	Escalation Processes	246
15.2	Effective Governance	246
15.3	Risk Governance and Oversight Framework	247
15.4	Principles of Effective Oversight	247

15.5	Board Oversight	247
15.6	Management Oversight	248
15.7	Why Risk Management Committees Are Important	248
15.8	How Do Risk Management Committees Work	249
15.9	Terms of Reference of a Risk Committee	249
15.10	Roles and Responsibilities	253
15.10.1	Duties of the Line Management	253
15.10.2	Duties of the Chief Risk Officer	254
15.10.3	Duties of the Group Internal Audit	256
15.10.4	Risk Relevant Parts Within Job Descriptions	257
15.11	Decomposition of the Risk Management Process	258
15.11.1	Data and Systems	259
A	Stochastic Processes	261
A.1	Definitions	261
A.2	Markov Chains with Countable State Space	264
A.3	Mean Excess Function	266
A.4	Deterministic Cash Flow Streams	268
A.5	Random Cash Flows	269
B	Application of the Markov Model to Life Insurance	271
B.1	Traditional Rating of Life Contracts	271
B.2	Life Insurance Considered as Random Cash Flows	272
B.3	Reserves, Recursion and Premiums	274
C	Abstract Valuation	277
C.1	Framework	277
C.2	Cost of Capital	281
C.3	Inclusion in the Markov Model	287
C.4	Asset Liability Management	289
D	An Introduction to Arbitrage Free Pricing	297
D.1	Price Systems	297
D.1.1	Definitions	297
D.1.2	Arbitrage	299
D.1.3	Continuous Case	302
D.2	The Black-Scholes Set Up	303
D.2.1	Endowment Policies	306
D.2.2	Term Insurance	307
D.3	Thiele's Differential Equation	308

E	An Introduction to Stochastic Integration	313
E.1	Stochastic Processes and Martingales	313
E.2	Stochastic Integral	315
E.3	Properties of the Stochastic Integral	319
F	CERA Comparison	323
F.1	Enterprise Risk Management Concept and Framework	323
F.2	ERM Process (Structure of the ERM Function and Best Practices) .	324
F.3	Risk Categories and Identification	324
F.4	Risk Modelling and Aggregation of Risks	325
F.5	Risk Measures	325
F.6	Risk Management Tools and Techniques	326
F.7	Economic Capital	326
	References	327
