## Part I Derivatives Pricing Basics

<b>1</b>	<b>Pricing by Replication</b>	3
1.1	Underlyings and Derivatives	3
1.2	Assumptions	4
1.3	The No-Arbitrage Assumption	5
1.4	Replication	6
<b>2</b>	<b>Static Replication</b>	9
2.1	Forward Contracts	9
2.2	European Options	10
2.3	Non-Linear Payoffs	10
2.4	European Option Price Constraints	13
2.5	American and Bermudan Options	15
2.6	Barrier Options	16
2.7	Model-Dependent Pricing	17
<b>3</b>	<b>Dynamic Replication</b>	19
3.1	Naive Replication of European Options	19
3.2	Dynamic Strategies	21
3.3	Replication of Fixed-Time Payoffs	24
3.4	The Black–Scholes Formula	24
3.5	Analysis of the Black–Scholes Formula	28
3.6	Implied Volatility	30
3.7	Relations between PDEs and SDEs	32
3.8	The Fundamental Theorem of Asset Pricing	34
3.9	Expectation of Non-Linear Payoffs	36
3.10	Futures Contracts	37
3.11	Settlement Lag	40
	Bibliography	42

<b>4</b>	<b>Derivatives Modeling in Practice</b>	43
4.1	Model Applications	43
4.2	Calibration	45
4.3	Risk Management	53
4.4	Model Limitations	69
4.5	Testing	73
	Bibliography	78
 <b>Part II Skew and Smile Techniques</b>		
<b>5</b>	<b>Continuous Stochastic Processes</b>	81
5.1	The Linear SDE	82
5.2	The Lognormal SDE	82
5.3	The Normal SDE	84
5.4	The Shifted Lognormal SDE	86
5.5	The Quadratic SDE	88
5.6	The Ornstein-Uhlenbeck Process	90
5.7	The Brownian Bridge	91
5.8	The CEV Process	93
5.9	The Bessel Process	98
5.10	Non-Analytic SDEs	102
	Bibliography	105
<b>6</b>	<b>Local Volatility Models</b>	107
6.1	ATM Perturbation	108
6.2	Dupire's Equation	113
6.3	Short Maturity Expansion	114
6.4	Dynamics	117
	Bibliography	117
<b>7</b>	<b>Stochastic Volatility Models</b>	119
7.1	Skew and Smile	120
7.2	Perturbation for Small Volatility of Volatility	123
7.3	Conditional Expectation Approach	129
7.4	Fourier Transform Approach	130
7.5	Comparison of Methods	134
7.6	Relations to Implied and Local Volatility	135
7.7	Dynamics	136
7.8	Local Stochastic Volatility	138
	Bibliography	138
<b>8</b>	<b>Lévy Models</b>	139
8.1	Lévy Processes	140
8.2	Lévy-Ito Decomposition	141
8.3	Stochastic Calculus	144
8.4	Examples of Lévy Processes	147

8.5	Pricing .....	154
8.6	Dynamics .....	154
	Bibliography .....	155

### **Part III Exotic Derivatives**

<b>9</b>	<b>Path-Dependent Derivatives</b> .....	159
9.1	Barrier Options .....	161
9.2	Volatility Products .....	168
9.3	American Options .....	170
9.4	Callable Products .....	174
	Bibliography .....	176
<b>10</b>	<b>High-Dimensional Derivatives</b> .....	177
10.1	Copulas .....	177
10.2	Variable Freezing .....	180
10.3	Moment Matching .....	181
10.4	Quadratic Functional Modeling .....	182
10.5	Change of Measure .....	186
10.6	Digital Options .....	186
10.7	Spread Options .....	188
10.8	Correlations .....	189
10.9	Calibration .....	190
	Bibliography .....	191

### **Part IV Asset Class Specific Modeling**

<b>11</b>	<b>Equities</b> .....	195
11.1	Stylized Facts .....	196
11.2	Dividends .....	196
11.3	More Advanced Models .....	199
11.4	Volatilities and Correlations .....	200
<b>12</b>	<b>Commodities</b> .....	201
12.1	Commodities Trading and Investment .....	202
12.2	Commodity Price Characteristics .....	205
12.3	Commodities Derivatives Modeling .....	209
12.4	Volatilities and Correlations .....	214
	Bibliography .....	219
<b>13</b>	<b>Interest Rates</b> .....	221
13.1	Interest Rates and Conventions .....	222
13.2	Static Replication .....	224
13.3	Caps, Floors and Swaptions .....	226
13.4	Convexity Adjustment .....	231
13.5	The Yield Curve .....	236

13.6	Yield Curve Instruments .....	238
13.7	Yield Curve Construction.....	240
13.8	Yield Curve Modeling .....	241
13.9	The Gaussian Model .....	243
13.10	Derivation of the Pricing Formula .....	244
13.11	Change of Measure .....	248
13.12	Local Volatility .....	249
13.13	Stochastic Volatility.....	250
13.14	Inclusion of Jumps .....	253
13.15	The Hull-White Model .....	257
13.16	Markov-Functional Models .....	262
13.17	LIBOR Market Models .....	264
13.18	Swap Market Models .....	266
13.19	Including Adjusters .....	268
13.20	Volatilities and Correlations .....	269
13.21	Interest Rate Effects on Other Asset Classes .....	272
13.22	Overnight Index Swaps .....	273
13.23	Collateral .....	275
13.24	Credit and Liquidity Risk.....	276
13.25	Interest Rate Surface Construction .....	277
13.26	Caps, Floors and Swaptions Revisited .....	278
13.27	Interest Rate Surface Modeling .....	279
	Bibliography .....	280
<b>14</b>	<b>Foreign Exchange.....</b>	<b>281</b>
14.1	Static Replication .....	282
14.2	FX Options .....	283
14.3	Stochastic Volatility.....	285
14.4	Exotics.....	286
14.5	Modeling Foreign Underlyings.....	286
14.6	Quantos.....	288
14.7	Volatilities and Correlations .....	289
14.8	Volatility Interpolation .....	290
14.9	Numerator .....	290
14.10	Conventions .....	291
14.11	FX Swaps and Cross Currency Swaps .....	294
14.12	Credit and Liquidity Risk.....	295
	Bibliography .....	296
<b>A</b>	<b>Mathematical Preliminaries.....</b>	<b>297</b>
A.1	Measure Theory, Random Variables and Integration .....	297
A.2	The Gaussian Distribution .....	298
A.3	Copulas .....	299
A.4	Processes .....	301
A.5	Brownian Motion .....	301
A.6	Total Variation and Bounded Variation .....	304

A.7	Martingales .....	304
A.8	Integrals with Martingales .....	307
A.9	Ito's Lemma .....	308
A.10	Lévy's Characterization of the Brownian Motion .....	309
A.11	Measure Change and Girsanov's Theorem .....	310
A.12	No-Arbitrage Pricing .....	311
<b>Index</b>	.....	<b>315</b>
