# Contents

<b>1</b>	<b>Preliminaries</b>	1
1.1	Complex Manifolds and Holomorphic Mappings	1
1.2	Examples of Complex Manifolds	4
1.3	Subvarieties and Complex Spaces	7
1.4	Holomorphic Fiber Bundles	10
1.5	Holomorphic Vector Bundles	13
1.6	The Tangent Bundle	18
1.7	The Cotangent Bundle and Differential Forms	22
1.8	Plurisubharmonic Functions and the Levi Form	25
1.9	Vector Fields, Flows and Foliations	30
1.10	Jet Bundles, Holonomic Sections and the Homotopy Principle	39
<b>2</b>	<b>Stein Manifolds</b>	43
2.1	Domains of Holomorphy	43
2.2	Stein Manifolds and Stein Spaces	47
2.3	Characterization by Plurisubharmonic Functions	50
2.4	Cartan-Serre Theorems A & B	52
2.5	The $\bar{\partial}$ -Problem	55
<b>3</b>	<b>Stein Neighborhoods and Holomorphic Approximation</b>	57
3.1	$Q$ -Complete Neighborhoods	57
3.2	Stein Neighborhoods of Stein Subvarieties	62
3.3	Holomorphic Retractions onto Stein Submanifolds	66
3.4	A Semiglobal Holomorphic Extension Theorem	68
3.5	Totally Real Submanifolds	71

3.6	Stein Neighborhoods of Certain Laminated Sets . . . . .	75
3.7	Stein Compacts with Totally Real Handles . . . . .	78
3.8	Thin Strongly Pseudoconvex Handlebodies . . . . .	82
3.9	Morse Critical Points of $q$ -Convex Functions . . . . .	88
3.10	Crossing a Critical Level of a $q$ -Convex Function . . . . .	91
3.11	The Topological Structure of a Stein Space . . . . .	96
<b>4</b>	<b>Automorphisms of Complex Euclidean Spaces . . . . .</b>	<b>99</b>
4.1	Shears . . . . .	100
4.2	Automorphisms of $\mathbb{C}^2$ . . . . .	102
4.3	Attracting Basins and Fatou-Bieberbach Domains . . . . .	106
4.4	Random Iterations and the Push-Out Method . . . . .	114
4.5	Mittag-Leffler Theorem for Entire Maps . . . . .	116
4.6	Tame Discrete Sets in $\mathbb{C}^n$ . . . . .	118
4.7	Unavoidable and Rigid Discrete Sets . . . . .	120
4.8	Algorithms for Vector Fields . . . . .	123
4.9	The Andersén-Lempert Theorem . . . . .	125
4.10	The Density Property . . . . .	130
4.11	Automorphisms Fixing a Subvariety . . . . .	138
4.12	Moving Polynomially Convex Sets . . . . .	143
4.13	Moving Totally Real Submanifolds . . . . .	146
4.14	Controlling Unbounded Curves . . . . .	149
4.15	Automorphisms with Given Jets . . . . .	153
4.16	A Mittag-Leffler Theorem for Automorphisms of $\mathbb{C}^n$ . . . . .	158
4.17	Interpolation by Fatou-Bieberbach Maps . . . . .	164
4.18	Twisted Holomorphic Embeddings $\mathbb{C}^k \hookrightarrow \mathbb{C}^n$ . . . . .	168
4.19	Nonlinearizable Periodic Automorphisms of $\mathbb{C}^n$ . . . . .	172
4.20	Non-Runge Fatou-Bieberbach Domains and Long $\mathbb{C}^n$ 's . . . . .	177
4.21	Serre's Problem on Stein Bundles . . . . .	180
<b>5</b>	<b>Oka Manifolds . . . . .</b>	<b>185</b>
5.1	A Historical Introduction to the Oka Principle . . . . .	185
5.2	Cousin Problems and Oka's Theorem . . . . .	187
5.3	The Oka-Grauert Principle . . . . .	190
5.4	What is an Oka Manifold? . . . . .	192
5.5	Examples of Oka Manifolds . . . . .	198
5.6	An Application of Michael's Selection Theorem . . . . .	207

5.7	Cartan Pairs .....	209
5.8	A Splitting Lemma .....	211
5.9	Gluing Local Holomorphic Sprays .....	215
5.10	Noncritical Strongly Pseudoconvex Extensions .....	218
5.11	Proof of the Main Theorem: The Basic Case .....	222
5.12	Proof of the Main Theorem: Stratified Fiber Bundles .....	224
5.13	Proof of the Main Theorem: The Parametric Case .....	229
5.14	Existence Theorems for Holomorphic Sections .....	233
5.15	Equivalences Between Oka Properties .....	234
5.16	Open Problems .....	237
<b>6</b>	<b>Elliptic Complex Geometry and Oka Principle .....</b>	<b>241</b>
6.1	Holomorphic Fiber-Sprays and Elliptic Submersions .....	242
6.2	Gromov's Oka Principle .....	243
6.3	Composed and Iterated Sprays .....	245
6.4	Examples of Subelliptic Manifolds and Submersions .....	249
6.5	Lifting Homotopies to Spray Bundles .....	259
6.6	Runge's Theorem for Sections of Subelliptic Submersions .....	263
6.7	Gluing Holomorphic Sections on $\mathcal{C}$ -Pairs .....	267
6.8	Complexes of Holomorphic Sections .....	269
6.9	$\mathcal{C}$ -Strings .....	272
6.10	Construction of the Initial Holomorphic Complex .....	275
6.11	The Main Modification Lemma .....	277
6.12	Proof of Gromov's Oka Principle .....	283
6.13	Relative Oka Principle on 1-Convex Spaces .....	286
6.14	Oka Maps .....	287
<b>7</b>	<b>Applications .....</b>	<b>291</b>
7.1	Principal Fiber Bundles .....	291
7.2	The Oka-Grauert Principle for $G$ -Bundles .....	294
7.3	Homomorphisms and Generators of Vector Bundles .....	299
7.4	Generators of Coherent Analytic Sheaves .....	303
7.5	The Number of Equations Defining a Subvariety .....	306
7.6	Elimination of Intersections .....	310
7.7	The Holomorphic Vaserstein Problem .....	312
7.8	Transversality Theorems for Holomorphic Maps .....	315
7.9	Singularities of Holomorphic Maps .....	323
7.10	Approximation by Algebraic Maps .....	325
7.11	Towards Quantitative Oka Theory .....	330

<b>8</b>	<b>Embeddings, Immersions and Submersions</b>	333
8.1	Generic Almost Proper Mappings	334
8.2	Embedding Stein Manifolds into Euclidean Spaces of Minimal Dimension	337
8.3	Proof of the Relative Embedding Theorem	340
8.4	Weakly Regular Embeddings and Interpolation	346
8.5	The H-Principle for Holomorphic Immersions	350
8.6	The Oka Principle for Proper Holomorphic Maps	352
8.7	A Splitting Lemma for Biholomorphic Maps	358
8.8	Conformal Diffeomorphisms of Bordered Riemann Surfaces	365
8.9	Embedding Bordered Riemann Surfaces in $\mathbb{C}^2$	369
8.10	Some Infinitely Connected Riemann Surfaces in $\mathbb{C}^2$	375
8.11	Approximation of Holomorphic Submersions	381
8.12	Noncritical Holomorphic Functions on Stein Manifolds	386
8.13	The H-Principle for Holomorphic Submersions	393
8.14	Closed Holomorphic One-Forms Without Zeros	394
8.15	Holomorphic Foliations on Stein Manifolds	396
<b>9</b>	<b>Topological Methods in Stein Geometry</b>	401
9.1	The H-Principle for Totally Real Immersions	402
9.2	Real Surfaces in Complex Surfaces	406
9.3	Invariants of Smooth 4-Manifolds	411
9.4	Lai Indexes and Index Formulas	413
9.5	Cancelling Pairs of Complex Points	417
9.6	Applications of the Cancellation Theorem	421
9.7	The Adjunction Inequality in Kähler Surfaces	426
9.8	The Adjunction Inequality in Stein Surfaces	434
9.9	Well Attached Handles	438
9.10	Stein Structures and the Soft Oka Principle	446
9.11	The Case $\dim_{\mathbb{R}} X \neq 4$	450
9.12	Exotic Stein Structures on Smooth 4-Manifolds	453
	<b>References</b>	461
	<b>Index</b>	485

Stein Manifolds and Holomorphic Mappings  
The Homotopy Principle in Complex Analysis

Forstnerič, F.

2011, XII, 492 p., Hardcover

ISBN: 978-3-642-22249-8
