

# Contents

- 1 Haptics: General Principles** ..... 1
  - 1.1 Introduction ..... 1
  - 1.2 Human Senses ..... 1
    - 1.2.1 Vision ..... 1
    - 1.2.2 Audition ..... 2
    - 1.2.3 Touch ..... 2
    - 1.2.4 What Does the Sense of Touch Do for Us? ..... 3
  - 1.3 Haptics Exploration..... 3
  - 1.4 Concepts and Terminology ..... 5
  - 1.5 Roadmap to Multimedia Haptics..... 7
    - 1.5.1 Path 1: Human Haptics ..... 9
    - 1.5.2 Path 2: Machine Haptics ..... 9
    - 1.5.3 Path 3: Computer Haptics ..... 11
    - 1.5.4 The Roundabout: Multimedia Haptics ..... 13
  - 1.6 Haptic-Audio-Visual Multimedia System ..... 14
  - 1.7 Case Study: HugMe Interpersonal Communication System..... 16
  - 1.8 Roadmap of the Book ..... 18
    - 1.8.1 Haptic Applications and Research Challenges ..... 18
    - 1.8.2 General Principles in Haptic Multimedia Systems and Human Haptic Perception..... 19
    - 1.8.3 Haptic Interfaces and Rendering ..... 19
    - 1.8.4 Haptic Audio Visual Environment ..... 19
  - 1.9 Further Reading about Haptics ..... 20
- 2 Haptics: Haptics Applications** ..... 21
  - 2.1 Introduction ..... 21
  - 2.2 Haptic Evolution: From Psychophysics to Multimedia ..... 21
  - 2.3 Haptics for Medical Applications ..... 23
    - 2.3.1 Surgical Simulations ..... 23
    - 2.3.2 Stroke-Based Rehabilitation ..... 26
    - 2.3.3 Support of the Visually Impaired..... 28

2.4	Tele-Robotics and Tele-Operation .....	31
2.4.1	Tele-Surgery .....	32
2.4.2	Military Applications .....	33
2.5	Media.....	33
2.5.1	Haptic Broadcasting .....	34
2.5.2	E-Commerce .....	35
2.5.3	Video Games .....	36
2.5.4	Arts and Design .....	37
2.6	Mobile Haptics.....	38
2.7	Haptics and Virtual reality .....	40
2.8	Education and Learning .....	41
2.9	Haptics for Security .....	41
2.10	Closing Remarks.....	43
<b>3</b>	<b>Human Haptic Perception .....</b>	<b>45</b>
3.1	Introduction .....	45
3.2	Touch and Cognition .....	45
3.3	Human Haptic System.....	46
3.3.1	Mechanical Structure of the Arm-Hand Haptic System....	47
3.3.2	Human Sensory System .....	50
3.3.3	The Motor System .....	53
3.3.4	Haptic Cognition .....	54
3.3.5	Haptic Exploration .....	55
3.3.6	Exploration of Perceptual Metrics .....	57
3.4	Concept of Illusion .....	59
3.5	Human Perceptual Parameters for Haptic Interface Development .....	60
3.5.1	Human Factors in the Design of Haptic Interfaces .....	61
3.5.2	Perception Thresholds .....	62
3.6	Closing remarks.....	66
<b>4</b>	<b>Machine Haptics .....</b>	<b>67</b>
4.1	Introduction .....	67
4.2	Haptic Interfaces .....	68
4.2.1	Robotics Perspective .....	68
4.2.2	Haptic Interface System .....	70
4.3	HAVE Sensors .....	71
4.3.1	Electromechanical Sensors .....	72
4.3.2	Optical Sensors.....	73
4.3.3	Capacitive Sensors .....	73
4.3.4	Resistive Sensors .....	74
4.3.5	Force Sensors .....	75
4.3.6	Strain Gauge Sensors .....	75
4.3.7	Magnetic Sensors .....	75
4.4	HAVE Actuators .....	76
4.4.1	Magnetic Levitation Devices .....	77
4.4.2	Nonholonomic Devices .....	77

4.4.3	Magnetic Sensors .....	78
4.4.4	Parallel Mechanisms .....	79
4.5	Performance Specifications .....	79
4.5.1	Physical Attributes .....	79
4.5.2	Spatial Attributes .....	81
4.5.3	Temporal Attributes .....	82
4.6	State-of-the-Art Haptic Interfaces .....	82
4.6.1	Tactile Interfaces: Commercial Development .....	83
4.6.2	Tactile Interface Research Prototypes .....	88
4.6.3	Kinesthetic Interfaces .....	91
4.6.4	Research and Development Efforts in Kinesthetic Haptic Displays .....	101
4.7	Final Remarks .....	103
<b>5</b>	<b>Computer Haptics .....</b>	<b>105</b>
5.1	Introduction .....	105
5.2	Haptic Rendering Subsystem .....	106
5.3	Polygon-Based Representation and Scene Graph .....	107
5.4	Collision Detection Techniques and Bounding Volumes .....	108
5.5	Penetration Depth (Penalty-Based Approach) and Collision Response .....	110
5.5.1	Proxy-Based Approach .....	110
5.5.2	Local Neighbor Search .....	113
5.5.3	Local Neighbor Search on Vertices .....	115
5.5.4	Local Neighbor Search on Correct Path .....	116
5.5.5	Triangular Mesh Modeling .....	117
5.6	Haptic Rendering of Surface Properties .....	121
5.7	Haptic Rendering for Other Representation Methods .....	121
5.8	Haptic Rendering of More Than 3-DOF .....	123
5.9	Control Methods for Haptic Systems .....	124
5.9.1	Impedance Control Architecture .....	125
5.9.2	Feed-Forward Impedance Control Architecture .....	125
5.9.3	Positive Feedback Impedance Control Architecture .....	126
5.9.4	Hybrid Compensation Impedance Control Architecture .....	126
5.9.5	Admittance Control Architecture .....	126
5.9.6	Position Feedback Admittance Control Architecture .....	127
5.10	Benchmarking Haptic Rendering Systems .....	128
5.10.1	Existing Techniques for Haptic Rendering System Evaluation .....	128
5.10.2	A Framework for Haptic Rendering Systems Evaluation .....	129
5.10.3	Performance Comparison .....	130

5.11	Haptic Software Frameworks .....	134
5.11.1	Commercial Application Program Interfaces (API) .....	135
5.11.2	Open Source APIs .....	140
5.12	Closing Remarks .....	142
<b>6</b>	<b>Multimedia Haptics</b> .....	<b>145</b>
6.1	Introduction .....	145
6.2	Haptics as a New Media .....	146
6.3	HAVE Content Creation .....	147
6.4	HAVE Content Representation .....	150
6.4.1	Haptic Applications Meta Language .....	151
6.5	Haptic Media Transmission .....	153
6.5.1	Classification .....	155
6.5.2	Collaborative Haptic Audiovisual Environments .....	156
6.6	Architectures for C-HAVE .....	163
6.6.1	Client/Server Architecture .....	164
6.6.2	Peer-to-Peer Architecture .....	165
6.6.3	Hybrid Architecture .....	166
6.7	Communication Frameworks for C-HAVE Systems .....	167
6.7.1	Compression and Control .....	167
6.7.2	Transport and Network Protocols .....	170
6.7.3	Statistical Multiplexing Schemes .....	172
6.8	Quality of Experience in Multimedia Haptics .....	174
6.8.1	Quality of Experience (QoE) Model .....	176
6.9	Haptics Watermarking .....	180
6.10	Closing Remarks .....	182
<b>7</b>	<b>Touching the Future: HAVE Challenges and Trends</b> .....	<b>183</b>
7.1	Introduction .....	183
7.2	The Golden Age of Haptics .....	183
7.3	Human Haptics .....	185
7.3.1	Human Perception and Quality of Experience .....	185
7.3.2	Physical Substitution, Social Implication, and the Need for Secure Haptics .....	186
7.4	Machine Haptics .....	186
7.4.1	Novel Sensing and Actuation Methods .....	187
7.4.2	Hardware Design and Cost .....	187
7.4.3	Wireless Portable Haptic Devices .....	188
7.5	Computer Haptics .....	189
7.5.1	Haptics on Chip .....	189
7.5.2	Accessibility and Popularity: Haptic Plug-Ins .....	189
7.5.3	Reality-Based Modeling: Haptic Rendering Fidelity .....	190
7.5.4	Contact Stability and Transparency .....	190
7.6	Multimedia Haptics .....	191
7.6.1	The Need for Standard Representation .....	191
7.6.2	Consistency and Synchronization .....	191

- 7.6.3 Scalability ..... 192
  - 7.6.4 Network Performance..... 192
  - 7.6.5 Haptic Memories ..... 192
  - 7.6.6 Mobile Haptics ..... 193
  - 7.6.7 Haptics and Security ..... 193
- 7.7 Closing Remarks..... 194
- References..... 195**
- Index..... 217**

Haptics Technologies

Bringing Touch to Multimedia

El Saddik, A.; Orozco, M.; Eid, M.; Cha, J.

2011, XVI, 220 p., Hardcover

ISBN: 978-3-642-22657-1
