<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Expanding Random Maps</b>	5
2.1	Introductory Examples	5
2.2	Preliminaries	8
2.3	Expanding Random Maps	8
2.4	Uniformly Expanding Random Maps	9
2.5	Remarks on Expanding Random Mappings	10
2.6	Visiting Sequences	11
2.7	Spaces of Continuous and Hölder Functions	12
2.8	Transfer Operator	13
2.9	Distortion Properties	14
<b>3</b>	<b>The RPF-Theorem</b>	17
3.1	Formulation of the Theorems	17
3.2	Frequently used Auxiliary Measurable Functions	19
3.3	Transfer Dual Operators	19
3.4	Invariant Density	22
3.5	Levels of Positive Cones of Hölder Functions	24
3.6	Exponential Convergence of Transfer Operators	27
3.7	Exponential Decay of Correlations	31
3.8	Uniqueness	32
3.9	Pressure Function	33
3.10	Gibbs Property	35
3.11	Some Comments on Uniformly Expanding Random Maps	37
<b>4</b>	<b>Measurability, Pressure and Gibbs Condition</b>	39
4.1	Measurable Expanding Random Maps	39
4.2	Measurability	41
4.3	The Expected Pressure	42

4.4	Ergodicity of $\mu$ .....	43
4.5	Random Compact Subsets of Polish Spaces .....	43
<b>5</b>	<b>Fractal Structure of Conformal Expanding Random Repellers .....</b>	<b>47</b>
5.1	Bowen's Formula .....	47
5.2	Quasi-Deterministic and Essential Systems .....	51
5.3	Random Cantor Set .....	54
<b>6</b>	<b>Multifractal Analysis .....</b>	<b>57</b>
6.1	Concave Legendre Transform .....	57
6.2	Multifractal Spectrum .....	59
6.3	Analyticity of the Multifractal Spectrum for Uniformly Expanding Random Maps .....	67
<b>7</b>	<b>Expanding in the Mean .....</b>	<b>69</b>
7.1	Definition of Maps Expanding in the Mean .....	69
7.2	Associated Induced Map .....	70
7.3	Back to the Original System .....	72
7.4	An Example .....	73
<b>8</b>	<b>Classical Expanding Random Systems .....</b>	<b>75</b>
8.1	Definition of Classical Expanding Random Systems .....	75
8.2	Classical Conformal Expanding Random Systems .....	80
8.3	Complex Dynamics and Brück and Büber Polynomial Systems .....	81
8.4	Denker–Gordin Systems .....	84
8.5	Conformal DG*-Systems .....	87
8.6	Random Expanding Maps on Smooth Manifold .....	89
8.7	Topological Exactness .....	89
8.8	Stationary Measures .....	90
<b>9</b>	<b>Real Analyticity of Pressure .....</b>	<b>93</b>
9.1	The Pressure as a Function of a Parameter .....	93
9.2	Real Cones .....	97
9.3	Canonical Complexification .....	100
9.4	The Pressure is Real-Analytic .....	103
9.5	Derivative of the Pressure .....	106
	<b>References .....</b>	<b>109</b>
	<b>Index .....</b>	<b>111</b>

Distance Expanding Random Mappings,  
Thermodynamical Formalism, Gibbs Measures and  
Fractal Geometry

Mayer, V.; Skorulski, B.; Urbański, M.

2011, X, 112 p. 3 illus. in color., Softcover
