

Contents

1	Mobility in Process Calculi	1
1.1	π -calculus	1
1.1.1	Syntax	2
1.1.2	Operational Semantics	3
1.1.3	Extensions	5
1.1.4	Computational Power	5
1.2	Timed Distributed π -calculus	5
1.2.1	Syntax	6
1.2.2	Typing System	7
1.2.3	Operational Semantics	17
1.2.4	Soundness of $tD\pi$	19
1.3	Mobile Ambients	22
1.3.1	Syntax	23
1.3.2	Operational Semantics	23
1.3.3	Computability and Decidability	24
1.4	Mobile Ambients with Timers	26
1.4.1	Syntax	27
1.4.2	Operational Semantics	28
1.4.3	Subject Reduction	31
1.5	Brane Calculi	36
1.5.1	Syntax	37
1.5.2	Operational Semantics	37
1.5.3	Computability and Decidability	39
2	Mobility in Membrane Computing	41
2.1	Mobility in Cell Biology	41
2.2	Membrane Computing	43
2.3	Mobile Membranes	44
2.3.1	Simple Mobile Membranes	45
2.3.2	Enhanced Mobile Membranes	47
2.3.3	Mutual Mobile Membranes	52

2.3.4	Mutual Mobile Membranes with Objects on Surface	53
2.4	Computability Power of Mobile Membranes	56
2.4.1	Preliminaries	56
2.4.2	Simple Mobile Membranes	58
2.4.3	Enhanced Mobile Membranes	61
2.4.4	Mutual Mobile Membranes	74
2.4.5	Mutual Mobile Membranes with Objects on Surface	81
2.5	Complexity of Mutual Mobile Membranes	86
2.5.1	SAT Problem	87
2.5.2	2QBF Problem	91
2.5.3	Bin Packing Problem	98
2.5.4	Subset Sum Problem	106
2.5.5	Knapsack Problem (0/1)	110
2.5.6	2-Partition Problem	115
2.6	Decidability Results	121
2.6.1	Mobile Membranes with Replication	121
2.6.2	From Mobile Membranes to Mobile Ambients	123
2.6.3	From Mobile Ambients to Petri Nets	124
2.6.4	Deciding Reachability	128
3	Encodings	131
3.1	$D\pi$ into $tD\pi$	131
3.1.1	Algebraic Languages	132
3.1.2	Barbed Bisimulations	133
3.1.3	Coding Function	134
3.1.4	Expressiveness and Faithfulness	135
3.2	Pure Mobile Ambients into π -calculus	137
3.2.1	Main Idea	138
3.2.2	Tree-Wire Processes	140
3.2.3	Ambients and Actions	141
3.2.4	Simulating the Operational Semantics of Pure Ambients	142
3.2.5	The Intended Meaning of the Encoding Constructions	144
3.2.6	Encoding of Pure Ambients into π -processes	148
3.2.7	Operational Correspondence	149
3.2.8	Further Extensions	150
3.3	Safe Mobile Ambients into Mutual Mobile Membranes	151
3.3.1	Main Idea	151
3.3.2	Translation	159
3.3.3	Properties Preserved Through Translation	160
3.3.4	Operational Correspondence	167
3.4	Branes into Mobile Membranes with Objects on Surface	176
3.4.1	Translation	177
3.4.2	Preservation of Properties Through Translation	177
3.5	Mobile Membranes with Objects on Surface into Petri Nets	181
3.5.1	Coloured Petri Nets	182

3.5.2	Mobile Membranes as Coloured Petri Nets	183
3.5.3	LDL Degradation Pathway in Mobile Membranes	186
3.5.4	Simulating LDL Degradation by CPN Tools	188
3.5.5	Preservation of Properties Through Translation	192
