Chemistry and Biology of Rocaglamides (= Flavaglines) and Related Derivatives from <i>Aglaia</i> Species (Meliaceae)	1
<i>Sherif S. Ebada, Neil Lajkiewicz, John A. Porco Jr., Min Li-Weber, and Peter Proksch</i>	
1. Introduction	2
2. Structural Classification of Rocaglamides and Related Compounds	5
2.1. Rocaglamide Derivatives	5
2.2. Aglain Derivatives	12
2.3. Aglaforbesin Derivatives	17
2.4. Forbagline Derivatives	18
3. Biosynthesis of Rocaglamides and Related Metabolites	20
4. Pharmacological Significance of Rocaglamides and Related Compounds	23
4.1. Insecticidal Activity	23
4.2. Anti-inflammatory Activity	26
4.3. Anticancer Activity	28
5. Chemical Synthesis of Cyclopenta[<i>b</i>]benzofurans	34
5.1. First Approaches to the Synthesis of Rocaglamides	34
5.2. The First Total Synthesis of Rocaglamide	36
5.3. Syntheses of Rocaglamide and Related Natural Products	37
5.4. New Approaches to Rocaglamide and Related Natural Products	39
5.5. Syntheses of Silvestrol	44
5.6. Development of Rocaglates and Analogues as Therapeutic Agents	47
6. Concluding Remarks	51
References	51

Chemistry of the Immunomodulatory Macrolide Ascomycin and Related Analogues	59
<i>Murty A.R.C. Bulusu, Karl Baumann, and Anton Stuetz</i>	
1. Introduction	59
1.1. Ascomycin and Related Natural Products	60
1.2. Ascomycin Derivatives, a Novel Class of Anti-inflammatory Compounds	62
1.3. Structural Features of Ascomycin	66
2. Synthesis Aspects	70
2.1. Synthesis of the Four Diastereomeric “Furano-Ascomycins”	70
2.2. Synthesis of ¹³ C Labelled Ascomycin	72
2.3. Reactivity of the Binding Domain	75
2.4. Modifications in the Effector and Cyclohexyl Domains	94
3. Summary	116
References	118
 Withanolides and Related Steroids	127
<i>Rosana I. Misico, Viviana E. Nicotra, Juan C. Oberti, Gloria Barboza, Roberto R. Gil, and Gerardo Burton</i>	
1. Introduction	128
2. Withanolides in the Plant Kingdom	129
2.1. Solanaceous Genera Containing Withanolides	129
2.2. Non-Solanaceous Genera Containing Withanolides	132
3. Classification of Withanolides	132
3.1. Withanolides with a δ -Lactone or δ -Lactol Side Chain	132
3.2. Withanolides with a γ -Lactone Side Chain	134
4. Withanolides with an Unmodified Skeleton	135
4.1. The <i>Withania Withanolides</i>	135
4.2. Other Withanolides with an Unmodified Skeleton	143
5. Withanolides with Modified Skeletons	157
5.1. Withanolides with Additional Rings Involving C-21	157
5.2. Physalins and Withaphysalins	163
5.3. Withanolides Containing an Aromatic Ring and Related Steroids	168
5.4. Withanolides with a γ -Lactone Side Chain	172
5.5. 18-Norwithanolides	181
5.6. Spiranoid Withanolides at C-22	184
6. Chemical and Bio-transformations of Withanolides	185
6.1. Chemical Transformations	186
6.2. Photochemical Transformations	188
6.3. Biotransformations	189
7. Biological Activities of the Withanolides	192
7.1. Insecticidal Activities	193

7.2. Phytotoxic Activities	196
7.3. Antiparasitic Activities	197
7.4. Antimicrobial Activities	199
7.5. Anti-inflammatory and Glucocorticoid Related Activities	200
7.6. Cancer-Related Activities	203
7.7. CNS-Related Activities	208
8. Chemotaxonomic Considerations	209
8.1. Tribe Physaleae	210
8.2. Tribes Hyoscyameae, Lycieae, and Solaneae	213
8.3. Tribe Datureae	213
8.4. Genera with Uncertain Positions in the Solanaceae Taxonomic System	213
References	216
Author Index	231
Subject Index	249
