

Table of Contents

Research Articles

C. Castaing	
Some various convergence results for normal integrands	1
S. Drapeau, M. Kupper, and R. Reda	
A note on robust representations of law-invariant quasiconvex functions	27
T. Maruyama	
On the Fourier analysis approach to the Hopf bifurcation theorem	41
P. Kocourek, W. Takahashi, and J.-C. Yao	
Fixed point theorems and ergodic theorems for nonlinear mappings in Banach spaces	67

Historical Perspective

A. Yamazaki	
On the perception and representation of economic quantity in the history of economic analysis in view of the Debreu conjecture	89

Note

Y. Hosoya

An existence result and a characterization of the least concave utility of homothetic preferences	123
