

Contents

Part I Brain–Machine Interfaces and Neurorehabilitation

Brain–Computer Interfaces in the Rehabilitation of Stroke and Neurotrauma	3
Surjo R. Soekadar, Niels Birbaumer, and Leonardo G. Cohen	
Brain–Machine Interfaces for Persons with Disabilities	19
Kenji Kansaku	
Brain–Machine Interfaces Based on Computational Model.....	35
Yasuharu Koike, Hiroyuki Kambara, Natsue Yoshimura, and Duk Shin	
Improvement of Spastic Stroke Hemiparesis Using rTMS Combined with Motor Training.....	59
Satoko Koganemaru, Tatsuya Mima, Hidenao Fukuyama, and Kazuhisa Domen	
Molecular and Electrophysiological Approaches for Functional Recovery in Patients with Injured Spinal Cord.....	69
Toru Ogata, Noritaka Kawashima, Kimitaka Nakazawa, and Masami Akai	

Part II Augmenting Cognition

Prism Adaptation and the Rehabilitation of Spatial Neglect.....	81
Sophie Jacquin-Ciourtois, Jacinta O’Shea, Jacques Luauté, Laure Pisella, Alessandro Farné, Patrice Revol, Gilles Rode, and Yves Rossetti	
Toward a Cure Based on a Better Understanding of Autism Spectrum Disorder	105
Shigeru Kitazawa and Tamami Nakano	

Exceeding the Limits: Behavioral Enhancement Via External Influence	117
Katsumi Watanabe	
Neural Correlates of Reasoning by Exclusion.....	131
Akitoshi Ogawa	
Index.....	139

Systems Neuroscience and Rehabilitation

Kansaku, K.; Cohen, L. (Eds.)

2011, XIV, 140 p., Hardcover

ISBN: 978-4-431-53998-8
