

# Contents

<b>1 Introduction</b> .....	1
R. Spence, E. So, and C. Scawthorn	
<b>Part I A Global Perspective</b>	
<b>2 Earthquakes, an Epidemiological Perspective on Patterns and Trends</b> .....	13
D. Guha-Sapir and F. Vos	
<b>3 Earthquake Casualties Research and Public Education</b> .....	25
M. Petal	
<b>4 Disaster Casualties – Accounting for Economic Impacts and Diurnal Variation</b> .....	51
C. Scawthorn	
<b>5 A Global Earthquake Building Damage and Casualty Database</b> .....	65
R. Spence, E. So, S. Jenkins, A. Coburn, and S. Ruffle	
<b>Part II Casualty Loss Modelling</b>	
<b>6 Earthquake Casualty Models Within the USGS Prompt Assessment of Global Earthquakes for Response (PAGER) System</b> .....	83
K.S. Jaiswal, D.J. Wald, P.S. Earle, K.A. Porter, and M. Hearne	
<b>7 Loss Estimation Module in the Second Generation Software QLARM</b> .....	95
G. Trendafiloski, M. Wyss, and P. Rosset	

<b>8</b>	<b>Earthquake Casualties Estimation in Emergency Mode.....</b>	<b>107</b>
	N. Frolova, V. Larionov, and J. Bonnin	
<b>9</b>	<b>Estimating Casualties for the Southern California ShakeOut .....</b>	<b>125</b>
	K. Shoaf and H. Seligson	
<b>Part III Lessons Learnt from Regional Studies</b>		
<b>10</b>	<b>Casualty Estimation due to Earthquakes: Injury Structure and Dynamics.....</b>	<b>141</b>
	S. Goncharov and N. Frolova	
<b>11</b>	<b>Seismic Vulnerability and Collapse Probability Assessment of Buildings in Greece .....</b>	<b>153</b>
	A. Pomonis, A. Kappos, F. Karababa, and G. Panagopoulos	
<b>12</b>	<b>Seismic Casualty Evaluation: The Italian Model, an Application to the L'Aquila 2009 Event.....</b>	<b>171</b>
	G. Zuccaro and F. Cacace	
<b>13</b>	<b>Mortality and Morbidity Risk in the L'Aquila, Italy Earthquake of 6 April 2009 and Lessons to be Learned.....</b>	<b>185</b>
	D.E. Alexander	
<b>14</b>	<b>Major Factors Controlling Earthquake Casualties as Revealed via a Diversified Questionnaire Survey in Ojiya City for the 2004 Mid-Niigata Earthquake.....</b>	<b>199</b>
	M. Koyama, S. Okada, and Y. Ohta	
<b>Part IV Exploring Approaches to Improving Casualty Modeling</b>		
<b>15</b>	<b>Advancements in Casualty Modelling Facilitated by the USGS Prompt Assessment of Global Earthquakes for Response (PAGER) System .....</b>	<b>221</b>
	D. Wald, K. Jaiswal, K. Marano, P. Earle, and T. Allen	
<b>16</b>	<b>Challenges in Collating Earthquake Casualty Field Data .....</b>	<b>231</b>
	E.K.M. So	
<b>17</b>	<b>Estimating Human Losses in Earthquake Models: A Discussion.....</b>	<b>255</b>
	M.A. Ferreira, C.S. Oliveira, and F. Mota de Sá	

<b>18 Trends in the Casualty Ratio of Injured to Fatalities in Earthquakes .....</b>	<b>267</b>
M. Wyss and G. Trendafiloski	
<b>19 Study of Damage to the Human Body Caused by Earthquakes: Development of a Mannequin for Thoracic Compression Experiments and Cyber Mannequin Using the Finite Element Method .....</b>	<b>275</b>
E. Ikuta and M. Miyano	
<b>20 A Different View on Human Vulnerability to Earthquakes: Lessons from Risk Perception Studies .....</b>	<b>291</b>
T. Rossetto, H. Joffe, and C. Solberg	
<b>References .....</b>	<b>305</b>
<b>Index .....</b>	<b>319</b>

Human Casualties in Earthquakes  
Progress in Modelling and Mitigation  
Spence, R.; So, E.; Scawthorn, C. (Eds.)  
2011, XVIII, 322 p., Hardcover  
ISBN: 978-90-481-9454-4
