

Table of Contents

Preface	xi
----------------------	-----------

Chapter 1. The need for a new agro innovation system	1
---	----------

1.1. Introduction: The challenge.....	1
1.2. Innovating in the agricultural system	3
1.3. Sustainable development as an innovation target	6
1.4. Characteristics of innovation and the innovation system.....	7
1.5. System innovation as a process of engagement	10
1.6. Five motivating assumptions for enhancing sustainable development in agriculture.....	13
Assumption 1: Sustainable development is a dynamic process.....	14
Assumption 2: Sustainable development needs system innovation.....	14
Assumption 3: System innovation is a non-linear learning process	15
Assumption 4: System innovation requires a multi-stakeholder approach.....	15
Assumption 5: Multi-stakeholder approaches imply trans-disciplinary knowledge creation	15
1.7. Stimulating sustainable development in a learning-by-doing experiment	16
1.8. References	17

Chapter 2. Inventions for future sustainable development in agriculture	21
--	-----------

2.1. Inventions – an introduction.....	21
2.2. Inventions in agricultural infrastructure	22
2.2.1. Ownership issues: Inventions, innovations and IPR.....	23
2.2.1.1. Ownership and agricultural inventions of the past.....	23
2.2.1.2. Ownership and modern inventions in agricultural sciences.....	25
2.2.1.3. Open innovation under attack.....	26
2.2.2. Organization of inventions and innovation	27
2.2.2.1. ‘Ware’ elements of inventions and entrepreneurship.....	27
2.3. Three ways to stimulate needed inventions.....	29
2.3.1. Intersectional inventions	30
2.3.1.1. Organic agriculture.....	30
2.3.1.2. GM crops	31
2.3.2. Directional inventions	32
2.3.2.1. Cisgenesis	32
2.3.3. Open innovation.....	33
2.3.3.1. Care farming.....	34
2.3.3.2. Energy producing greenhouses.....	34

2.4. Conclusion	35
2.5. References	37
Chapter 3. Organizing innovations and transitions.....	41
3.1. Introduction: Context of the research	41
3.2. Theoretical building blocks	43
3.3. Coming in from the space of flows	45
3.3.1. Innovation as reconfiguration	46
3.3.2. Between ‘business as usual’ and ‘market failures’	47
3.4. Where the space of flows meets the space of places	50
3.4.1. Perspective from the space of places	51
3.4.2. The importance of a 3P regional business case.....	53
3.5. Conclusion: Breaking the developmental lock-in	54
3.6. References	56
Chapter 4. For or against innovation? The influence of images.....	59
4.1. Introduction	59
4.2. Images in innovation	60
4.3. Hypotheses and research approach.....	62
4.3.1. Hypotheses	62
4.3.2. Research approach.....	63
4.4. The role of images – case studies	64
4.4.1. Images within innovation projects – Northern Frisian Woods	64
4.4.2. Societal influences on innovation experiments – New Mixed Farm	66
4.5. Dealing with images in innovation.....	67
4.5.1. Collaborative visualization.....	67
4.5.2. Managing images	69
4.6. Conclusion	70
4.7. References	71
Chapter 5. Mobilizing consumer demand for sustainable development	73
5.1. Introduction	73
5.2. Attitude-behavior gaps	77
5.2.1. Limitation to the theory of planned behavior.....	77
5.2.2. Socio-temporal dilemmas in choice	78
5.2.3. Construal level theory	79
5.2.4. Multiple selves	80
5.3. Stimulating sustainable consumer behavior.....	81
5.4. Facilitating the three routes of mobilizing sustainable consumption.....	84
5.4.1. Route 1: Facilitating motivation.....	84

5.4.1.1. The multiple selves in sustainable behavior.....	84
5.4.1.2. Social norms in sustainable development	84
5.4.1.3. Implicit factors in behavior aimed at sustainable development.....	86
5.4.1.4. The willingness to pay for sustainability labels and logo	87
5.4.2. Route 2: Facilitating ability	87
5.4.3. Route 3: Facilitating opportunity	88
5.4.3.1. Corporate social responsibility activities	88
5.4.3.2. Enhancing opportunity from the primary production level	89
5.4.3.3. Facilitating opportunity and consumer choice at the point of purchase.....	89
5.4.4. Methodological challenges in stimulating consumer demand	90
5.5. Key lessons learned	91
5.6. Conclusion	93
5.7. References	93

Chapter 6. From motivating assumptions to a practical innovation model... 97

6.1. Introduction	97
6.1.1. Measuring and explaining performance.....	98
6.2. Methodology.....	99
6.3. Performance of cases and assumptions	101
6.3.1. Performance groups.....	101
6.3.2. Performance of the five motivating assumptions.....	103
6.4. Influence of explanatory attributes and links to motivating assumptions..	105
6.4.1. Explanatory attribute categories and performance.....	106
6.4.2. Explanatory attributes, core strategies and the motivating assumptions	107
6.4.2.1. Influence of initiating conditions.....	108
6.4.2.2. Influence of attributes related to assumption 4 (multi-stakeholder engagement).....	109
6.4.2.3. Influence of attributes related to motivating assumptions 2, 3, and 5.....	111
6.4.3. Key findings	113
6.5. From motivating assumptions to a practical innovation model for innovation	114
6.5.1. Core strategy I: Action experiment formation and guidance	115
6.5.2. Core strategy II: Process monitoring and reflection	116
6.6. Key learnings from working with the motivating assumptions and core strategies	117
6.6.1. Dealing with the wickedness of sustainability in setting project vision and ambition.....	117
6.6.2. Dealing with inherent complexity	118

6.6.3. Dealing with knowledge creation in multi-stakeholder groups	119
6.6.4. Dealing with monitoring and reflection	121
6.6.4.1. Dynamic Learning Agenda	122
6.6.4.2. Interactive learning and reflexive monitoring in action	122
6.6.5. Dealing with the tension between a project and its institutional context	123
6.7. Applying the TransForum model	124
6.7.1. A traveler's guide to managing sustainable development	124
6.7.2. Implications with regard to the current innovation system	125
6.7.3. Broader application of the model	126
6.8. References	127
Chapter 7. Transforming agriculture: A new approach to stimulate sustainable development.	131
7.1. Introduction	131
7.2. The TransForum model	133
7.2.1. From assumptions to principles	133
7.2.2. The sixth principle	135
7.2.3. Accompanying strategies	137
7.3. Contributions from scientific disciplines	139
7.3.1. The Natural Sciences lens	139
7.3.2. The Social Sciences lens	141
7.4. A promising perspective	143
7.5. References	144
List of Abbreviations	145
List of Contributors	147
Appendix I. TransForum: Stimulating innovation for sustainable development by learning by doing	149
Action experiments	150
Scientific research	150
Learning projects	150
Appendix II. Action experiments explicated	153
Action experiment: SynErgy	153
Action experiment: More about Food	153
Action experiment: Regional Food Chain	154
Action experiment: Green Care	154
Action experiment: New Markets and Vital Coalitions Heuvelland	154
Action experiment: New Mixed Farm	155

Action experiment: Saline Agriculture..... 155

Action experiment: Northern Frisian Woods 156

Appendix III. Overview experiments and projects..... 157

 Action experiments..... 157

 Scientific research projects..... 158

 Learning projects 158

Appendix IV 161

The TransForum Model: Transforming Agro Innovation
Toward Sustainable Development

Andeweg, K.; van Latesteijn, H.C. (Eds.)

2011, XII, 162 p., Hardcover

ISBN: 978-90-481-9780-4
