

# Contents

<b>1</b>	<b>Researching Evolvability .....</b>	<b>1</b>
	Pi���� van de Laar, Alexander U. Douglas, and Pierre America	
<b>2</b>	<b>Architecting for Improved Evolvability .....</b>	<b>21</b>
	Pierre America, Pi���� van de Laar, Gerrit Muller, Teade Punter, Nico van Rooijen, Joland Rutgers, and David Watts	
<b>3</b>	<b>Complementing Software Documentation .....</b>	<b>37</b>
	Pieter van der Spek, Steven Klusener, and Pi���� van de Laar	
<b>4</b>	<b>Identifying and Investigating Evolution Type Decomposition Weaknesses .....</b>	<b>53</b>
	Adam Vanya, Steven Klusener, Rahul Premraj, Nico van Rooijen, and Hans van Vliet	
<b>5</b>	<b>Transferring Evolutionary Couplings to Industry .....</b>	<b>69</b>
	Pi���� van de Laar	
<b>6</b>	<b>An Execution Viewpoint Catalog for Software-Intensive and Embedded Systems .....</b>	<b>89</b>
	Trosky B. Callo Arias	
<b>7</b>	<b>Researching Reference Architectures .....</b>	<b>107</b>
	Gerrit Muller and Pi���� van de Laar	
<b>8</b>	<b>A3 Architecture Overviews .....</b>	<b>121</b>
	P. Daniel Borches	
<b>9</b>	<b>Linking Requirements and Implementation .....</b>	<b>137</b>
	Alexander U. Douglas	
<b>10</b>	<b>Workflow Modelling of Intended System Use .....</b>	<b>153</b>
	Thom van Beek and Tetsuo Tomiyama	

<b>11</b>	<b>Supervisory Control Synthesis in the Medical Domain</b> .....	171
	R.J.M. Theunissen, R.R.H. Schiffelers, D.A. van Beek, and J.E. Rooda	
<b>12</b>	<b>Creating High-Quality Behavioural Designs for Software- Intensive Systems</b> .....	193
	Gürcan Güleşir, Pierre America, Frank Benschop, Klaas van den Berg, and Mehmet Akşit	
<b>13</b>	<b>Verifying Runtime Reconfiguration Requirements on UML Models</b> .....	209
	Selim Ciraci, Pim van den Broek, and Mehmet Akşit	
<b>14</b>	<b>Scheduling in MRI Scans processing</b> .....	227
	Evgeniy N. Ivanov, Alexander Y. Pogromsky, Johan S. van den Brink, and Jacobus E. Rooda	
<b>15</b>	<b>Strategy-Focused Architecture Decision Making</b> .....	245
	Ana Ivanović and Pierre America	
<b>16</b>	<b>Balancing Time-to-Market and Quality in Evolving Embedded Systems</b> .....	261
	Pieter van der Spek and Chris Verhoef	
<b>17</b>	<b>Industrial Impact and Lessons Learned</b> .....	279
	Teade Punter and Piërre van de Laar	
<b>18</b>	<b>Conclusions</b> .....	301
	Piërre van de Laar, Pierre America, Nico van Rooijen, Teade Punter, and David Watts	
<b>Annex</b>		
<b>I</b>	<b>Darwin Publications</b> .....	307
<b>II</b>	<b>List of Darwin Partners</b> .....	311
	<b>Index</b> .....	313

Views on Evolvability of Embedded Systems

Van de Laar, P.; Punter, T. (Eds.)

2011, XII, 316 p., Hardcover

ISBN: 978-90-481-9848-1
