

Contents

Model Reduction and Uncertainties in Structural Dynamics	1
Gerhart I. Schuëller in Cooperation with Barbara Goller and Helmut J. Pradlwarter	
Resonant Damping of Flexible Structures Under Random Excitation	25
Steen Krenk and Jan Høgsberg	
Importance Sampling of Nonlinear Structures Using Adapted Process	47
Siu-Kui Au	
Use of Time-Variant Spectral Characteristics of Nonstationary Random Processes in the First-Passage Problem for Earthquake Engineering Applications	67
Michele Barbato	
Stochastic Seismic Analysis of Large Linear Structural Systems Under Fully Non-stationary Spectrum Compatible Ground Motion	89
Pierfrancesco Cacciola and Giuseppe Muscolino	
Soil Spatial Variability and Structural Reliability of Buried Networks Subjected to Earthquakes	111
Sidi Mohammed Elachachi, Denis Breysse, and Hichem Benzeguir	
An Efficient First-Order Scheme for Reliability Based Optimization of Stochastic Systems	129
Hector A. Jensen, Gerhart I. Schuëller, Marcos A. Valdebenito, and Danilo S. Kusanovic	

Application of a Mode-based Meta-Model for the Reliability Assessment of Structures Subjected to Stochastic Ground Acceleration 155
 Lukas Pichler, Helmut J. Pradlwarter, and Gerhart I. Schuëller

Nonlinear Dynamic Response Variability and Reliability of Frames with Stochastic Non-Gaussian Parameters 171
 George Stefanou and Michalis Fragiadakis

The Role of Uncertainties in Aeolian Risk Assessment 187
 Francesco Petrini, Marcello Ciampoli, and Giuliano Augusti

The Method of Separation: A Novel Approach for Accurate Estimation of Evolutionary Power Spectra 209
 Dominik Schillinger and Vissarion Papadopoulos

A Seismologically Consistent Husid Envelope Function for the Stochastic Simulation of Earthquake Ground-Motions 229
 Sara Gobba, Peter J. Stafford, and Giuseppe C. Marano

Sparse Representations in Stochastic Mechanics 247
 Hermann G. Matthies and Elmar Zander

Auto-parametric Stability Loss and Post-critical Behaviour of a Three Degrees of Freedom System 267
 Jiří Náprstek and Cyril Fischer

Probability Based Size Effect Representation for Failure in Civil Engineering Structures Built of Heterogeneous Materials 291
 Adnan Ibrahimbegovic, Jean-Baptiste Colliat, Martin Hautefeuille, Delphine Brancherie, and Sergiy Melnyk

The Scatter of Eigenfrequencies in Beams Made of Metal Foam 315
 Daniel Schwarzer and Carsten Proppe

Index 341

Computational Methods in Stochastic Dynamics
Papadrakakis, M.; Stefanou, G.; Papadopoulos, V.
(Eds.)

2011, XII, 342 p., Hardcover

ISBN: 978-90-481-9986-0
