Parallel Transistor-Level Circuit Simulation	1
Eric R. Keiter, Heidi K. Thornquist, Robert J. Hoekstra, Thomas V. Russo, Richard L. Schiek and Eric L. Rankin	
1 Introduction	2
2 Background	2
3 Parallelism Opportunities in Circuit Simulation	4
3.1 Parallel Netlist Parser	4
3.2 Parallel Approach for Nested Solver Loop	5
3.3 Device Evaluation	6
3.4 Linear Solvers for Circuit Simulation	7
4 Graph Mitigation using Multi-level Newton Methods	11
4.1 Multi-level Newton Method	11
4.2 Preserving Singleton Removal	12
5 Software	13
6 Parallel Linear Solver Strategy Comparison	15
6.1 Explanation of Tables	15
6.2 Numerical Results	16
7 Graph Mitigation Example	18
8 Conclusion	19
References	20
A Perspective on Fast-SPICE Simulation Technology	23
Michał Rewieński	
1 Introduction	23
2 SPICE: Transistor-Level Circuit Simulation	24
2.1 Usage and Limitations of SPICE	26
2.2 Need for Accelerated SPICE (‘Fast-SPICE’) Simulation	27
3 Fast-SPICE Technologies	27
3.1 SPICE vs. Fast-SPICE Techniques	27
3.2 Acceleration Technologies: Different Viewpoints	30

4	Examples of Fast-SPICE Technologies	33
4.1	Optimized Simulation of Parasitic Networks	33
4.2	Advanced Partitioning Technologies	34
4.3	Memory Simulation Acceleration	35
5	Challenges of Fast-SPICE and Future Research	39
	References	42
