

Contents

1	Description of the Earth's Atmosphere.....	1
1.1	Introduction to Atmospheric Structure and Composition	2
1.1.1	Emissions of Air Pollutants in the Atmosphere	2
1.1.2	The Earth's Atmosphere	4
1.1.3	Origin and Evolution of the Atmosphere	7
1.2	Atmosphere's Characteristics	10
1.3	Lower Atmosphere's Composition	11
1.3.1	Dry Atmospheric Air.....	11
1.3.2	Water in the Atmosphere	11
1.3.3	Atmospheric Aerosols	13
1.4	Vertical Division of the Atmosphere – Temperature Change.....	14
1.4.1	Troposphere	14
1.4.2	Boundary Layer	16
1.4.3	Stratosphere	20
1.4.4	Mesosphere.....	21
1.4.5	Thermosphere	21
1.4.6	Exosphere	21
1.4.7	Ionosphere – Magnetosphere	22
1.5	Change of Meteorological Parameters with Height	22
1.5.1	Temperature Inversion	25
1.5.2	Air Density Variation with Height.....	27
1.5.3	Change of Atmospheric Pressure with Height.....	28
1.6	Model of the Standard Atmosphere	29
1.6.1	Units of Chemical Components in the Atmosphere	30
1.6.2	Unit Conversion of Concentration of Component I ($\mu\text{g}/\text{m}^3$) to Volume Concentration (Ppm).....	31
1.7	Radiation in the Atmosphere	31
1.7.1	Laws of Radiation.....	33
1.7.2	Sun's Radiation	36
1.7.3	Earth's Radiation.....	36

1.7.4	Factors That Affect the Sun's Radiation Flux to Earth	37
1.7.5	Interaction of the Sun's Radiation in the Atmosphere.....	38
1.7.6	Greenhouse Effect	45
1.7.7	Energy Balance of Earth and its Atmosphere.....	47
1.7.8	Distribution of Sun's Radiation at the System Atmosphere-Surface	49
1.7.9	The Earth's Climate	50
1.8	Examples.....	54
1.9	Ambient Air Quality Standards	58
1.10	Appendixes	59
1.10.1	Appendix 1: The Hydrostatic Equation	59
	References	64
2	First Principles of Meteorology	67
2.1	General Aspects of Meteorology	68
2.2	Vertical Structure of the Temperature and Conditions of Atmospheric Stability	70
2.2.1	Dry Vertical Temperature Lapse Rate	71
2.2.2	Wet Vertical Temperature Lapse Rate	74
2.2.3	Temperature Inversion	75
2.3	Atmospheric Variability – Air Masses – Fronts.....	77
2.3.1	Air Masses	77
2.3.2	Classification of Air Masses	78
2.3.3	Fronts.....	79
2.3.4	Wave Cyclone.....	85
2.4	Turbulence – Equations for the Mean Values	86
2.5	Statistical Properties of Turbulence.....	87
2.6	Atmospheric Temperature	92
2.6.1	Temperature Season Variability	92
2.6.2	Temperature Daily Variability.....	96
2.6.3	Heating of the Earth's Surface and Heat Conduction	98
2.6.4	Distribution of Temperature in the Air	100
2.7	Humidity in the Atmosphere.....	101
2.7.1	Mathematical Expressions of Humidity in the Atmosphere.....	102
2.7.2	Dew Point	104
2.7.3	Clouds in the Atmosphere	106
2.7.4	Precipitation	107
2.7.5	Study of Precipitation Scavenging.....	109
2.8	Applications and Examples	112
	References.....	117

3	Atmospheric Circulation	119
3.1	Atmospheric Pressure and Pressure Gradient Systems	120
3.2	Atmospheric Pressure Changes	120
3.2.1	Vertical Pressure Changes	120
3.2.2	Non-canonical Pressure Changes	121
3.2.3	Canonical Pressures Changes	121
3.3	Transfer of the Pressure to Its Mean Value at Sea Level	122
3.4	Isobaric Curves: Pressure Gradient Systems	122
3.5	Pressure Gradient Force.....	124
3.6	Movement of Air: Wind	126
3.6.1	Forces Which Affect the Movement of Air	128
3.6.2	Transport Equations of Air Masses in the Atmosphere .	131
3.6.3	Wind Categories	132
3.7	General Circulation in the Atmosphere.....	137
3.7.1	Single and Three Cell Models	138
3.7.2	Continuous Winds	140
3.7.3	Periodic Winds	141
3.7.4	Sea and Land Breeze.....	141
3.7.5	Mountain and Valley Breezes	143
3.8	Vertical Structure of Pressure Gradient Systems	144
3.9	Equations of Atmospheric Circulation.....	145
3.9.1	Equations of Circulation for a Compressible Fluid	145
	References	149
4	Atmospheric Chemistry	151
4.1	Chemical Components in the Atmosphere	151
4.2	Chemistry of the Troposphere	152
4.2.1	Sulphur Components.....	155
4.2.2	Nitrogen Components.....	156
4.2.3	Carbon Components	156
4.2.4	Halogen Components	157
4.3	Particulate Matter	157
4.4	Photochemistry in the Free Troposphere	158
4.4.1	Photochemical Cycle of Ozone and Nitrogen Oxides...	158
4.4.2	Chemistry of Carbon Dioxide	160
4.4.3	Chemistry of Hydrocarbons.....	161
4.4.4	Chemistry of Sulphur Compounds.....	161
4.5	Components of Aquatic Chemistry in the Atmosphere	162
4.6	Chemistry of the Stratosphere - Ozone	163
	References.....	167
5	Atmospheric Aerosols.....	169
5.1	Introduction	169
5.2	Size Distribution of Aerosols	171
5.3	Chemical Composition of Aerosols.....	180

5.4	Organic Aerosols.....	182
5.4.1	Elemental Carbon- Primary Organic Carbon.....	184
5.4.2	Secondary Organic Matter Formation (Secondary Organic Carbon)	185
5.5	Dynamics of Atmospheric Particulate Matter	186
5.5.1	New Particle Formation.....	186
5.5.2	Condensation and Evaporation	193
5.5.3	Coagulation	196
5.6	Bioaerosols – Definition	197
	References.....	198
6	Atmospheric Dispersion: Gaussian Models	201
6.1	Theories of Atmospheric Diffusion.....	202
6.2	Euler Description.....	202
6.3	Lagrange Description	203
6.4	Equations Describing the Concentration of Pollutants at Turbulent Conditions.....	204
6.4.1	Diffusion Equation in Euler Description	204
6.4.2	Diffusion Equation in Lagrange Description.....	205
6.4.3	Solution of the Diffusion Equation for a Continuous Source with the Euler Methodology	207
6.5	Gaussian Model	207
6.5.1	Limitations of the Gaussian Model	208
6.5.2	Calculation of the σ_y and σ_z Coefficients. Stability Methodology	209
6.5.3	Plume Rise	212
6.5.4	Atmospheric Stability – Application to the Gaussian Models	216
6.6	Analytical Solutions of the Atmospheric Diffusion Equation.....	217
6.7	Two-Dimensional, Time Independent Line-Continuous Source with Changing Values of Velocity and Diffusion Coefficient	220
6.8	Characteristics of Plume Dispersion – Stability Conditions	223
6.9	Examples and Applications	226
6.10	Appendix 6.1: The Continuity Equation	230
	References	232
7	Atmospheric Models: Emissions of Pollutants.....	233
7.1	Introduction	233
7.2	Dispersion Equations for Pollutant Transport at the Euler and Lagrange Coordinating Systems	235
7.2.1	Model of a Single Volume in the Euler System.....	236
7.2.2	Three Dimensional Models of Atmospheric Pollution ..	237
7.3	Statistical Evaluation of Atmospheric Models	238

7.4	Emissions of Atmospheric Pollutants.....	239
7.5	Emissions from the Biosphere	240
7.5.1	Emissions of Volatile Organic Compounds from Vegetation.....	243
7.5.2	Calculation of Biogenic Emissions	243
7.5.3	Sea Salt Emissions	245
7.5.4	Emissions of Air Pollutants from the Earth's Surface.....	246
7.5.5	Emissions of Pollutants from Forest Fires.....	247
7.6	Examples and applications.....	249
	References.....	253
8	Indoor Air Pollution	255
8.1	Introduction to Indoor Air Quality.....	256
8.2	Ozone.....	262
8.3	Nitrogen Oxides.....	265
8.4	Volatile Organic Compounds	267
8.5	Chemistry of Organic Compounds Indoors.....	268
8.6	Radon.....	275
8.6.1	Radiative Decay of Radon Isotopes	277
8.6.2	Exposure and Dose of Radon in Indoor Environment...	279
8.6.3	Examples	282
8.7	Carbon Monoxide	283
8.8	Asbestos	284
8.9	Heavy Metals.....	285
8.10	Formaldehyde	287
8.11	Pesticides	290
8.12	Polycyclic Aromatic Hydrocarbons (PAH)	291
8.13	Polychloric Biphenyls (Pcbs)	291
8.14	Tobacco Smoke	293
8.15	Bioaerosols	294
8.16	Microenvironmental Models	296
8.17	Air Exchange Rate by Infiltration.....	299
8.18	Emission Models	300
8.19	Deposition Models	301
8.19.1	Examples.....	301
	References	303
9	Human Exposure and Health Risk from Air Pollutants	305
9.1	Human Exposure and Doses from Air Pollutants	306
9.2	Exposure Pathways.....	309
9.2.1	Dermal Absorption.....	309
9.2.2	Inhalation Exposure.....	310
9.3	Calculation of Dose–Response Functions	315

9.3.1	Dose Calculation Through Intake.....	315
9.3.2	Internal Dose Calculation Through Dermal Absorption	316
9.3.3	Internal Dose Calculation Through Inhalation and Food Intake	318
9.3.4	Functions of Dose–Response	319
9.4	Particulate Matter Dose Through Inhalation	322
9.4.1	Deposition of Particles in the Respiratory Tract	322
9.4.2	Classification of Particles Based on Their Ability to Penetrate the Respiratory Tract.....	328
9.4.3	Calculation of Particle Deposition in the Respiratory Tract.....	331
9.4.4	Particle Clearance in the Human Respiratory Tract.....	333
9.4.5	Particle Deposition Measurements.....	338
9.5	Application: Internal Dose from Radon Inhalation.....	341
9.6	Health Effects from Air Pollutants	346
9.7	Health Effects from Exposure to Particulate Matter	350
	References.....	354
