PART 4	1
4 SBW AWS Conversion Mechatronic Control System	3
4.1 Introduction	3
4.2 Variable-Assist SBW 2WS Conversion	
Mechatronic Control Systems	39
4.2.1 Essentials of SBW 2WS Conversion	
Mechatronic Control Systems	39
4.2.2 Categories of the SBW 2WS Conversion	
Mechatronic Control Systems	44
4.2.3 Description of SBW 2WS Conversion	
Mechatronic Control Systems	44
4.2.4 Hybrid E-M-F-M EPFS SBW 2WS Conversion	
Mechatronic Control System	50
4.2.5 E-M EPS SBW 2WS Conversion	
Mechatronic Control System	55
4.3 Energy-Saving Effectiveness	69
4.3.1 Foreword	69
4.3.2 Tendency in Research and Development (R&D)	69
4.4 Steer-By-Wire (SBW) Four-Wheel Steering (4WS) Conversion	
Mechatronic Control Systems	73
4.4.1 Foreword	73
4.4.2 Philosophy of SBW 4WS Conversion	
Mechatronic Control Systems	75
4.4.3 Dynamic Analysis of SBW 4WS Conversion	
Mechatronic Control Systems	78
4.4.4 Categories of SBW 4WS Conversion	
Mechatronic Control Systems	82
4.4.5 Foreword to Each SBW 4WS Conversion	
Mechatronic Control System	83
4.4.6 E-M SBW 4WS Conversion	
Mechatronic Control Systems	98
4.4.7 Tendency in Research and Development (R&D)	110
4.5 Tri-Mode Hybrid SBW AWS Conversion	
Mechatronic Control Systems for Future Automotive Vehicles	117
4.5.1 Foreword	117
4.5.2 Philosophy of Tri-mode Hybrid SBW AWS Conversion	
Mechatronic Control	121
4.5.3 EM SBW AWS Conversion Actuators	122
4.5.4 SBW 4WS Conversion Mechatronic Control	124
4.5.5 Conclusion	136

4.6 SBW 4WS Conversion Mechatronic Control System for Automotive Vehicle Lane Keeping	139
4.6.1 Foreword	139
4.6.2 Automotive Vehicle Physical and Mathematical Models	140
4.6.3 SBW 4WS Conversion Mechatronic Control System Design	141
4.6.4 4WS Automotive Vehicle Lane-Keeping Simulation	148
4.6.5 Conclusion	152
4.7 Model-Based Design with Production Code Generation for SBW AWS Conversion Mechatronic Control System Development	153
4.7.1 Foreword	153
4.7.2 Model-Based Design with Production Code Generation	153
4.7.3 Behavioural Modelling	154
4.7.4 Simulation and Analysis	154
4.7.5 Rapid Prototyping	156
4.7.6 Detailed Software Design	156
4.7.7 Physical Model Testing	156
4.7.8 Distributed Architecture Design	159
4.7.9 Production Code Generation	159
4.7.10 In-the-Loop Testing	159
4.7.11 Integration Components	159
4.7.12 Additional Resources	160
4.8 SBW AWS Conversion Mechatronic Control System Using Fault-Silent Units	161
4.8.1 Foreword	161
4.8.2 Time-Triggered Architectures for SBW AWS Conversion Mechatronic Control Systems	164
4.8.3 Structure of Possible Four-Wheel-Steered (4WS) Steer-By-Wire (SBW) Conversion Architecture	165
4.8.4 Conclusion	169
4.9 Discussion and Conclusions	171
Glossary	175
References and Bibliography	181
PART 5	213
5 ABW AWA Suspension Mechatronic Control Systems	215
5.1 Introduction	215
5.2 Vehicular Suspension	235
5.2.1 Vehicular Suspension Categories	236
5.2.2 Vehicular Suspension Functions	249
5.2.3 Vehicular Suspension Performance	251
5.3 Passive Suspension	255
5.3.1 Foreword	255
5.3.2 Passive F-M or P-M Shock Absorber Suspension Mechatronic Control System	264
5.3.3 Passive F-P-M Suspension Mechatronic Control System	277
5.4 Self-Levelling Suspension	281
5.4.1 Foreword	281

5.4.2 Self-Levelling Suspension Mechatronic Control System Arrangement	283
5.4.3 Self-Levelling Suspension Mechatronic Control System Components	284
5.4.4 Self-Levelling Suspension Mechatronic Control System Function	284
5.5 Semi-Active Suspensions	289
5.5.1 Foreword	289
5.5.2 Shock Absorber Suspension Mechatronic Control System Arrangement	295
5.5.3 Shock Absorber Suspension Mechatronic Control System Function	296
5.5.4 Types of Semi-Active Devices	298
5.5.5 Semi-Active ABW AWA Suspension Design Challenges	299
5.5.6 Semi-Active F-M ABW AWA Suspension Solution	300
5.5.7 Semi-Active P-M ABW AWA Suspension Solution	310
5.5.8 Semi-Active E-M ABW AWA Suspension Solution	313
5.5.9 Semi-Active MR ABW AWA Suspension Solution	315
5.5.10 Semi-Active ER ABW AWA Suspension Solution	333
5.5.11 Semi-Active PF ABW AWA Suspension Solutions	342
5.6 Active Suspensions	351
5.6.1 Foreword	351
5.6.2 Active F-M ABW AWA Suspension Mechatronic Control Systems	367
5.6.3 Active F-P-M ABW AWA Suspension Mechatronic Control Systems	389
5.6.4 Active P-M ABW AWA Suspension Mechatronic Control Systems	401
5.6.5 Active E-M ABW AWA Suspension Mechatronic Control Systems	408
5.6.6 Active E-P-M ABW AWA Suspension Mechatronic Control Systems	422
5.6.7 Active E-M-M ABW AWA Suspension Mechatronic Control Systems	434
5.7 Hybrid ABW AWA Suspension Mechatronic Control Systems	441
5.8 Discussion and Conclusions	443
Glossary	451
References and Bibliography	461
Acronyms	505
Nomenclature	513
Index	517

Automotive Mechatronics: Operational and Practical
Issues

Volume II

Fijalkowski, B.T.

2011, XIV, 526 p., Hardcover

ISBN: 978-94-007-1182-2
