

Contents

1	Neutrino Masses and Double Beta Decay	1
1.1	Oscillations	2
1.2	Masses	4
1.3	Double Beta Decay	6
1.4	Nuclear Matrix Elements	7
1.5	Experimental Searches for Neutrinoless Double Beta Decay	9
1.6	Past and Present Experiments	11
1.7	Future Experiments	14
	References	16
2	TeO₂ Bolometric Detectors for 0νDBD Search	19
2.1	Bolometric Detectors	19
2.1.1	The Energy Absorber	20
2.1.2	The Choice of TeO ₂	21
2.1.3	The Sensor	22
2.1.4	NTD-Ge Thermistors	24
2.2	Bolometer Operation	24
2.3	Arrays of TeO ₂ Bolometers	26
2.4	Cryogenic Setups	26
2.5	Signal Readout	28
2.5.1	Measurement of the Static Resistance	29
2.6	Detector Noise	30
2.7	CUORICINO and CUORE	31
	References	34
3	Model of the Response Function of CUORE Bolometers	35
3.1	The CCVR Run	35
3.2	The Model	37
3.2.1	Thermistor Model	37
3.2.2	Biassing Circuit	41
3.2.3	Bessel Filter	42

3.2.4	Thermal Model	43
3.2.5	Simplified Model Without Temperature Dependences . . .	44
3.2.6	Fit to Data	47
3.2.7	Response Function Simulation	48
3.2.8	Amplitude Dependence on the Working Temperature . . .	50
3.2.9	Extraction of R_S from the Relationship Between Amplitude and Baseline	52
	References	55
4	Thermal Response Analysis	57
4.1	Data Analysis Procedure	57
4.2	The Thermal Response Algorithm	58
4.3	Check of the TR Algorithm on MonteCarlo Data	59
4.4	Data Analysis	61
4.4.1	Calibration	64
4.5	Residual Drift in Time	68
4.6	Sources of Systematic Errors	71
4.6.1	Choice of the Derivative Algorithm	72
4.6.2	Error on the Biasing and Read-Out Circuits Parameters. . .	73
	References	74
5	Thermal Response Analysis on the Three Towers Detector	75
5.1	The Three Towers Detector	75
5.2	Measurements of Model Parameters.	76
5.2.1	Measurement of $V_{R_S}^G$ and V_S	77
5.2.2	Measurement of G/G_S	79
5.2.3	Measurement of R_L	79
5.2.4	Measurement of $V_B G_S$	80
5.2.5	Measurement of c_p	81
5.3	Results on Calibration Data	83
5.4	Results on Background Data	86
5.5	Future Developments	88
	References	89
6	Conclusions	91
	Reference	95
	Appendix A: Thermal Response Analysis on the CCVR Detector	97
	Appendix B: Precision Measurements on the Three Towers Detector	103

Model of the Response Function of CUORE Bolometers

Vignati, M.

2011, XII, 107 p., Hardcover

ISBN: 978-94-007-1231-7
