

Contents

1	Introduction	1
2	The Mast Cell	3
2.1	A Historical Overview	3
2.2	Biology of Mast Cells	11
2.2.1	Mast Cell Structure and Ultrastructure	11
2.2.2	Origin, Development and Tissue Homing of Mast Cells	17
2.2.3	Mast Cell Organ and Tissue Distribution	21
2.2.4	Mast Cell Receptors	25
2.2.5	Mast Cell Activation	31
2.2.6	Mast Cell Immunological Functions	35
2.2.7	Mast Cell Non-immunological Functions	43
3	Mast Cell Mediators	49
3.1	Granule Composition	49
3.2	Histamine and Serotonin	50
3.3	Proteases	52
3.4	Lipid Mediators	55
3.5	Cytokines and Growth Factors	56
3.6	Chemokines	60
4	The Tumour Cell	61
4.1	Biology of Tumour Cell	61
4.2	The Importance of Microenvironment in Tumour Metastasis	63
4.3	The “Seed and Soil” Theory	64
5	Tumour Angiogenesis	67
5.1	The Angiogenic Switch	68
5.2	Phenotypic and Genotypic Characteristics of Tumour Vessels and Genetic Evidence that Tumours Are Angiogenesis-Dependent	71
5.3	What Is the Evidence that Genetic Instability Promotes the Angiogenic Switch?	72

5.4	Hypoxic Regulation of Tumour Angiogenesis.....	74
5.5	The Role of Pericytes in Tumour Blood Vessels.....	74
5.6	The Role of Inflammatory Cells in Tumour Angiogenesis	75
5.7	Participation of Haematopoietic Cells and Endothelial Precursor Cells to Tumour Angiogenesis.....	78
5.8	Alternative Mechanisms of Tumour Angiogenesis	79
5.9	Vascular Cooption.....	79
5.10	The Prognostic Significance of Tumour Angiogenesis.....	80
5.11	Angiogenesis Is Not Necessarily Involved in Tumour Progression.....	81
6	Mast Cells and Tumours.....	83
6.1	Mast Cells and Tumour Growth in Humans: Pro and Contra.....	83
7	Mast Cells and Tumour Angiogenesis	89
7.1	Mast Cell-Induced Angiogenesis Studied by Means of <i>In Vitro</i> and <i>In Vivo</i> Assays.....	89
7.2	Mast Cells-Induced Angiogenesis Studied by Means of Experimental Carcinogenesis	90
7.3	Angiogenenic Factors Stored in Mast Cells.....	93
7.4	Mast Cells and Angiogenesis in Human Solid Tumours	97
7.5	Mast Cells and Angiogenesis in Human Haematological Tumours....	101
8	Mast Cells and Tumour Lymphangiogenesis.....	103
9	Drugs Affecting Mast Cells	105
10	Concluding Remarks and Perspectives.....	107
	References.....	111

Mast Cells and Tumours

from Biology to Clinic

Ribatti, D.; Crivellato, E.

2011, VIII, 142 p., Hardcover

ISBN: 978-94-007-1468-7
