

Contents

- 1 Introduction 1**
 - 1.1 Autonomous Sensors 1
 - 1.2 Power Sources for Autonomous Sensors 2
 - 1.3 Challenges 5
 - References 6

- 2 Load and Power Conditioning 9**
 - 2.1 Load 9
 - 2.1.1 Sensors and Signal Conditioning 10
 - 2.1.2 Microcontrollers 12
 - 2.1.3 Transceiver 16
 - 2.1.4 Load Model 18
 - 2.2 Power Conditioning 21
 - 2.2.1 Linear Regulators 21
 - 2.2.2 Switching Regulators 22
 - 2.2.3 Charge Pumps 23
 - 2.2.4 Control Strategy 24
 - 2.3 Conclusions 25
 - References 26

- 3 Ambient Energy Sources 29**
 - 3.1 Radiant Energy 29
 - 3.1.1 Optical Energy 30
 - 3.1.2 Radiofrequency Energy 31
 - 3.2 Mechanical Energy 32
 - 3.3 Thermal Energy 34
 - 3.4 Magnetic Energy 36
 - 3.5 Biochemical Energy 36
 - 3.6 Conclusions 37
 - References 38

4	Primary Batteries and Storage Elements	41
4.1	Batteries	41
4.1.1	General Characteristics	41
4.1.2	Batteries and Autonomous Sensors	45
4.1.3	Primary Batteries	46
4.1.4	Secondary Batteries	47
4.2	Battery Characterization	50
4.2.1	Proposed Approach	50
4.2.2	Materials and Methods	52
4.2.3	Experimental Results	54
4.2.4	Model Validation	55
4.3	Supercapacitors	56
4.4	Supercapacitor Characterization	59
4.4.1	Materials and Methods	59
4.4.2	Experimental Results	60
4.5	Hybrid Systems	62
4.5.1	Problem Statement	63
4.5.2	Theoretical Analysis	64
4.5.3	Materials and Methods	69
4.5.4	Experimental Results	72
4.6	Conclusions	75
	References	78
5	Optical Energy Harvesting	81
5.1	Solar Cells	81
5.2	PV Array Simulator	85
5.3	Direct-Coupled Circuits	87
5.3.1	Analysis	88
5.3.2	Experimental Results	92
5.4	MPPT Circuits and Methods	95
5.4.1	Dc/dc Converters Based on PFM Techniques	96
5.4.2	Analysis	97
5.5	LOCV Method	101
5.5.1	Efficiency	102
5.5.2	Experimental Characterization	103
5.5.3	Implementation and Time Response	106
5.5.4	Assigning Parameter Values	107
5.6	A Novel Closed-Loop MPPT Technique	108
5.6.1	Theoretical Approach	109
5.6.2	Implementation	110
5.6.3	Analysis	112
5.6.4	Assigning the Parameter Values	114
5.6.5	Materials and Methods	115
5.6.6	Experimental Results	116
5.7	Conclusions	120
	References	121

Powering Autonomous Sensors

An Integral Approach with Focus on Solar and RF
Energy Harvesting

Penella-López, M.T.; Gasulla-Forner, M.

2011, XIII, 147 p., Hardcover

ISBN: 978-94-007-1572-1
