Preface	vii
Notation	xi
1 Introduction	1
1.1 Overview of MIMO fundamentals	2
1.1.1 MIMO channel models	2
1.1.2 Single-user capacity metrics	6
1.1.3 Multiuser capacity metrics	12
1.1.4 MIMO performance gains	17
1.2 Overview of cellular networks	19
1.2.1 System characteristics	19
1.2.2 Co-channel interference	26
1.3 Overview of the book	31
2 Single-user MIMO	35
2.1 Channel model	35
2.1.1 Analytical channel models	37
2.1.2 Physical channel models	41
2.1.3 Other extensions	42
2.2 Single-user MIMO capacity	43
2.2.1 Capacity for fixed channels	43
2.2.2 Performance gains	48
2.2.3 Performance comparisons	53
2.3 Transceiver techniques	54
2.3.1 Linear receivers	55
2.3.2 MMSE-SIC	61
2.3.3 V-BLAST	63

2.3.4	D-BLAST	66
2.3.5	Closed-loop MIMO	68
2.3.6	Space-time coding	68
2.3.7	Codebook precoding	70
2.4	Practical considerations	76
2.4.1	CSI estimation	76
2.4.2	Spatial richness	77
2.5	Summary	77
3	Multiuser MIMO	79
3.1	Channel models	79
3.2	Multiple-access channel (MAC) capacity region	81
3.2.1	Single-antenna transmitters ($N = 1$)	82
3.2.2	Multiple-antenna transmitters ($N > 1$)	85
3.3	Broadcast channel (BC) capacity region	87
3.3.1	Single-antenna transmitters ($M = 1$)	89
3.3.2	Multiple-antenna transmitters ($M > 1$)	91
3.4	MAC-BC Duality	93
3.5	Scalar performance metrics	95
3.5.1	Maximizing the MAC weighted sum rate	96
3.5.2	Maximizing the BC weighted sum rate	99
3.6	Sum-rate performance	101
3.6.1	MU-MIMO sum-rate capacity and SU-MIMO capacity	103
3.6.2	Sum rate versus SNR	104
3.6.3	Sum rate versus the number of base antennas M	109
3.6.4	Sum rate versus the number of users K	113
3.7	Practical considerations	115
3.7.1	Successive interference cancellation	117
3.7.2	Dirty paper coding	118
3.7.3	Spatial richness	118
3.8	Summary	119
4	Suboptimal Multiuser MIMO Techniques	121
4.1	Suboptimal techniques for the multiple-access channel	121
4.1.1	Beamforming for the case of many users	122
4.1.2	Alternatives for MMSE-SIC detection	124
4.2	Suboptimal techniques for the broadcast channel	125
4.2.1	CSIT precoding	128

4.2.2	CDIT precoding	141
4.2.3	Codebook precoding	142
4.2.4	Random precoding	146
4.3	MAC-BC duality for linear transceivers	149
4.3.1	MAC power control problem	151
4.3.2	BC power control problem	152
4.4	Practical considerations	153
4.4.1	Obtaining CSIT in FDD and TDD systems	153
4.4.2	Reference signals for channel estimation	154
4.5	Summary	156
5	Cellular Networks: System Model and Methodology	159
5.1	Cellular network design components	160
5.2	System model	164
5.2.1	Sectorization	167
5.2.2	Reference SNR	169
5.2.3	Cell wraparound	174
5.3	Modes of base station operation	176
5.3.1	Independent bases	178
5.3.2	Coordinated bases	181
5.4	Simulation methodology	186
5.4.1	Performance criteria	188
5.4.2	Iterative scheduling algorithm	190
5.4.3	Methodology for proportional-fair criterion	194
5.4.4	Methodology for equal-rate criterion	202
5.5	Practical considerations	213
5.5.1	Antenna array architectures	213
5.5.2	Sectorization	215
5.5.3	Signaling to support MIMO	218
5.5.4	Scheduling for packet-switched networks	219
5.5.5	Acquiring CQI, CSIT, and PMI	222
5.5.6	Coordinated base stations	223
5.6	Summary	225
6	Cellular Networks: Performance and Design Strategies	227
6.1	Simulation assumptions	227
6.2	Isolated cell	229
6.3	Cellular network with independent single-antenna bases	232

6.3.1	Universal frequency reuse, single sector per site	233
6.3.2	Throughput per area versus cell size	236
6.3.3	Reduced frequency reuse performance	238
6.3.4	Sectorization	243
6.4	Cellular network with independent multiple-antenna bases . . .	249
6.4.1	Throughput scaling	249
6.4.2	Fixed number of antennas per site	251
6.4.3	Directional beamforming	263
6.4.4	Increasing range with MIMO	267
6.5	Cellular network, coordinated bases	269
6.5.1	Coordinated precoding	269
6.5.2	Network MIMO	272
6.6	Practical considerations	276
6.7	Cellular network design strategies	280
7	MIMO in Cellular Standards	285
7.1	UMTS	286
7.2	LTE	288
7.3	LTE-Advanced	293
7.4	IEEE 802.16e and IEEE 802.16m	295
	References	297
	Index	309

MIMO Communication for Cellular Networks

Huang, H.; Papadias, C.B.; Venkatesan, S.

2012, XVI, 316 p., Hardcover

ISBN: 978-0-387-77521-0
