

Table of Contents

1	Introduction	1
1.1	Teaching Suggestions	6
1.2	Fundamental Notation	6

Part I Matrix Groups

2	Concrete Matrix Groups	9
2.1	The General Linear Group	9
2.2	Groups and Geometry	21
2.3	Quaternionic Matrix Groups	33
3	The Matrix Exponential Function	39
3.1	Smooth Functions Defined by Power Series	39
3.2	Elementary Properties of the Exponential Function	45
3.3	The Logarithm Function	51
3.4	The Baker–Campbell–Dynkin–Hausdorff Formula	54
4	Linear Lie Groups	61
4.1	The Lie Algebra of a Linear Lie Group	61
4.2	Calculating Lie Algebras of Linear Lie Groups	69
4.3	Polar Decomposition of Certain Algebraic Lie Groups	72

Part II Lie Algebras

5	Elementary Structure Theory of Lie Algebras	79
5.1	Basic Concepts	79
5.2	Nilpotent Lie Algebras	91
5.3	The Jordan Decomposition	95
5.4	Solvable Lie Algebras	103
5.5	Semisimple Lie Algebras	112
5.6	The Theorems of Levi and Malcev	122
5.7	Reductive Lie Algebras	129

6	Root Decomposition	133
6.1	Cartan Subalgebras	133
6.2	The Classification of Simple $\mathfrak{sl}_2(\mathbb{K})$ -Modules	144
6.3	Root Decompositions of Semisimple Lie Algebras	150
6.4	Abstract Root Systems and Their Weyl Groups	158
7	Representation Theory of Lie Algebras	167
7.1	The Universal Enveloping Algebra	168
7.2	Generators and Relations for Semisimple Lie Algebras	173
7.3	Highest Weight Representations	181
7.4	Ado's Theorem	189
7.5	Lie Algebra Cohomology	194
7.6	General Extensions of Lie Algebras	214

Part III Manifolds and Lie Groups

8	Smooth Manifolds	229
8.1	Smooth Maps in Several Variables	230
8.2	Smooth Manifolds and Smooth Maps	234
8.3	The Tangent Bundle	250
8.4	Vector Fields	261
8.5	Integral Curves and Local Flows	271
8.6	Submanifolds	280
9	Basic Lie Theory	285
9.1	Lie Groups and Their Lie Algebras	285
9.2	The Exponential Function of a Lie Group	296
9.3	Closed Subgroups of Lie Groups and Their Lie Algebras	317
9.4	Constructing Lie Group Structures on Groups	326
9.5	Covering Theory for Lie Groups	335
9.6	Arcwise Connected Subgroups and Initial Subgroups	347
10	Smooth Actions of Lie Groups	359
10.1	Homogeneous Spaces	359
10.2	Frame Bundles	370
10.3	Integration on Manifolds	388
10.4	Invariant Integration	407
10.5	Integrating Lie Algebras of Vector Fields	419

Part IV Structure Theory of Lie Groups

11	Normal Subgroups, Nilpotent and Solvable Lie Groups ...	429
11.1	Normalizers, Normal Subgroups, and Semidirect Products ...	430

11.2	Commutators, Nilpotent and Solvable Lie Groups	442
11.3	The Automorphism Group of a Lie Group	452
12	Compact Lie Groups	459
12.1	Lie Groups with Compact Lie Algebra	459
12.2	Maximal Tori in Compact Lie Groups	471
12.3	Linearity of Compact Lie Groups	483
12.4	Topological Properties	488
13	Semisimple Lie Groups	505
13.1	Cartan Decompositions	505
13.2	Compact Real Forms	512
13.3	The Iwasawa Decomposition	522
14	General Structure Theory	529
14.1	Maximal Compact Subgroups	529
14.2	The Center of a Connected Lie Group	533
14.3	The Manifold Splitting Theorem	539
14.4	The Exponential Function of Solvable Groups	547
14.5	Dense Integral Subgroups	552
14.6	Appendix: Finitely Generated Abelian Groups	559
15	Complex Lie Groups	565
15.1	The Universal Complexification	566
15.2	Linearly Complex Reductive Lie Groups	571
15.3	Complex Abelian Lie Groups	579
15.4	The Automorphism Group of a Complex Lie Group	586
16	Linearity of Lie Groups	587
16.1	Linearly Real Reductive Lie Groups	587
16.2	The Existence of Faithful Finite-Dimensional Representations	591
16.3	Linearity of Complex Lie Groups	598
17	Classical Lie Groups	605
17.1	Compact Classical Groups	605
17.2	Noncompact Classical Groups	610
17.3	More Spin Groups	616
17.4	Conformal Groups	622
18	Nonconnected Lie Groups	629
18.1	Extensions of Discrete Groups by Lie Groups	629
18.2	Coverings of Nonconnected Lie Groups	642
18.3	Appendix: Group Cohomology	645

Part V Appendices

A Basic Covering Theory	653
A.1 The Fundamental Group	653
A.2 Coverings	657
B Some Multilinear Algebra	665
B.1 Tensor Products and Tensor Algebra	665
B.2 Symmetric and Exterior Products	671
B.3 Clifford Algebras, Pin and Spin Groups	686
C Some Functional Analysis	701
C.1 Bounded Operators	701
C.2 Hilbert Spaces	703
C.3 Compact Symmetric Operators on Hilbert Spaces.....	704
D Hints to Exercises	707
References	717
Index	723

Structure and Geometry of Lie Groups

Hilgert, J.; Neeb, K.-H.

2012, X, 746 p., Hardcover

ISBN: 978-0-387-84793-1
